

YOUR TRUSTED PARTNER IN SAFETY SOLUTIONS

spectrum industrial

A trading division of CENTURION

We aim to dispatch all in stock orders the very same day.

Depending on the size and value of the order, we will dispatch using a next-day courier service or by registered post.

UK Mainland Carriage Charges:

Orders over £50	Free of Charge
Orders under £50	£5.00
Timed deliveries	On Request

For deliveries outside mainland UK, please contact the sales office.

Payment Options

- To open an account please contact our sales team. Our standard account terms are 30 days end of month and are subject to standard credit checks.
- Cheques should be made payable to Centurion Europe Ltd.
- We also accept the following payment methods:

MasterCard Maestro VISA

Spectrum Industrial
welcomes international customers

We provide businesses with solutions to help identify, manage and reduce safety risks and hazards in the workplace. We can supply our full product brochure and work closely with our international customers to ensure clear translations on products relevant to your market.

If you wish to discuss further or if you are interested in opening an account or becoming a distributor, please don't hesitate to contact us.

"Since adding Spectrum safety products to our range we have been able to provide customers with an extended range which has had a positive impact on revenue for our business."

Keith Fisher, Product Manager **Beaumanor Fluid Power Products**

Why become a Distributor?

- Excellent distributor margins
- Extensive range of products
- Site Survey support from our in-house safety experts
- Marketing and training support
- POS and Merchandising support
- Delivery direct to your customer
- A trusted and recognisable brand

Marketing Support

Our products are backed by a marketing program covering all aspects of PR including advertising, trade exhibitions, direct mail and online marketing. All aimed at raising the awareness of tradespeople and safety professionals.

Through our approved network of distributors we supply organisations large and small including:

BAE SYSTEMS INSPIRED WORK · 2 sisters Food Group · Balfour Beatty · YorkshireWater · isg · NHS · PRINCES Yours to enjoy · KERRY · Unilever · AGRICULTURE · nationalgrid · KP SNACKS

Corporate Social Responsibility
Our Promise

- *To minimise the consumption of natural resources and energy*
- *Monitor our suppliers for ethical trading*
- *We will be committed to a greener environment and aim to instil good practices to our employees to recycle and reuse*
- *Comply with environmental legislation*
- *Conduct residential surveys to monitor our impact on our local community*
- *Work in partnership with our local adult day care centre to provide work opportunities for those with disabilities*
- *Champion Health & Safety*
- *We are ISO9001:2015 and ISO:14001 accredited and are committed to maintaining the highest quality standards and minimising our impact on the environmental*
- *100% of our waste cardboard is recycled or reused*
- *100% of our sign waste material is collected and recycled by our Waste Management Supplier*

SPECTRUM SERVICES JOINS SEAMLESSLY WITH YOUR BUSINESS

At Spectrum Industrial we are not just about product, we pride ourselves on offering expertise when it comes to the products we sell and our commitment towards safety has led us to create Spectrum Services. Our expert teams are constantly keeping up to date with safety legislation allowing us to provide much more than just a product. We can help strengthen your current site, your teams and your premises management with Spectrum Services. We free up your time and give you the resources to concentrate on what's important to you.

SPECTRUM SERVICES IS JUST AN EMAIL OR CALL AWAY.
01302 800273 OR SALES@SPECTRUM-INDUSTRIAL.CO.UK

Spectrum Services
Site Surveys

OUR TEAM OF EXPERTS ARE ON HAND TO OFFER A SITE SURVEY FOR SAFETY SIGNAGE AND MACHINERY / EQUIPMENT LOCK OUT SAFETY.

By law the correct safety signage should be displayed in the appropriate locations and to current legal standards. If you are unsure of your legal obligations or have been notified by a regulatory body that your current signage is not adequate, our team of experts are on hand to offer a Safety Signage Survey for your Premises.

Machinery / Equipment Safety Survey. According to hse.gov there are hundreds of machinery and industrial equipment accidents every year. Our surveys will review your lock out tag out process for when machinery is undergoing repair or maintenance and provide advice on the process and products required to ensure when your machinery is safely isolated during repair or routine maintenance.

Spectrum Services
Training

OUR EXPERIENCED TEAM IS ON HAND TO DELIVER TRAINING ACROSS THE FULL BREADTH OF OUR RANGE.

Our programmes are not only designed to train our resellers sales teams, but also to support our resellers in providing training their Business customers, especially in more niche areas such as Lock Out Tag Out.

In addition to our training programmes, we can also offer our resellers our Mobile Training Unit. Free to use, it is ideal for staff training, events or open days, providing the opportunity to get hands on with our products.

Spectrum Services
Custom Design

OUR SIGN MANUFACTURING TEAM HAVE MANY YEARS OF EXPERIENCE DESIGNING, PRODUCING AND INSTALLING SIGNAGE.

Our sign manufacturing team have many years of experience designing, producing and installing safety signs and stencils worldwide. From the smallest one -off vinyl sign to large hoarding boards and larger print runs of many thousands, we can be depended upon to provide a fast and efficient service.

If you have a specific requirement for your signs, we can work closely with you to provide a design service or alternatively you can send us your own artwork. The diversity of our production facilities is second to none, why not give us a call and see how we can help you.

Spectrum Services
Eagle-ID

OUR UNIQUE KEY RECORDING SYSTEM DESIGNED TO GUARANTEE THE ONSITE SAFETY ISSUES SURROUNDING DUPLICATE KEYS.

The Eagle-ID scheme can be implemented on any of the Lockout Tagout padlocks we supply and will provide an ironclad guarantee that your site is free from key duplications and the safety implications this can present.

Every padlock supplied has its unique key reference recorded on our internal system, and subsequent orders are cross-referenced against this database to ensure no duplications can ever be issued to the user, regardless of site location or company organisational structure.
For further details and help on implementing the Eagle-ID please contact our sales office.

FROM CONCEPT TO COMPLETION OUR TEAM IS HERE TO HELP CUSTOMERS. **FOR MORE INFORMATION CONTACT OUR SALES TEAM.**

We can produce what you want, how you want it, any size and any material. We can work with you to bring your ideas into reality, from the initial concept design through to the final production and installation.

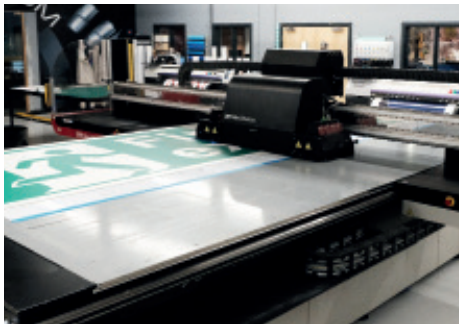
From Health & Safety Signs through to advertising, commercial or LED building signs our experienced custom manufacturing team is here to help.

SOME EXAMPLES OF OUR MANUFACTURING TECHNIQUES ARE LISTED BELOW:



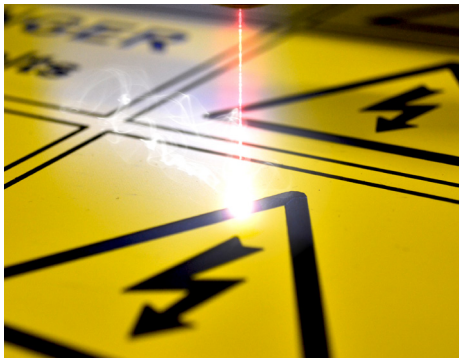
Large Format Digital Printing

Our digital flatbed printers use the very latest technology to enable us to print extremely high quality graphics onto substrates up to 3m x 2m. Using the latest hardware and software, these machines combine both speed and quality and provide the ultimate in flexibility.

With multiple machines available these are ideal for printing one-off high quality prints through to production runs of many thousands.

Digital Cutting

Our state of the art digital cutters use optical recognition software to accurately cut a range of materials. We have a range of different cutting methods available depending on the substrate to be cut, varying from the high-tensile strength knife blades through to diamond cut routers and oscillating blades. The substrates are placed on a tough cut-resistant conveyor bed to increase productivity and ease the job of the operator. This is the ideal partner to our digital print machines.



Laser Cutting and Engraving

We have multiple laser machines onsite utilising both CO2 and YAG lasers, providing us with the ability to cut or engrave various materials. Vector artwork is imported and the computer carefully controls the position and power of the laser to cut or engrave materials as required. Different laser types are needed for different materials, and the accuracy provided exceeds router based cutting or engraving.

THIS IS A SMALL SELECTION OF THE EQUIPMENT AND PRODUCTION TECHNIQUES AVAILABLE TO OUR TRAINED STAFF. OTHERS METHODS INCLUDE SCREEN, PAD AND LABEL PRINTING, 3D LETTER FORMING, LED SIGN PRODUCTION AND MANY MORE.

WE UNDERSTAND HOW IMPORTANT THE VISUAL REPRESENTATION OF YOUR BUSINESS IS, FROM EXTERIOR BUILDING SIGNAGE, INTERIOR SIGNAGE OR BANNERS WE CAN OFFER A SOLUTION TO SUIT.

Custom Signage & Graphics

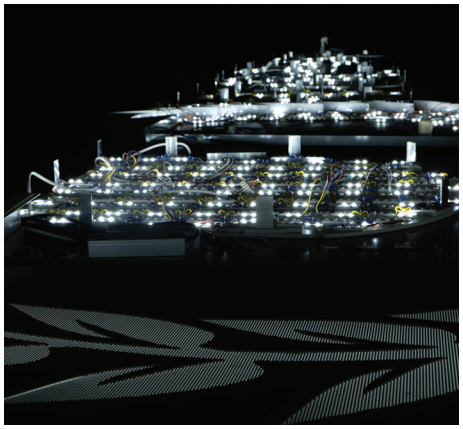
- Bespoke Builds
- Built-up Letters
- Flat Cut Letters
- Sign Trays
- LED Illumination
- Light Boxes
- Hoarding
- Event Signage
- Merchandising & POS
- Large Format Printing
- Solar Films
- Window Graphics

Our technology capabilities allow us to provide a full range of signage solutions for a variety of businesses.

In-house manufacturing enables fast and effective service.

From small signs to large billboard / hoarding boards our technology and experienced craftsmen allows us to offer solutions for most applications.

Project management from design, manufacture through to installation.



MERCHANDISING MADE EASY

We have various options available when it comes to displaying signs for retail.

WELCOME TO IN THE KNOW

with Spectrum Industrial

The knowledge centre from Spectrum Industrial keeps you "In The Know" with exclusive content, tools and resources for subscribers only.

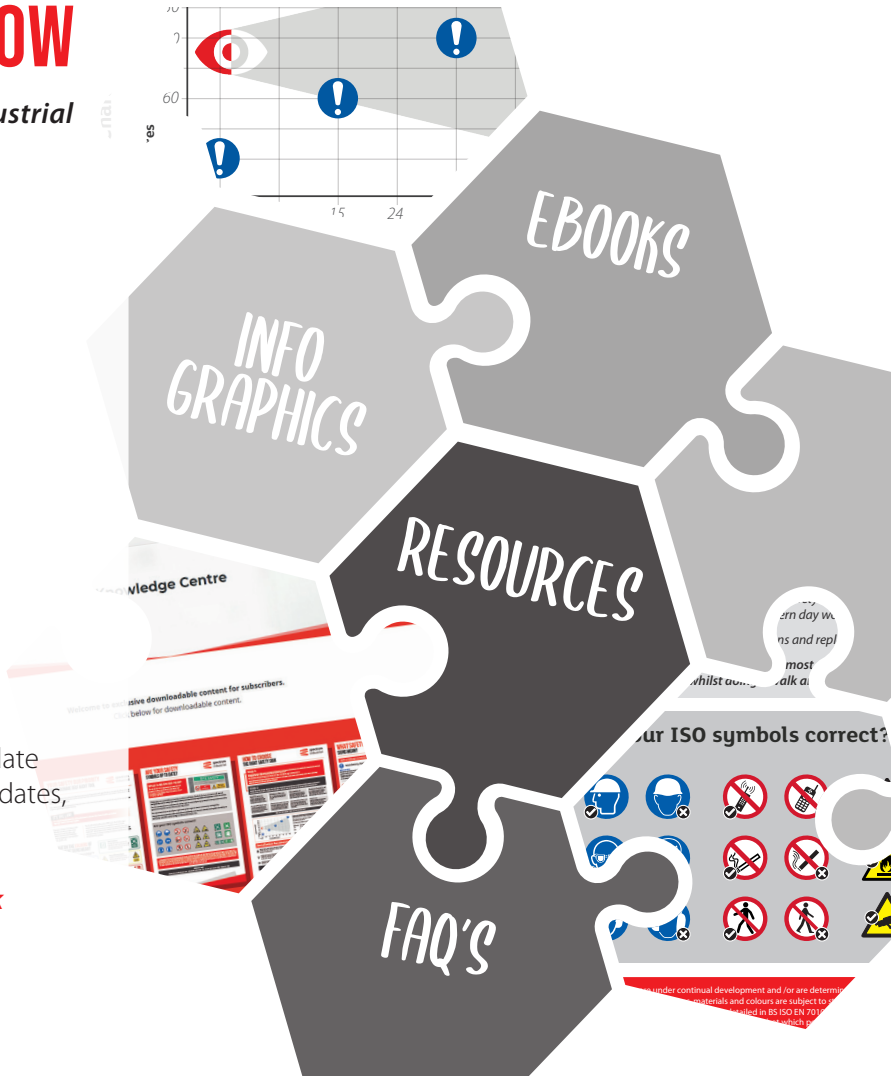
The knowledge centre provide a library of resources including:

- Ebooks
- Infographics
- Guides

and much more.

This ever growing library will provide up to date resources including legislative and policy updates, guidance and best practice.

Simply register at ***spectrum-industrial.co.uk*** and click on The Knowledge Centre to gain unlimited access.



SAFETY SIGNS & LABELS

Creating a safer workplace with thousands of stocked safety signs and labels.

"YOUR PARTNER IN SAFETY SOLUTIONS"

As a specialist manufacturer of safety signs, all Spectrums signs conform to the BS EN ISO 7010 regulation, ensuring that all graphical safety symbols are consistent and compliant. With over 25 years' experience of manufacturing and supplying safety signs, we offer a comprehensive range of safety signs to cover every conceivable customer requirement, all manufactured at our 90,000 sq ft site in Doncaster.

Understanding the catalogue

Size, Material & Code

Underneath each sign image there is a set of details which refers to the product above. Each line refers to one version of the product. For non sign products the order code is clearly marked next to the item. If you cannot find the exact design, size or material you require please contact our sales team who are always happy to help.

In these cases the size shown refers to an individual sign, Crop marks are included for easy cutting and separation.

Make a note of the code number. This code is unique to that product and to the size and material.

Please state this when ordering.

300 x 100 PVC 1512

Choose the size from beneath the sign image ***Note:*** This is always w x h in millimetres

Choose the material you require. The materials are abbreviated, please refer to the material key

ICON KEY

- **2** — The number seen in a black circle in the top right of any sign indicates the number of signs per sheet.
- **10 PACK** — The number seen in a black square in the top right corner indicates the number of signs per pack.
- This symbol indicates the sign has a moving part.
- This image means this signs is double sided.
- An arrow in a black circle indicates products which have an additional SAV arrow included.
- This sign image has been enlarged to show detail, the actual size is listed underneath the image.

SAFETY SIGN SYMBOL GUIDE

Health and Safety signs can be broken down into the following categories, as specified by British and European standards.

Safe Condition
A green rectangle or square with a symbol or text in white providing information about first aid, escape or other safe conditions.

Mandatory Signs
A blue circle containing a white image denoting that a specific course of action must be taken.

Hazard Warning Signs
A yellow triangle with a black border and symbol denoting a hazard in the environment.

Prohibition Signs
A red circular band with a diagonal bar on a white background. The black symbol behind indicates the prohibited action.

Fire Equipment
A red rectangle or square with a symbol or text in white providing information about the location and use of fire fighting equipment.

What is BS EN ISO 7010

The BS EN ISO 7010 regulation ensures that all graphical safety symbols are consistent and compliant. It is a design directive and is a list of compliant symbols.

ROAD TRAFFIC SIGNAGE

Road and Traffic signs are commonly erected at the side or above roads to give instructions or provide information to road users. These are generally separated into permanent and temporary categories.

All permanent road signs must be manufactured by an audited and registered company by law, and have the appropriate labelling attached to the reverse. As manufacturers we are fully accredited to the relevant standards.

The UKCA (UK Conformity Assessed) marking is a new UK product marking that is used for goods being placed on the market in Great Britain (England, Wales and Scotland). It covers most goods which previously required the CE marking.

All permanent roads signs manufactured for installation within Great Britain will be supplied with a UKCA Mark, whereas signs destined for the European market will have the CE Mark.

Class Ref 1

Sometimes referred to as Engineering grade, this has a lower grade of retro-reflectivity and is commonly used on temporary road signage.

Class Ref 2

This is a high intensity prismatic (HIP) retro-reflective sheet, specifically designed for use on permanent road signs. Engineered to give good reflectivity at all angles critical to the driver, it is more durable with a longer lifespan.

Class Ref R3B

This is the highest grade retro-reflective sheet available, and is specified for permanent signs where the ultimate visibility and legibility is required such as motorway signs. This material is available on request.

MATERIAL KEY

SAV	Self Adhesive Vinyl	CLG	Window Cling Vinyl	PYC	2mm Vandal Resistant Polycarbonate
RPVC	Rigid 1mm PVC Board (Non Adhesive)	CRU	Classic Roll-up Sign	QSN	Q-Sign (Temporary Moulded Plastic Sign)
PP	1.2mm Recyclable Polypropylene	CRX	Lightweight Corrugated Plastic	SAA	Satin Anodised Aluminium
PVC	Self Adhesive Semi Rigid PVC	ACP	Aluminium Composite Panel	SAP	Paper (Self Adhesive)
PHO	1.3mm Rigid Photoluminescent Board (Self Adhesive)	ACPC	Aluminium Composite Panel with Channel	SSE	Stainless Steel Effect Laminate
PHS	Flexible Photoluminescent Vinyl	FLR(Ph)	Anti-Slip Laminated Floor Sign (Photoluminescent)	SSS	1.2mm Satin Stainless Steel

TAK	Reverse Printed and Moulded Plastic	LAM	Laminated Paper	TRU	Triflex Roll-up Sign
BAN	Flexible Banner PVC	PAP	Paper	ZFM	Mild Steel Sheet (in a mild Steel frame)
BRG	Brushed Gold Effect Laminate (Self Adhesive)	PB	1.5mm Polished Brass	ZIN	Mild Steel Sheet (without frame)
BRS	Brushed Silver Effect Laminate (Self Adhesive)	POL	Polished Gold Effect Laminate (Self Adhesive)	ELAM	Engraving Laminate
CHR	Polished Chrome Effect (Self Adhesive)	PSS	1.2mm Polished Stainless Steel	EGR	Rigid Engraved

Polypropylene - PP

This fully recyclable plastic is suitable for both internal and external use. Only available without adhesive.

Self Adhesive Vinyl - SAV

Thin and flexible, ideal for indoor use and in low traffic areas. Application to clean, smooth surfaces.

Foamed PVC Board - FMX

A versatile, lightweight rigid PVC foam sheet, durable and with low water absorption making it suitable for indoor and outdoor use.

Aluminium Composite - ACP

Strong and lightweight, ideal for long term outdoor use. Resistant to inclement weather conditions, it is commonly used for fabrication and road traffic signs.

Rigid PVC - RPVC / PVC

Available with or without adhesive, durable, strong & weather resistant a great option for outdoor or indoor.

Stencil - STN

Specially modified flexible polyester which is laser cut for accuracy. Can be reused multiple times.

Laminated Floor Vinyl - FLR

Permanent vinyl floor graphics with an hard wearing laminate face, rated to R9 grade for its anti-slip properties. Suitable for dry, Indoor sealed surfaces.

Photoluminescent - PHS / PHO

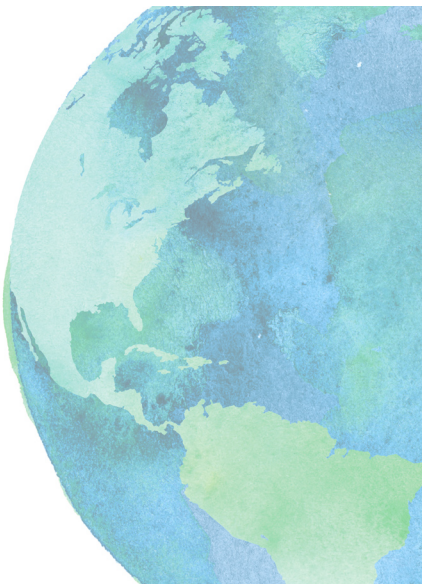
This material glows in dark or low light areas in the event of a power failure or fire. Often specified for Fire Exit signs so that the exit route remains visible.

RECYCLABLE POLYPROPYLENE

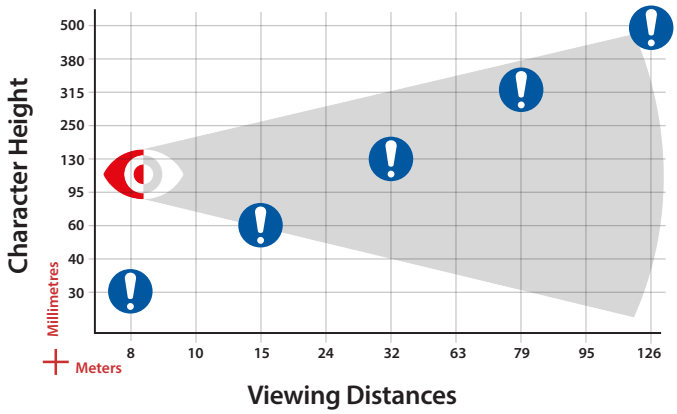
Alongside the internal measures we have in place to reduce our environmental impact, we have recently started manufacturing signs on 1.2mm rigid polypropylene. This material is fully recyclable and is suitable for both internal and exterior signage.

Attributes:

- ✓ ***Fully recyclable***
- ✓ ***UV Resistant***
- ✓ ***Impact and stress crack resistant***
- ✓ ***Does not fade or yellow over time***



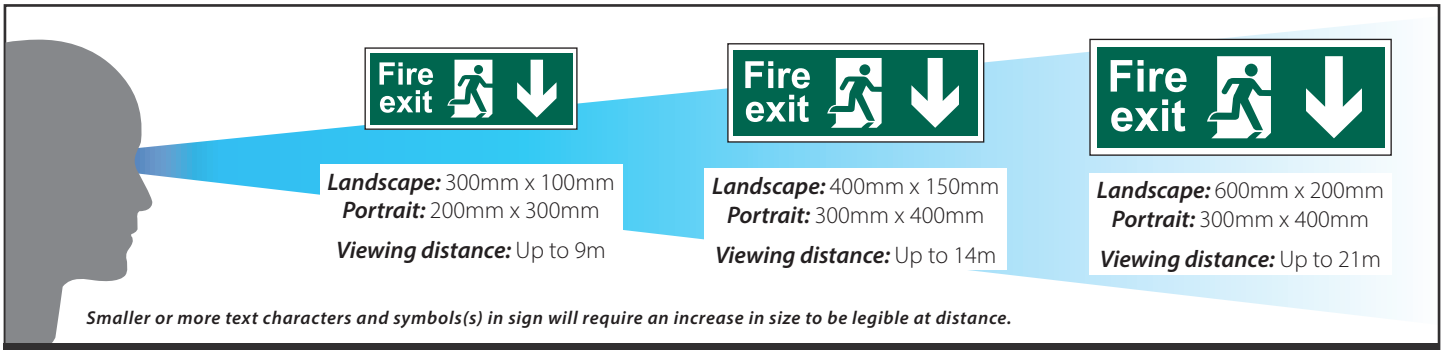
VIEWING DISTANCES



These are suggested maximum viewing distances in the latest simplified draft format.

This is a guide only and other factors may need to be considered.

Distance	*Examples of Use*
17m	Small offices, small shops and factories.
22m	Large offices, large factories, warehouses and shopping centres.
30m	Large warehouses, distribution centres and exhibition halls.



Smaller or more text characters and symbols(s) in sign will require an increase in size to be legible at distance.

NOTE: SIGNS IN POOR LIGHTING CONDITIONS THAT ARE NOT LIKELY TO FALL WITHIN OBSERVER'S LINE OF SIGHT WILL NEED TO INCREASE IN SIZE BY 50%

SPECIALIST TRADE SUPPLIERS | FOR OVER 25 YEARS

Our products are under continual development and /or are determined by legislation requirements, as such we reserve the right to modify them as we deem necessary. Product sizes, materials and colours are subject to standard commercial tolerances and are shown in nominal form. Where possible all signs are manufactured to the latest symbols detailed in BS ISO EN 7010. In cases where an ISO symbol has not been specified then the sign will be manufactured to BS 5499 standards until one has been published, at which point the stock will be updated and supplied in lieu of the design shown in the catalogue.

This catalogue is protected by the Laws of Copyright, no part may be reproduced, transmitted in any form or stored in a retrieval system without prior written permission from the Manufacturer.

Eyewash Stations and Products 21

FIRE SAFETY AND SAFE CONDITION

What are they

A Safe Condition sign provides vital information about an action to keep you safe. These include signs that indicate escape routes or emergency exits and the location of safety equipment such as first aid kits.

Defining characteristics

A green rectangle or square covering with a white border. A suitable symbol is centrally placed on the sign. Both the symbol and any supplementary text should be in white.

When to use them

Signs for safety equipment should be placed in a visible area to enable someone in need to locate and identify the equipment quickly and correctly.

For Fire Exit signs, these should be placed in a visible location and indicate the safe route to follow in case of a fire or other emergency, with directional arrows in place if the environment dictates extra clarification is necessary.

Things to consider

Some of our signs are available manufactured on a photoluminescent substrate, which (when 'charged up' by natural or artificial light) will glow for a length of time. Although there is no legal requirement to use photoluminescent versions of Fire Exit signs, these are often requested as part of a comprehensive safety way guidance system (SWGS). Note that photoluminescent signs are not to be used as a replacement for emergency lighting or luminaires, but rather as a supplementary offering.

IS YOUR SIGNAGE CORRECT?

Before 2013 the traditional emergency sign used above doorways to identify the escape route, pictured a DOWN arrow. Under BS EN ISO 7010 the ***DOWN arrow should be used to identify a change of level going down.***

Following the introduction of BS EN ISO 7010 the directional arrow above a ***corridor doorway or exit door, should be the UP arrow.*** This is to inform the occupants that they need to carry straight on or exit through here.

Double Sided Hanging Signs

Manufactured from 3mm Foamex Board and printed on both sides, these signs are designed to be hung from the ceiling and provide emergency exit information. Ideal for corridors, they come pre-drilled with holes in the top corners for use in conjunction with our hanging kits.

FIRE EXTINGUISHERS AND EQUIPMENT

What are they

These signs are used to provide vital information about the location and identification of fire fighting equipment. This equipment would include fire alarms, dry risers and the location and type of fire extinguishers.

Defining characteristics

A red rectangle or square with a white border. A suitable symbol in white is placed centrally on the sign. Both the symbol and any supplementary text should be in white.

When to use them

Signs for fire fighting equipment should be placed in a visible area to enable someone in need to locate and identify the equipment quickly and correctly. In buildings where the equipment is not clearly visible, it may be pertinent to indicate the location of this equipment with further signage.

Common Fire Extinguishers

Powder Extinguishers

Ideal for use in mixed risk environments and offer excellent all round fire protection. With a unique class C rating, powder fire extinguishers are the only effective solution for fires involving flammable gases.

Foam Extinguishers

Ideal for use on fires involving solid combustible materials and are highly effective on flammable liquid fires. The layer of foam applied by these extinguishers helps to prevent re-ignition after the fire has been extinguished.

CO^2 Extinguishers

Are suitable for use on flammable liquid fires and are extremely effective at extinguishing fires involving electrical equipment. CO2 is also one of the cleanest extinguisher agents and leaves no residue behind.

Water Extinguishers

Suitable for use in environments containing solid combustible materials such as wood, paper and textiles. It is important to remember that water conducts electricity and should not be used around electrical equipment.

IN THE KNOW

BS EN ISO 7010 is a European standard to ensure there is a standardised, easy to understand safety message which is globally recognised. The standard covers safety signs in the workplace and other locations where people need to be informed about safety.

IN THE KNOW

UK fire extinguisher regulations state that you should have a minimum of two 'Class A' extinguishers on every storey of the building.

The 'standard pair' water-based and CO2 fire extinguishers are usually located by exits and fire alarm call-points.
To comply with fire extinguisher regulations, extinguishers should be either fixed to the wall, or attached to a stand.
Fire extinguishers must be commissioned on-site by a competent person. This generally means someone who has passed the BAFE fire extinguisher exam or has an equivalent qualification.

Fire extinguishers are not compliant with UK fire extinguisher legislation until they have been commissioned.
Fire extinguisher regulations state that extinguishers must be serviced annually.

Fire Extinguishers

Water Extinguishers

- Corrosion resistant finish.
- Internal Polyethylene lining.
- Squeeze grip operation.
- Approved to BSEN3.
- Supplied with bracket.
- 5 year guarantee.

Description	Code
6 litre Spray Water (13A)	14355
9 litre Jet Water (21A)	14356

CO^2 Extinguishers

- Aluminium alloy construction.
- Corrosion resistant finish.
- Internal Polyethylene lining.
- Squeeze grip operation.
- Harmless to machinery.
- (2kg) Frost free horn.
- Approved to BSEN3.
- Supplied with bracket.
- 5 year guarantee.

Licence No: KM58897

Description	Code
2kg CO2 (34B)	14357
5kg CO2 (70B)	14358

Filled weights: 14357 - 5.5kg 14358 - 12.4kg

Foam Extinguishers

- Spray nozzle.
- Corrosion resistant finish.
- Internal Polyethylene lining.
- Squeeze grip operation.
- Approved to BSEN3.
- Compliant to 35kV Dielectric test.
- Supplied with bracket.
- 5 year guarantee.

Description	Code
2L Foam (8A 55B)	14359
6L Foam (21A 144B)	14360
9L Foam (27A 233B)	14361

Powder Extinguishers

- Corrosion resistant finish.
- Squeeze grip operation.
- With brackets (<2kg with transport bracket).
- 5 year guarantee.
- Approved to BSEN3.*

* 600g and 800g exclude BSEN3 clause 6.1 (size requirement).

Description	Code
600g ABC Powder (5A 21B C)	14364
800g ABC Powder (5A 34B C)	14365
1kg ABC Powder (8A 34B)	14366
2kg ABC Powder (13A 89B)	14367
6kg ABC Powder (43A 233B)	14368
9kg ABC Powder (55A 233B)	14369

Fire Extinguishers Stands

Robust fully moulded design, these stands are manufactured from impact and chemical resistant plastic. Supplied in sections for easy transportation and assembly.

Free-standing design.

Dimensions (HxWxD):
Single: 645 x 290 x 300mm
Double: 645 x 500 x 300mm
Extinguisher not included.

Description	Code
Single	14370
Double	14371
Retaining Strap	14372

Fire Blankets

A durable single-piece moulded design with large labelled area for maximum impact. Kitemark certified to BS EN 1869:1997.

Description	Code
1 x 1m	14373
1.2 x 1.8m	14375

Fire Alarms

Battery operated site alarms with a loud 110db siren and a strobe function for noisy environments. Easily linkable with up to 5 other units.

Dimensions (HxWxD): 305 x 191 x 65mm
Uses PP3 batteries (replaceable)

Description	Code
Call Point Activation	14728
Push On / Twist Off Activation	14729

Manufactured from Die Cast Aluminium, this tried and tested design sounds at 60db up to 35 metres.

Pre-drilled flange for simple installation.

Description	Code
Rotary Hand Bell	14730

With plastic fronted 'glass' which is ideal for glass sensitive environments.

Secure 'snap fit' mechanism.

Description	Code
Break Glass Keybox	14731
Replacement 'Glass'	14732

Armbands and Lanyards

Nylon Armbands

Printed Nylon armbands with Velcro fastening.

Description	Code
Fire Marshal	14190
Fire Warden	14191
First Aider	14192

Armbands

Photoluminescent and reflective armband with Velcro fastening.

Description	Code
Fire Marshal	14193
Fire Warden	14194
First Aider	14195

Lanyards

Lanyards with hook and safety release clasp.

Description	Code
Fire Marshal	14725
Fire Warden	14726
First Aider	14727

MANDATORY

What are they

Mandatory signs denote information about a specific course of action which must be taken. These include signs that indicate the correct type of PPE to use, doors which must be kept shut for fire safety purposes or the action to take in case of a fire.

Defining characteristics

A white symbol on a blue circle with a white border. Any supplementary text should be in white on a blue background.

When to use them

Mandatory signs should fixed on or very near the relevant equipment or in a position of entry to an area to which the message pertains.

ARE YOUR ISO SYMBOLS CORRECT?

As of January 2013 BS EN ISO 7010 came into effect and many safety sign symbols were updated.

Are yours up to date?

CROP MARKS ARE INCLUDED FOR EASY CUTTING AND SEPARATION.

Fire Door Strips and Discs

These self adhesive signs are slim enough for use on the door jamb, providing an effective and timely reminder that the door should be kept closed as a precaution against the spread of fire.

IN THE KNOW

Regulations require employers to ensure that safety signs are provided (or are in place) and maintained in circumstances where there is a significant risk to health and safety that has not been removed or controlled by other methods. This is only appropriate where use of a sign can further reduce the risk.

SITE SURVEYS

NEED A SITE SURVEY?

A SITE SURVEY IS ADVISABLE IF YOU ARE UNSURE OF YOUR LEGAL OBLIGATIONS OR HAVE BEEN NOTIFIED BY A REGULATORY BODY THAT YOUR CURRENT SIGNAGE IS NOT ADEQUATE.

TO FIND OUT HOW SITE SURVEYS CAN HELP YOUR BUSINESS PLEASE CONTACT OUR SALES TEAM.

10 PACK

This image means this signs comes in a multiple pack of 10.

Hand Sanitiser Boards

Encourage staff, customers and visitors to sanitiser their hands. These wall mounted hand sanitising stations offer a visual reminder to wash / sanitise hands and also give guidance on best practice for hand sanitising techniques. Designed to hold sanitising Gel dispensers, our stations can be supplied as the board only or with either automatic or manual dispensers.

Available in two different colours. All 300 x 400mm boards come complete with wall fixings.

NO SMOKING AND PROHIBITION

What are they

Prohibition signs indicate a course of action which is forbidden. These include signs that can indicate an action to be prevented (no smoking or no mobile phones), or the prohibition of movement such as no entry.

Defining characteristics

A red circular band with a white border and a red crossbar angled across it. A black symbol should be placed centrally with the red crossbar in front of the symbol to indicate that the action is prohibited. Any supplementary text should be in white on a red background.

When to use them

Prohibition signs should fixed on or near the relevant area to which the message refers, or in a position of entry to an area to which the message pertains.

ARE YOUR ISO SYMBOLS CORRECT?

As of January 2013 BS EN ISO 7010 came into effect and many safety sign symbols were updated.

Are yours up to date?

Custom Design
by **Spectrum** Services

OUR SIGN MANUFACTURING TEAM HAVE MANY YEARS OF EXPERIENCE DESIGNING, PRODUCING AND INSTALLING SIGNAGE.

Our sign manufacturing team have many years of experience designing, producing and installing safety signs and stencils worldwide. From the smallest one -off vinyl sign to large hoarding boards and larger print runs of many thousands, we can be depended upon to provide a fast and efficient service.

If you have a specific requirement for your signs, we can work closely with you to provide a design service or alternatively you can send us your own artwork. The diversity of our production facilities is second to none, why not give us a call and see how we can help you.

HAZARD WARNING

What are they

A Hazard Warning sign is used to inform of a nearby hazard which could pose a risk to health or wellbeing. These include signs warning of electrical threats, flammable materials or wet floors that pose a risk of slipping.

Defining characteristics

A yellow triangle with a black border and a suitable symbol placed centrally on the triangle. The symbol should be in black, and any supplementary text should be in black on a yellow background. There should be a white border around the triangle.

When to use them

A Hazard safety sign should be used to warn of a hazard to health or wellbeing if that hazard cannot be controlled by any other means. The sign should be placed in a visible location on or near the hazard, or in a position of entry to an area to which the hazard is located.

Things to consider

Provision must be made to minimise any risk within the workplace, and the use of a safety sign should not be used as the sole factor in reducing this risk. For example, if there is a risk of falling then physical modifications should be put in place to prevent this occurring in addition the use of a safety sign to warn of this hazard.

ARE YOUR ISO SYMBOLS CORRECT?

As of January 2013 BS EN ISO 7010 came into effect and many safety sign symbols were updated.

Are yours up to date?

IN THE KNOW

Since 1st March 2000 businesses operating a CCTV system must comply with the Data Protection Act 1998. This means that individuals are able to exercise their rights under the act and ***'appropriately sized signs should be placed in and around areas where CCTV cameras are to be located'.***

The signs should ***'identify the owner/operator of the system and the purpose for which the data may be used'.*** If the correct signs are not used, businesses will be in breach of the law and a counter claim may be launched when CCTV evidence is used in a prosecution.

TAKTYLE BRAILLE SIGNS

What is Taktyle®?

Taktyle® is the leading brand of Braille signs, making them the preferred choice wherever Braille signs are specified. The Taktyle® brand was created in 1994 and has worked with the Royal National Institute for the Blind, Centre for Accessible Environments, Sensory Advisory Council, School for the Visually Impaired, Resource Centres and Home for the Elderly. The cumulation of this has been the production of a 'definitive design' to meet the demands for all these sectors.

Why is the Taktyle® range different?

These signs feature Braille and in addition we raise the pictogram and put a raised border around the sign (where possible), providing tactile additions for those who are visually impaired, but have not learned Braille. In addition to this, for non-safety sign colours we feature 2 main colours, this ensures that whatever the colour background the signs are put onto there is a contrasting colour available.

Can you make bespoke Taktyle Signage?

Although we offer a wide range of Fire Safety, Prohibition, Mandatory, Hazard and General Architectural Signs within the Taktyle range. Our inhouse manufacturing capability enables us to manufacture custom signs, made to your individual requirements. Simply contact us to discuss your requirements.

What's the best location for Taktyle Signage?

It is essential that Taktyle signs are accessible to touch and are positioned at a consistent height around any building, and working to the disability act to accommodate wheelchair users. Signage needs to stand out clearly in any given environment, so using contrasting colours against wall backgrounds is also important.

THE DISABILITY DISCRIMINATION ACT 1996 (DDA)

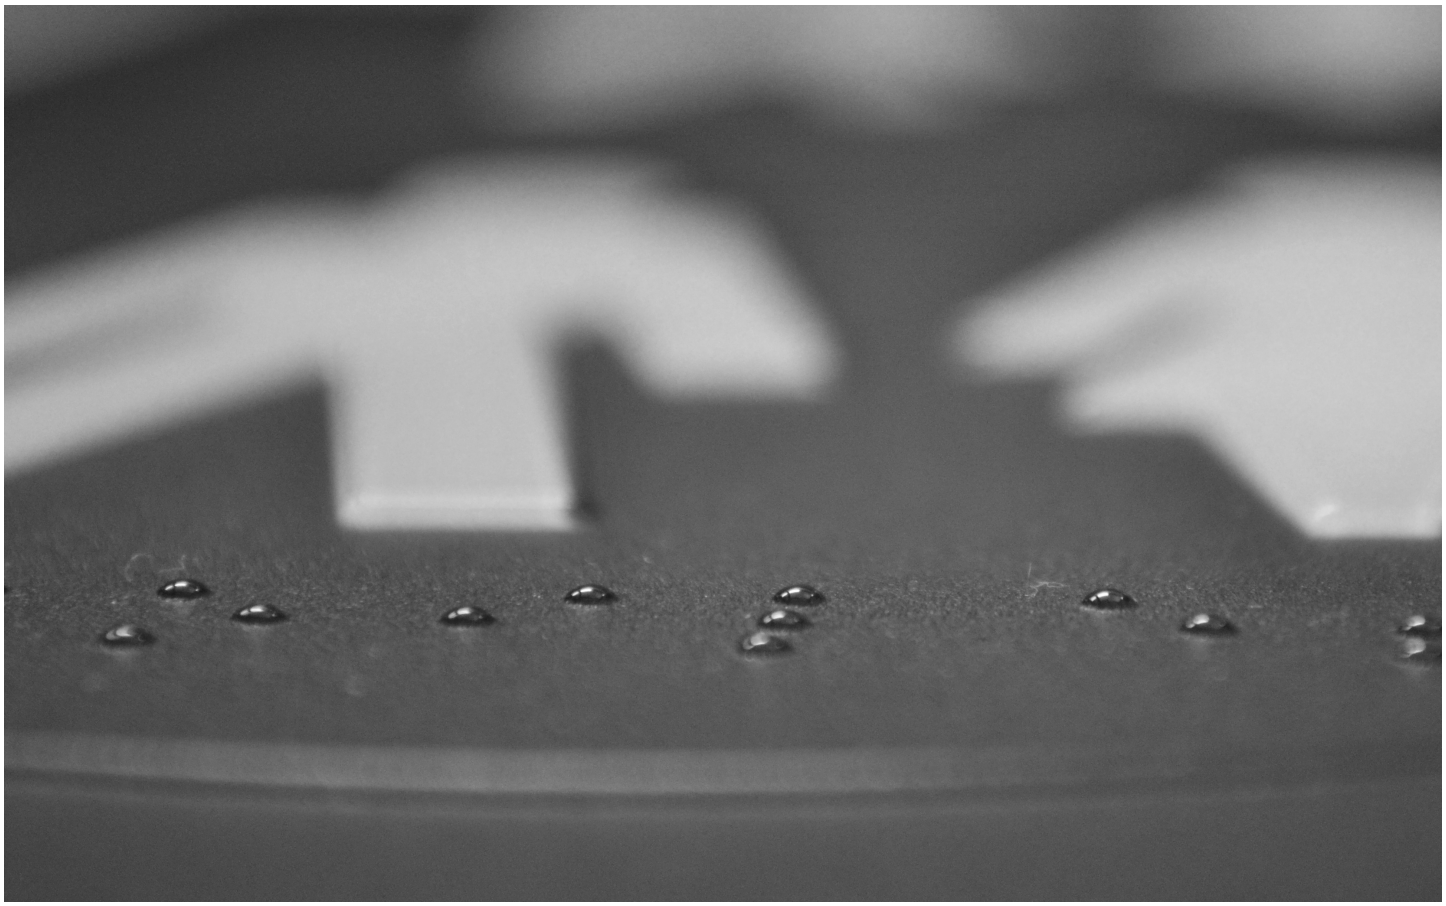
On the 1st October 2004 the Government implemented Part III of the Disability Discrimination Act. Part III of the act applies to any person, organisation or entity which is concerned with the provision in the United Kingdom of services (including goods and facilities) to the public or a section of the public.

This will mean that 'reasonable adjustments' in relation to the physical features of their premises must be made to overcome physical barriers to access. Taktyle signs are often included in these adjustments.

IN THE KNOW

According to the (RNIB), there are more than 2 million people in the UK living with sight loss and of these there are around 350k people registered blind or partially sited. There is also an estimate of the number of people with sight loss is expected to rise to 2.7mil by 2030.

(*Source: RNIB)



Signs for the visually impaired

- *Made from moulded matt finish plastic to prevent reflections.*
- *Patented locating ring – guides the hand to the centre where the information can easily be found.*
- *Smooth contour lettering and pictograms.*
- *Self Adhesive backing for instant fixing.*
- *One piece die-moulded construction provides high quality at a low cost.*
- *Light and dark colour backgrounds available to highlight colour contrast of background walls.*

IN THE KNOW

Our high intensity photoluminescent Taktyle Braille signs have been tested to DIN 67510 Part 1 - 4 specification, which exceeds international standard for flammability, smoke and toxicity.

These signs are reverse printed on moulded matt finish plastic to prevent reflection. The patented locating ring guides the hand to the centre where the information can easily be found.

The one piece die-moulded construction ensures that the raised lettering and images have smooth contours and do not run the risk of dropping out or being damaged from persistent use.

Example of how our photoluminescent signs react in different lighting conditions.

Fire Extinguishers and Equipment

The Safety Signs and Signals Regulations 1996 state that non-automatic fire fighting equipment should be marked with an appropriate permanent sign.

Finger Plates

Taktyle finger plate signs are ideal for placing next to entrances or onto doors to give both safety and directional information.

Reverse printed for lasting image quality even when used as a finger plate, the Braille lettering on the sign allows the message to be read by partially sighted persons. Each sign comes with a self adhesive backing for instant fixing.

General Information and Wayfinding

Our range of Taktyle information and wayfinding signs has been manufactured in two colour schemes, a white background with black text and icons or a blue background with white text and icons. This ensures that regardless of the background colour a contrasting sign option is always available, aiding the visually impaired to locate the sign.

The following signs are available in:

Blue with white text and icons

White with black text and icons

PHOTOLUMINESCENT

What are they

Our photoluminescent signs consist of a selection of our health and safety signs which are printed on a material that glows in the dark. This type of sign is often considered as an added benefit. In the light they perform like a standard sign but if there is an incident and the lights go out they remain visible for a period of time, allowing the message on the sign to be read in darkness.

Defining characteristics

Photoluminescent signs are a change in material rather than a change in sign message type, and therefore the basic characteristics of the sign (colours and message type) remain the same as their non-photoluminescent counterparts – Safe Condition, Mandatory etc. Photoluminescent signs require no power to light up, however they must be 'charged up' by natural or artificial light. Once the light goes out, the signs will glow for a period of time, the exact length of which depends upon the grade of material and the amount of light the sign has received prior to activation.

Our signs are manufactured on P.S.P.A Class B material, which is brighter than the standard Class A product commonly used in many photoluminescent safety signs, and can glow for up to 10 hours once fully charged. It has been tested to DIN67510 Part 1 – 4 for afterglow performance which exceeds the international standard for flammability, smoke and toxicity.

When to use them

Although there is no legal requirement to use photoluminescent versions of safety signs, the Fire Exit options are commonly requested as part of a comprehensive safety way guidance system (SWGS) in conjunction with photoluminescent wall strips and floor signage.

Photoluminescent versions of other types of signs can ensure that fire alarms or fire fighting equipment can still be located even in cases of poor lighting, smoke or lack of power.

In the event of a fire or emergency, the visibility of standard emergency signs can often be impaired by poor lighting, smoke or even lack of power. In these cases our Photoluminescent signs can provide an effective solution.

- High intensity flexible Vinyl or 1.3mm rigid material options.
- P.S.P.A Class B material - brighter compared to the standard Class A product usually used in safety signs.
- Tested to DIN 67510 Part 1 - 4 for afterglow performance which exceeds international standard for flammability, smoke and toxicity.
- Once fully charged will glow for over 10 hours.
- Visible even in complete darkness.
- UV resistant - suitable for internal and external use.
- Factory applied self adhesive backing.

Class 'C' options - Available on request

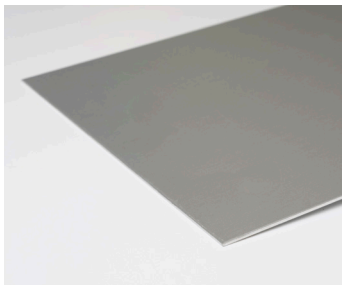
INTERIOR SIGNS

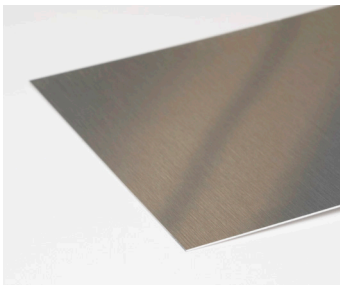
A range of signs comprising of our metal effect laminates and real metal, suitable for interior use.

Our interior signs are manufactured on an aluminium laminate, providing a prestige finish with ease of use but without the cost of thicker full metal signs.



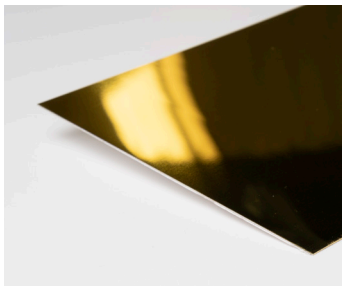
Satin Anodised Aluminium

These real metal signs provide a hard wearing and prestigious method of displaying safety and access information.



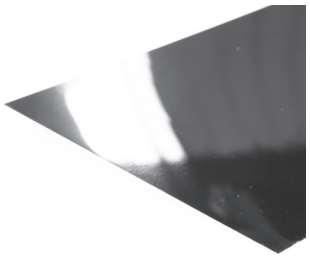
Stainless Steel Effect Laminate

An aluminium laminate in a metallic silver colour with a subtle brushed finished, similar to stainless steel with a self adhesive back.



Polished Gold Effect Laminate

A metallic laminate with a gold coloured mirror-like finish and self adhesive back.



Polished Chrome Effect Laminate

An aluminium laminate with a polished mirror-like finish and a self adhesive back.

Not suitable for exterior use.

SAFETY POSTERS

What are Health and Safety Posters?

They are an effective way to ensure the constant communication of vital health and safety information. Designed to display the information in a concise and easy to read format they help ensure that customers, employees and visitors are reminded of safe practices and informed of risk factors.

Why are they important?

The use of relevant Heath and Safety poster can increase knowledge, change attitudes and alter behaviours. By conveying appropriate information in the correct location and at the correct time, both general guidance and important safety information can be imparted when needed.

Where should they be displayed?

As a general rule, they should be displayed in a prominent location which is available to all employees, but the ideal location of the poster depends upon the message which is to be conveyed.

What posters do I need to display?

As with Health and Safety signs, the exact posters you need to display depend upon the type of business, the services you supply and the hazards or procedures you wish to warn about. Relevant across all industries would be the Health and Safety Law poster, general Health and Safety or Fire Safety posters, with other industries choosing more specific variations to better reflect the hazards they would encounter.

IN THE KNOW

The Health and Safety Information for Employees Regulations 1989, requires the Health and Safety Law poster to be displayed in all business premises.

The Health and Safety law poster tells employees what they and their employers need to do in simple terms.

Recycling Signs

Recycling Signs 98
Recycling Aisle Sacks 99

RECYCLING SIGNS

Workplaces create a significant amount of waste that can be recycled.

Recycling is an excellent way of saving energy, reducing carbon emissions and reducing the amount of waste going to landfill. It is also an essential component in achieving environmental standards such as ISO 14001. Employees should be encouraged to recycle and employers should set clear guidelines.

Maintaining high standards of recycling at work does not have to be difficult, but identifying what to recycle and putting bins and signs in place will make it easy and help to encourage employees to recycle.

Where to start

- *Perform a waste assessment of the types of waste generated by different departments / functions in the business.*
- *Identify the type and size of the recycling bin needed in key areas*
- *Position bins and signage*
- *Communicate and train employees on recycling policy and procedure*

What to recycle

Recycling Signs

Designed to make it quick and easy to see exactly what goes where.
The symbols, clear lettering and distinctive colours allow anyone to check at a glance and recycle appropriately.

Available in:
Self Adhesive Vinyl or Rigid PVC and suitable for both indoor and outdoor use.

Recycling Aisle Sacks

Easily segregate waste in a warehouse with the use of our industrial grade aisle sacks. Designed to be attached to the end of racking aisles with stainless steel hooks (***supplied***).

Each sack is manufactured from industrial strength waterproof polyester, double-stitched for strength and durability. The sack incorporates a top flap with Velcro fixing strips, allowing the contents to be secured when full for transportation. The three handle straps incorporated into the sides and the bottom allow for easy relocation and emptying.

Dimensions: 920 x 1000mm (WxH)
Capacity: 160 litres (approx)

Description	Code
General Waste	RSF001
Mixed Paper & Card	RSF002
Cardboard	RSF003
Plastic Only	RSF004
Shrink Wrap	RSF005
Mixed Recycling	RSF007
'Blank'	RSF006
Spare 'S' Hooks **(Pack of 2)**	RSF100

Top Flap

The integrated top flap covers the contents and helps prevent waste from spilling out when being transported. With two Velcro strips on the flap and one corresponding strip on the main body, this allows for two fixing points depending on how full the sack is.

Eyelets

Four eyelets providing multiple fixing options.

Stitching

Double stitched for strength.

Hooks

Supplied with two stainless steel 'S' hooks

A-BOARDS

What is an A-Board?

An A-Board is a double-sided standing sign that is commonly used to convey a warning message about a temporary hazard. A-Boards provide the perfect lightweight portable sign that can be positioned where required and removed after use.

Why do I need an A-Board?

It's an employers responsibility to warn employees and members of the public of any potential hazards. If you fail to warn people properly of a potential hazard in which an individual then experiences harm the organisation can then face legal proceedings. Where a temporary potential hazard occurs such as wet floor, A-Boards are the perfect way to communicate the warning until the hazard can be resolved.

What different kinds of A-Boards are there?

Manufactured from polypropylene this durable A-Board is designed to help reduce the risk of accidents or injuries occurring by highlighting temporary hazards. This double-sided A-Board is lightweight and is easily transportable with its integral carry handle.

Economy A-Boards are manufactured from 4mm Correx board providing a lightweight and cost-effective temporary option. Your own choice of adhesive sign can be added to either side of the A-Board making it extremely versatile.

A-Boards are commonly used with hazard warning messages, however they can be used for a number of messages where a temporary instruction or communication is required. Our custom A-Board service is ideal for printing your own message or adding your logo / branding.

IN THE KNOW

Slip incidents are extremely common and result in severe to permanent injuries.

The majority of slip accidents take place in the workplace or public areas and can be caused from ice, snow, water, oil and debris with the most common being from wet floor, spills and leaks.

Need a Site Survey?

By law the correct safety signage should be displayed in the appropriate locations and to current legal standards. A Site Survey is advisable if you are unsure of your legal obligations or have been notified by a regulatory body that your current signage is not adequate.

- Site Surveys identify the signs you need, including size, positioning and materials, as well as any bespoke sign manufacturing service needs.
- Site Surveys also provide advice on ensuring the safety of you and your staff, including Lockout Tagout and Asset Management.

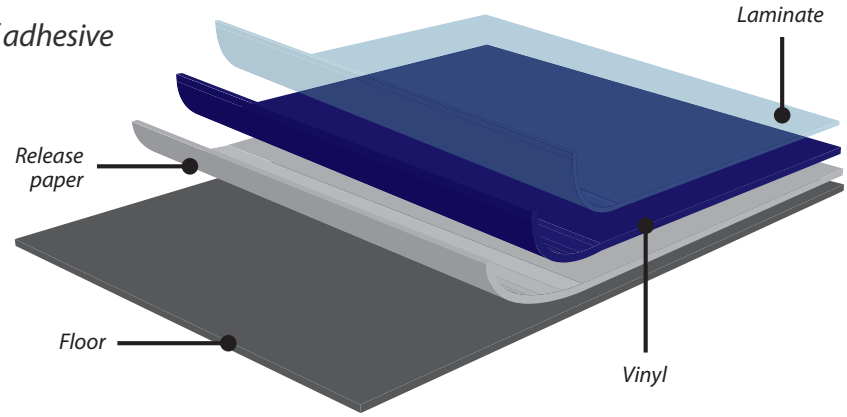
FLOOR MARKINGS

Floor graphics and markings provide safety, informational or directional information at specific locations, often in areas where there is not always an appropriate place to site a standard sign.

Materials and Specification

Our floor graphics are digitally printed onto self adhesive vinyl with a permanent adhesive on the reverse. The graphic is then laminated with a clear matt embossed PVC laminate, which is certified to R9 grade for slip resistance. These signs should be applied to sealed flat surfaces such as laminates, painted or varnished floors or whole tiles, and are suitable for dry indoor locations.



A higher specification (R11) is suitable for outdoor conditions and is available on request, please ask for details.

Application and Use

1) *Locate the area where the graphic is to be placed, ensure the surface is suitable for the graphic as rough or porous surfaces are not suitable.*

2) *Clean the surface if required, it should be a sealed flat surface, clean from dust, oils or other contaminates.*

3) *Check that the graphic is centred properly and facing the correct direction (if applicable). Peel off a small strip of the release paper and stick it down to the surface.*

4) *Gently pull away the rest of the release paper, closely following this removal by pushing the floor graphic down, using a soft flat tool wipe from side to side to ensure no bubbles are trapped underneath the graphic.*

*Please note: We recommend that you test the suitability of this product before use and that a regular check is made on all floor graphics. Worn, torn or otherwise damaged floor graphics should be removed and replaced.**

**We cannot accept any responsibility for accidents to persons or damaged caused by the use of these products.*

Floor Graphics

Our floor graphics will adhere to most smooth, clean flat surfaces and will provide a durable long lasting safety message. Each sign is backed with a high strength adhesive and has a hard wearing non-slip, non-abrasive lamination on the face.

IN THE KNOW

Workplace Regulations include requirements for indicating traffic routes within workplaces where necessary for reasons of health and safety.

Part V of Schedule 1 of the Regulations requires the markings to take the form of continuous lines, taking into account the colour of the ground. Clearly defined traffic routes or safe systems of work (possibly including the use of banksmen to direct traffic) to help meet general duties under the HSW Act.

Photoluminescent Tape and Floor Markings

Our photoluminescent tape is ideal for creating clear, easy to use way finding systems. Exceeds PSPA Class B for longevity and brightness.

STENCILS

What are stencils?

Stencils are specially modified flexible polyester with a pattern or letters cut out. When the stencil is laid onto a substrate, paint is applied to the cut-out area, when the stencil is removed the paint remains in the shape of the cut-out area.

Paint is usually applied using a spray or roller, as this has less chance of moving the stencil during application.

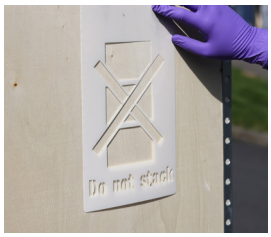
Why use a stencil instead of a sign?

Stencils can be re-used multiple times and can provide a substantial cost saving compared to traditional signage. A stencil can be placed on virtually any surface, including ones where adhesive signs would not usually adhere, and the simple method of application ensures that almost anyone can apply one with a small amount of preparation.

Although stencils can be obtained as a complete message, you can also create your own messages by using the letter and number packs to provide the ultimate versatility.

How to use a stencil

1) *Choose an area to be place the stencil, check that it is dry, centred and facing the correct direction.*
2) *Place the stencil onto the surface and hold down the edges using a low-tack adhesive tape. If creating a message with individual letters / numbers, use the marks etched into the stencil to ensure they are lined up correctly.*
3) *Try to ensure the stencil is flat to the surface, as any raised parts will allow the paint to seep under the edge and result in a less sharp edge. Depending on your paint application method, consider adding more tape around the outside of the stencil to avoid overspray.*
4) *Apply your paint to the stencil, taking care not to overspray the area. Correct paint selection is important to ensure adhesion but also to prevent seepage. Remove the stencil whilst the paint is still wet to prevent the stencil being stuck to the substrate.*
5) *Clean the stencil with the appropriate solution suitable for the paint used. Correct cleaning will result in a longer lifespan of the stencil.*



Custom Design

Stencils

Our stencils are manufactured from a specially modified flexible polyester. Each stencil is laser cut for accuracy, with a transparent anti-glare finish and is scratch resistant. If properly cared for, our stencils can be used time and again, making them a cost effective method of producing your own sign or notice.

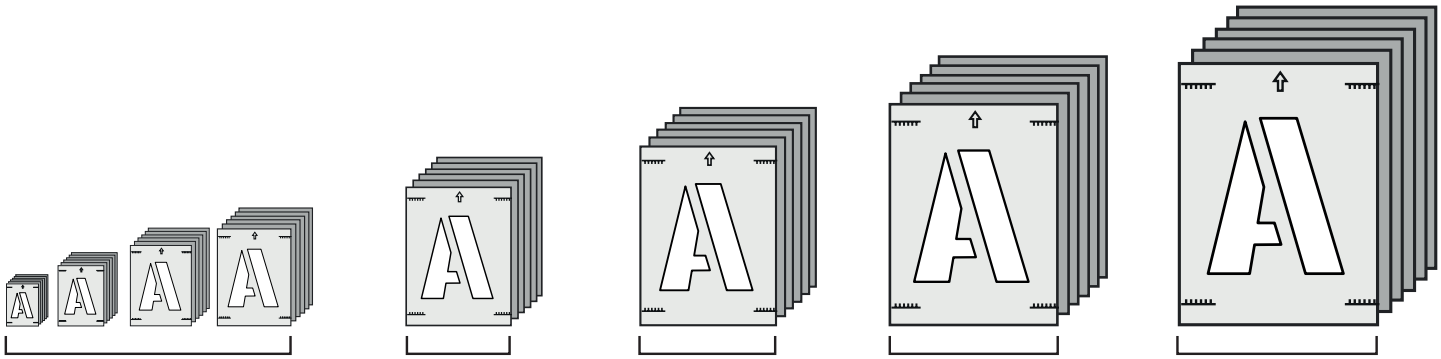
Stencil Letter and Number Kits

Our laser cut stencil packs are an ideal way to create your own message.

Each letter comes on a separate sheet of polyester, etched spacer marks on each corner allow you to align accurately to the next character.

NOTE: SIZE REFERS TO THE CHARACTER HEIGHT, WITH THE WIDTH VARYING DEPENDANT ON THE INDIVIDUAL CHARACTER.



A-Z 0-9	25mm	9403
A-Z 0-9	50mm	9404
A-Z 0-9	75mm	9405
A-Z 0-9	100mm	9406
0-9 A-Z	150mm	9410 9411
0-9 A-Z	200mm	9414 9415
0-9 A-Z	250mm	9418 9419
0-9 A-Z	300mm	9416 9417

Industrial Stencil Spray

Specifically formulated for stencilling, this spray produces long lasting, fast drying and highly visible lettering with a brightly coloured, durable finish.

This product is suitable for use on a variety of materials including wood, metal, glass, plastics, ceramics and many more.

Material Key

Polished Gold Effect

This is a highly polished Aluminium alloy which has been coloured, chemically anodised and finished with a Polyester lacquer. Giving a smooth polished 'gold effect' look without the cost of a solid metal. Self adhesive backing.

Polished Chrome Effect

Created from the same base as the polished gold but coloured silver, it gives a chrome like mirror finish. Suitable for interior use only. Self adhesive backing.

Photoluminescent Vinyl

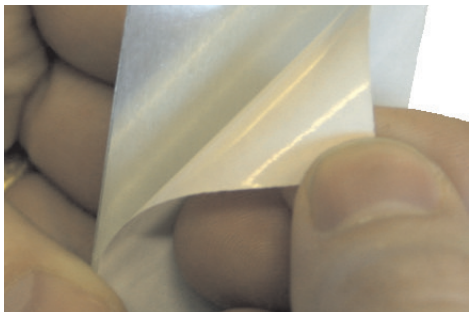
Our Photoluminescent Vinyl conforms to the P.S.P.A. Class 1 classification for brightness and longevity. Self adhesive backing.

Stencil

Our stencils are manufactured from a specially treated flexible Polyester film.

Vinyls

Our Vinyl characters are manufactured from a 75 micron Vinyl with a gloss finish and permanent adhesive. They have a high initial tack for ease of fixing and up to 5 years expected life span.



Self adhesive backing on:
Polished Gold effect, Chrome effect Photoluminescent and Black on Yellow Vinyl.

Cut out Vinyl letters and numbers, with self adhesive backing.

FIND OUR FULL MATERIAL KEY ON PAGE 12

EV Charging Stencils

These large stencils are digitally cut from laminated vinyl, providing a tough and reusable finish.
Each sign can be used with or without the adhesive on the reverse.

Pipeline Identification

Pipeline Flow Markers *120*
Pipeline Identification Tape *122*

PIPELINE IDENTIFICATION

What is Pipeline Identification?

Pipeline Identification is used for identifying the contents of pipes. Containers, tanks and vessels used in the workplace for hazardous chemical substances or mixtures, and the visible pipes in the workplace containing or transporting hazardous substances and mixtures, should be labelled showing the relevant contents. Pipeline flow markers have arrowheads at either end, one of which can be removed to indicate the direction of flow.

Why is Pipeline Identification Important?

Unidentified pipes can provide a serious hazard to both health and property. When repairs or maintenance is required, the contents and flow direction is one of the first questions that need to be answered.

The Health and Safety (Safety Signs and Signals) Regulations 1996 have made it a legal requirement that employers mark and identify hazardous materials in visible pipework.

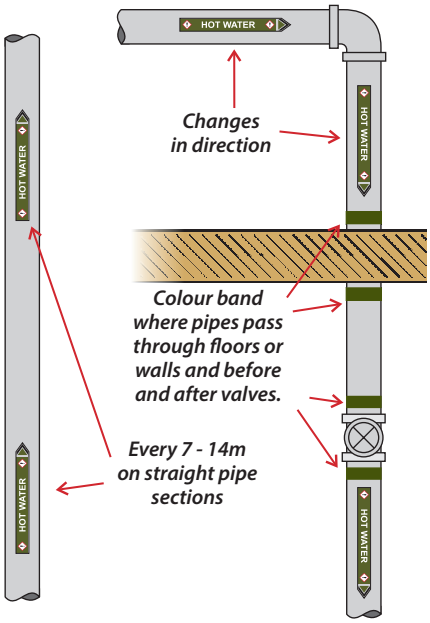
Why Spectrum

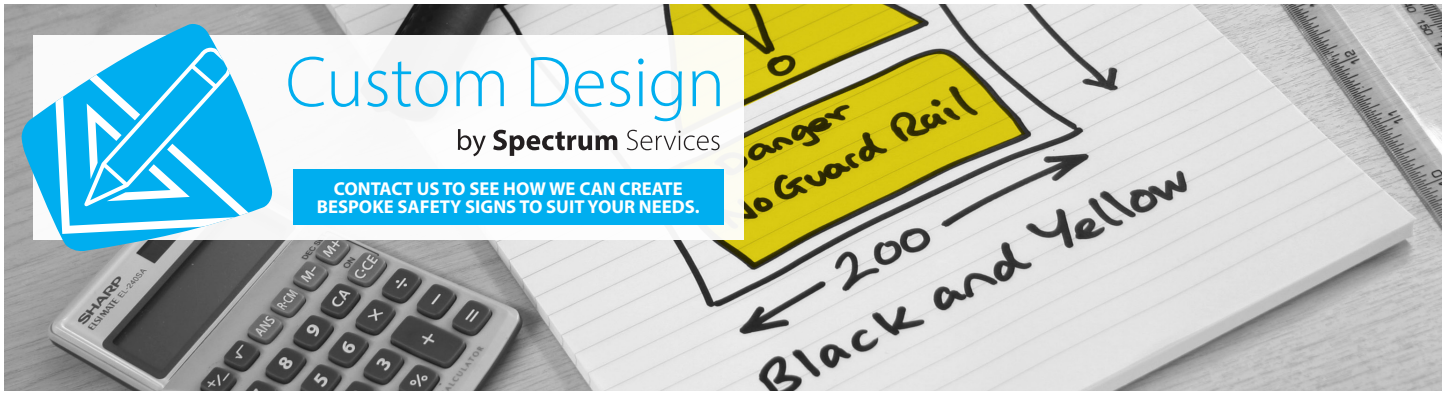
Our products conform to BS 1710, which specifies the colours and other information that should be used to identify pipes, ducts and electrical conduits. This standard itself references the appropriate colours to be used as per BS 4800, as well as some safety colours as listed detailed below.

Basic Identification Colours

The background colours of our pipe markers and tapes all conform to the recommendations specified in BS 1710 2014 Identification of Pipelines and Services, as shown below:

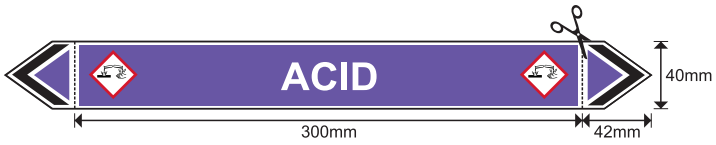
Pipe Contents	Colour	BS 4800	Example
Air	Light Blue	20 E 51	
Water	Green	12 D 45	
Steam	Silver Grey	10 A 03	
Electricity	Orange	06 E 51	
Fire	Red	04 E 53	
Gases	Yellow Ochre	08 C 35	
Acid and Alkali	Violet	22 C 37	
Mineral Oils	Brown	06 C 39	
Warning	Yellow	08 E 51	
Fresh Water	Auxiliary Blue	18 E 53	
Other Liquids	Black	00 E 53	





Pipeline Flow Markers

Supplied in packs of 5, our markers have arrowheads at either end to indicate the direction of flow, simply cut off the unneeded arrow and apply marker to the pipe with the arrow pointing in the direction of the flow.



All our markers are manufactured on a highly durable, self adhesive Polyester film, which is then laminated with clear Polyester. This makes it extremely resistant to scratching, chemicals and solvents as well as extremes of temperature.

CONSTRUCTION

The construction industry in the UK is worth well over £100 billion per annum but unfortunately suffers from one of highest rates of injury and death. Health and safety is important in every industry sector, but workplace safety in the construction industry is often considered more important due to the severity of injuries which are inflicted.

In recent times health and safety is being positioned at the core of all operations and training, with the use of safety signs being used to help create awareness of risk and preventing of accidents.

Safety Signs are a legal requirement and construction site safety signs deliver important information warning you of hazards or requirements that must be obeyed. It is the responsibility of the people who run the site to ensure that there is sufficient safety signs in full and clear view for workers, visitors and members of the public.

Our extensive range of signs and noticeboards are available ex-stock, with customisation available to ensure any risk or message can be communicated effectively.

IN THE KNOW

"Construction is the third most dangerous industry according to the UK's health and safety executive's (HSE), costing the construction industry over £1bn."

(SOURCE – HSE)

Site Safety Notices

With the numerous dangers found on modern construction sites, it has become harder and harder for a site safety manager to effectively demonstrate, the relevant safety procedures and methods of work which is a lawful requirement.

These signs have been specifically designed to provide safety managers with the information they need to display on one sign. We can also create bespoke site safety signs with specific logos or company branding.

IN THE KNOW

Agriculture and construction are some of the most dangerous sectors to work in, with the most common cause of a fatal injury being falling from height.

Fire Safety and Safe Condition

ROAD AND TRAFFIC SIGNS

Road and Traffic signs are commonly erected at the side or above roads to give instructions or provide information to road users. These are generally separated into permanent and temporary categories.

All permanent road signs must be manufactured by an audited and registered company by law, and have the appropriate labelling attached to the reverse. As manufacturers we are fully accredited to the relevant standards.

The UKCA (UK Conformity Assessed) marking is a new UK product marking that is used for goods being placed on the market in Great Britain (England, Wales and Scotland). It covers most goods which previously required the CE marking.

All permanent roads signs manufactured for installation within Great Britain will be supplied with a UKCA mark, whereas signs destined for the European market will have the CE Mark.

Materials:

Mild Steel Sheet

A lightweight mild steel sheet with weather resistant properties.

Due to it being light weight it is not as durable as ACP or Aluminium, this combined with its low cost usually means it is used as temporary signage in a standing frame.

ACP

ACP is an Aluminium composite material made from two lightweight sheets of Aluminium with a solid black thermoplastic core.

Light weight but extremely strong, ideal for outdoor use due to its excellent resistance to adverse weather and zero scrap value.

Other

We can also manufacture signs on different materials to suit specific applications.

These include solid aluminium plate, recycled plastic, or roll-up temporary signs or non-reflective PVC.

Class Ref 1

Sometimes referred to as Engineering grade, this has a lower grade of retro-reflectivity and is commonly used on temporary road signage.

Class Ref 2

This is a high intensity prismatic (HIP) retro-reflective sheet, specifically designed for use on permanent road signs. Engineered to give good reflectivity at all angles critical to the driver and is more durable with a longer lifespan.

Class Ref R3B

This is the highest grade retro-reflective sheet available, and is specified for permanent signs where the ultimate visibility and legibility is required, such as motorway signs. This material is available on request.

Fixings

All our permanent road signs come with the option to have channel riveted horizontally onto the rear of a sign. Channel is a formed strip, to provide fixing anchorage for either anti-rotational clamps or banding (with buckles). Signs come with a suitable number of channel strips, depending on the size of the sign. The larger the sign, the more strips of channel are required.

Please see page 144 for fixings options

UKCA / CE Marked Permanent Road Signs

CLASS REF 2

These Road Signs conform to the Traffic Signs Regulations and General Directions 2002 and BS EN 12899-1:2007 (which has replaced BS 873 Parts 5 and 6).

Manufactured from Aluminium composite which provides excellent strength and durability. Each sign is available with or without channelling on the reverse.

ACP does not have channel - ACPC has channel

IN THE KNOW

THERE ARE 2 MAIN TYPES OF REFLECTIVE FACING FOR ROAD SIGNS.

Class Ref 1 is lower grade and is only used on our temporary road signage.
Class Ref 2 is higher grade and is used on all our permanent road signage.

Custom Design

by **Spectrum** Services

OUR SIGN MANUFACTURING TEAM HAVE MANY YEARS OF EXPERIENCE DESIGNING, PRODUCING AND INSTALLING SIGNAGE.

This is just a small selection of the supplementary signs available, additional custom signs can be made on request. As the size of the text on a supplementary sign is a set parameter, the overall sign size can vary immensely.

If you have a specific requirement for your signs, we can work closely with you to provide a design service or alternatively you can send us your own artwork. The diversity of our production facilities is second to none, why not give us a call and see how we can help you.

Road Sign Fixings and Posts

To be used with road signs that have channel on the reverse.

Manufactured from grey coated mild steel posts for excellent durability with standard 76mm (3") diameter.

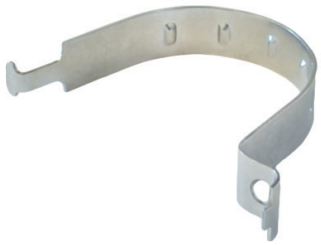
Other sizes available on request.

Description	Code
1.5m Post	13092
1.8m Post	13093
3m Post	13201
Post Cap	13094

Post Clips

Anti-rotational post clips slide into the channel on the back of the road sign and fit around the road post.

Complete with fixings.



Description	Code
50mm dia. Post Clips (pair)	14654
76mm dia. Post Clips (pair)	13095
89mm dia. Post Clips (pair)	14655
114mm dia. Post Clips (pair)	14656

Back to Back Clip

These are used if you need to have two signs mounted on one pole back to back.

Description	Code
76mm Back-to-Back Clip (pair)	14657

Channel Adaptors

Channel adaptors help when unsure about what component to use when attaching a sign on to a signpost, lamppost, bollard or telegraph pole.

Description	Code
Channel Adaptors (ea.)	13096

Banding Straps

Banding straps are similar to an oversized hose clip that passes through a buckle and is then tightened using a standard screwdriver. Ideal for strapping lighter weight signs or Banner Supports to round or irregular shaped posts

Description	Code
Banding Straps (pair)	14034

Temporary Road Signs

Temporary Road Signs are manufactured with Class Ref 1 engineering grade reflective face onto Zintec plate.

Order the material code ZFM for your sign to be pre-set into a stanchion or ZIN for just the sign.

Supplementary Plates

Supplementary Plates are used to provide more specific information about a temporary hazard.
To be used in conjunction with a Temporary Traffic Sign (see page 145) and a stanchion (see page 147).
Please ensure you choose a stanchion with the supplementary plate option.

For signs with a distance, please let us know the required number when ordering.

Grit Bins

Businesses have a responsibility to treat the areas around their premises during winter months to minimise the risk of slips, falls and skidding. Salt and Grit bins provide a safe solution for this, and our Grit bins are a sturdy and prominent offering, providing quick and easy access when required.

COVID RISK MANAGEMENT

Social Distancing has become part of every-day life, and we offer a range of products designed to inform everyone of the measures put in place to keep everyone safe. These guidelines have shaped the way every business operates from instructing employees, visitors, customers and service providers. Social distancing is the new norm, with consumers expecting business to make their safety the top priority.

Signs & Posters

Signs and posters are usually used to provide the socially distancing message at point of entry or at other key points within the environment. They provide a larger platform for more detailed information, such as the correct way to wear a mask or wash your hands.

Freestanding Signs and Banners

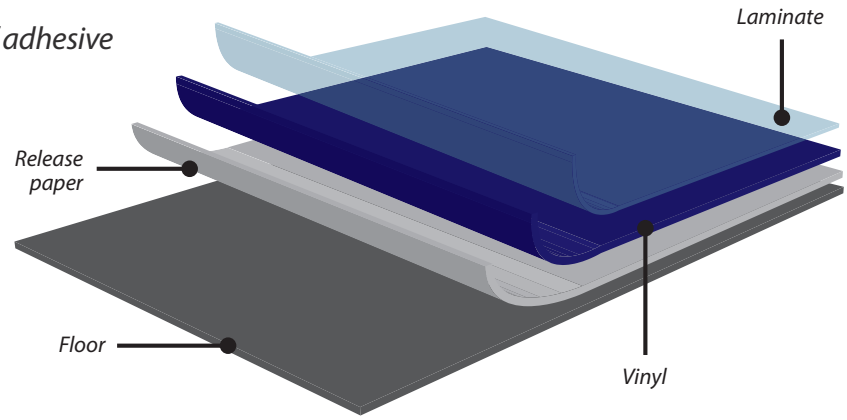
Suitable for temporary or outdoor placement, these products are ideal for fixing to fencing or placing in open areas as a reminder that social distancing is still important even when outdoors.

Floor and Wall Graphics

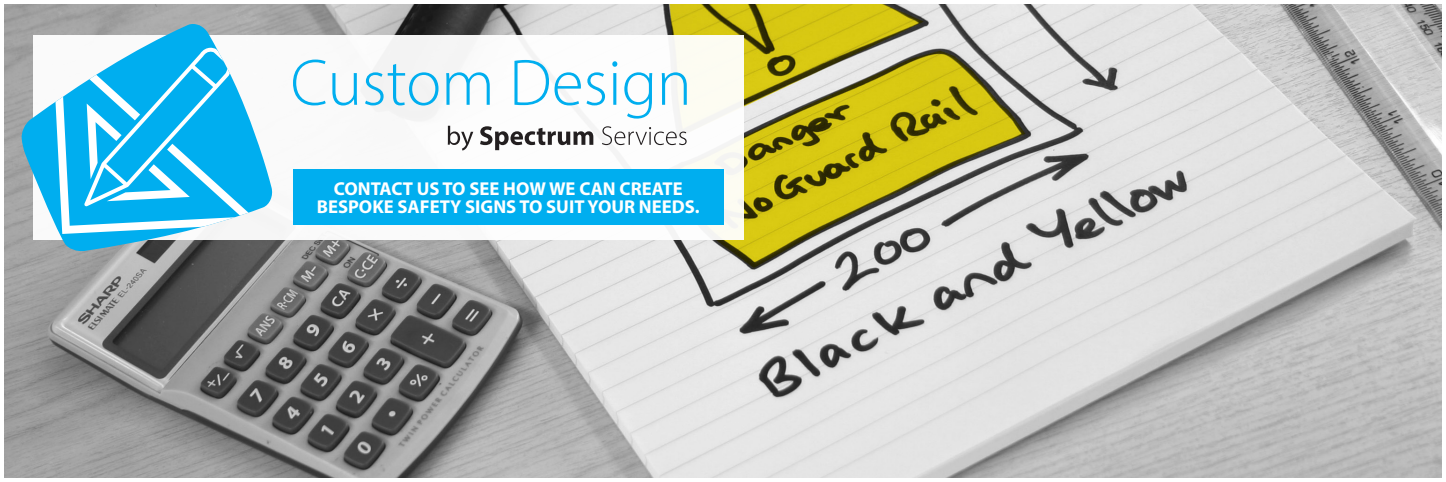
The primary directive of social distancing is the message to keep a safe distance. Our wall graphics are an ideal method of reinforcing this message as they can be placed at the correct distance interval as directed by the latest government information. With a range of colours and designs available, we will have an option to suit all requirements.

Materials and Specification

Our floor graphics are digitally printed onto self adhesive vinyl with a permanent adhesive on the reverse. The graphic is then laminated with a clear matt embossed PVC laminate, which is certified to R9 grade for slip resistance. These signs should be applied to sealed flat surfaces such as laminates, painted or varnished floors or whole tiles, and are suitable for dry indoor locations.



A higher specification (R11) is suitable for outdoor conditions and is available on request, please ask for details.



The following range of signs are a simple way to communicate instructions to employees, visitors, customers or service providers, whether you are in retail, commercial, services, manufacturing, education or any other industry. This signage helps to educate about the need to maintain both a safe distance and hygiene practices by providing simple, clear and easy to follow messages. Our signs are available in a wide range of materials making them quick and easy to install from floor graphics, wall signs and entrance signs. We have developed a range which we know will suit the needs of most premises.

Floor Graphics

Reinforce important social distancing safety measures with these self adhesive floor signs.
Floor graphics are a unique and highly effective tactic for directing / instructing people on a site.

IN THE KNOW

Our floor graphics are printed digitally on self adhesive vinyl and laminated with a matt clear embossed PVC laminate.

The laminate is certified R9 grade for anti-slip.

Each graphic has a permanent adhesive on the reverse and is suitable for dry indoor locations, applied to sealed flat surfaces such as laminates, painted or varnished floors, or whole tiles. An outdoor specification is available on request.
We recommend testing for suitability before use*.

* No responsibility can be accepted for accidents to persons or damage caused on use/removal of products, suitability must be confirmed by customer prior to use.

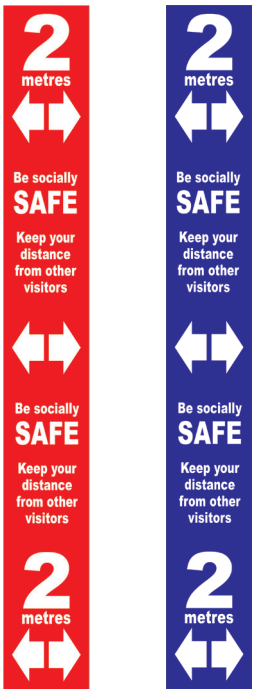
Self Adhesive Floor & Wall Graphics



Used for distancing people from left to right. Can be used at counters or to compartmentalise people down aisles to stop them from standing too close to each other. This is particularly prevalent on aisles where people spend time browsing.

6S Lean Manufacturing

Cleaning Stations	*166*
Multi-purpose frames	*168*
Shadow Board Accessories	*170*
Site Safety Notice Board	*172*
Accident Free Day Signs	*174*

6S LEAN MANUFACTURING

- *6S lean is an adaptable set of tools that can be applied to any system.*
- *6S is easy to adapt for most environments and implemented 6S can lead to a cleaner and less cluttered workspace. Less clutter and more order means employees will always know where to find tools and waste will be eliminated.*
- *6S can also create a more welcoming environment for visitors to your premises.*

SORT

Organisation

Keeping only what is necessary and discarding everything else

SET IN ORDER

Orderliness

Arranging and labelling only necessary items for easy use and return by anyone

SHINE

Cleanliness

Keeping everything in the workplace clean and tidy

STANDARDISE

Standardise clean up

Establishing procedures to ensure repetition of the process.

SUSTAIN

Sustaining the discipline

Making a habit of properly maintaining correct procedures

SAFETY

Implementing strong safety processes

Improve productivity and eliminate waste.

Shadow Boards - Efficiency starts with organisation.

Shadow boards are often used within a manufacturing environment to improve a facilities lean capabilities. The aim is to achieve an organised workplace where tools, supplies and equipment are stored in locations close to work areas.

Shadow boards provide ideal colour coded storage for tools and hygiene equipment for

- *Food processing industries*
- *Engineering*
- *Manufacturing*
- *Production Boards*
- *Cleaning stations*

We offer a selection of pre-designed shadow board options or alternatively our boards can be custom designed and built to meet your specific needs in a choice of wall mounted, free standing or mobile options.

8 WASTES THAT OUR PRODUCTS ELIMINATE

1. *Reduces time searching for tools / equipment.*
2. *Increases life of equipment.*
3. *Helps to ensure correct equipment is used.*
4. *Ensures all tools / equipment is stored safely.*
5. *Frees up space to be used more effectively.*
6. *Clean and organised workplaces increase productivity and reduce accidents.*
7. *Custom made boards can be created for processes where unique tools and equipment are required.*
8. *Establish better standards.*

COLOUR

All Shadow Boards and components are supplied in a range of colours, with blue, red, yellow and green available for immediate delivery. Other colours are available on request. Lead times may vary.

Please contact us for more information.

BLUE	RED	YELLOW	GREEN

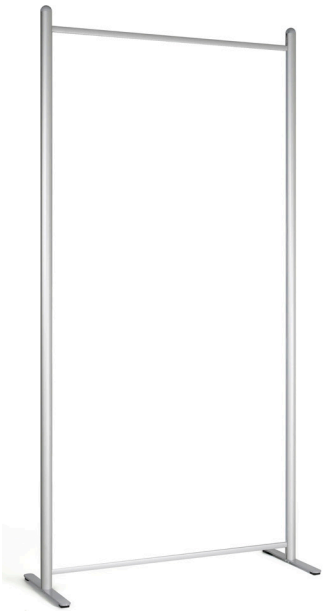
Multi-purpose Frame Option

Manufactured from extruded and anodised aluminium, our multi-purpose frames are an ideal vehicle for displaying your shadowboards. Available with a range of fitting options, you can choose from our range of standard designs or create a bespoke board tailored to your needs.

- ***Extruded anodised aluminium frame***
- ***Dimensions: 2000 x 1000 x 400mm (HxWxD)****
- ***Multiple fitting options possible***
- ***Range of accessories available***

If you require a shadowboard to be used with this stand please use the appropriate code found on page 169.

****Custom sizes and designs available on request***



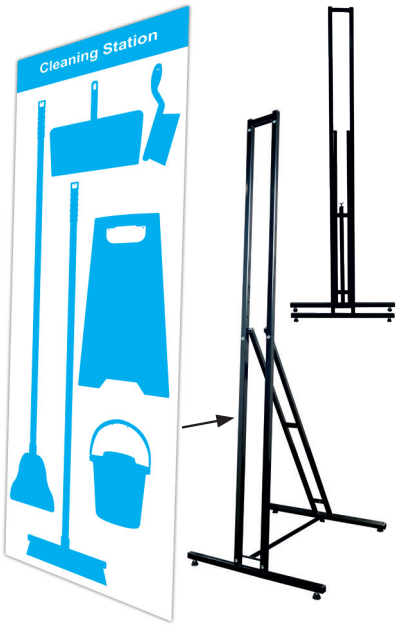
Lean Stand Option

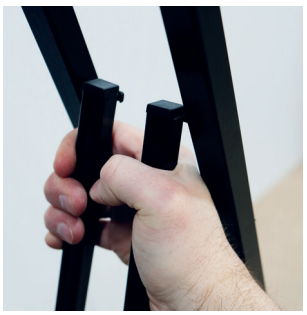
Manufactured from 20mm powder coated mild steel, these stands are ideal for displaying our shadow boards in temporary locations or difficult area's where wall fixing is not an option.

- ***20mm powder coated mild steel box tube***
- ***Adjustable rubber feet – for grip and stability***
- ***Folds flat for storage or transportation***
- ***Adjustable frame allows for 3 different angles of board display***

If you require a shadowboard to be used with this stand please use the appropriate code found on page 166, as the boards have different mounting holes to enable them to be fitted.

Custom sizes and designs available on request





Heavy Duty Trolley Option

Heavy duty trolleys can be supplied for all our Shadow Boards

Other sizes are available to order.
Please contact us for more information and lead times.

Stainless Steel

Stainless Steel tube with fully welded joints, ideal for the food industry.

Powder Coated

Ideal for use when a more economical solution is needed.

Design Options:

Size, food grade, powder coated, castors, stand offs and sealant - all fully customisable on request.

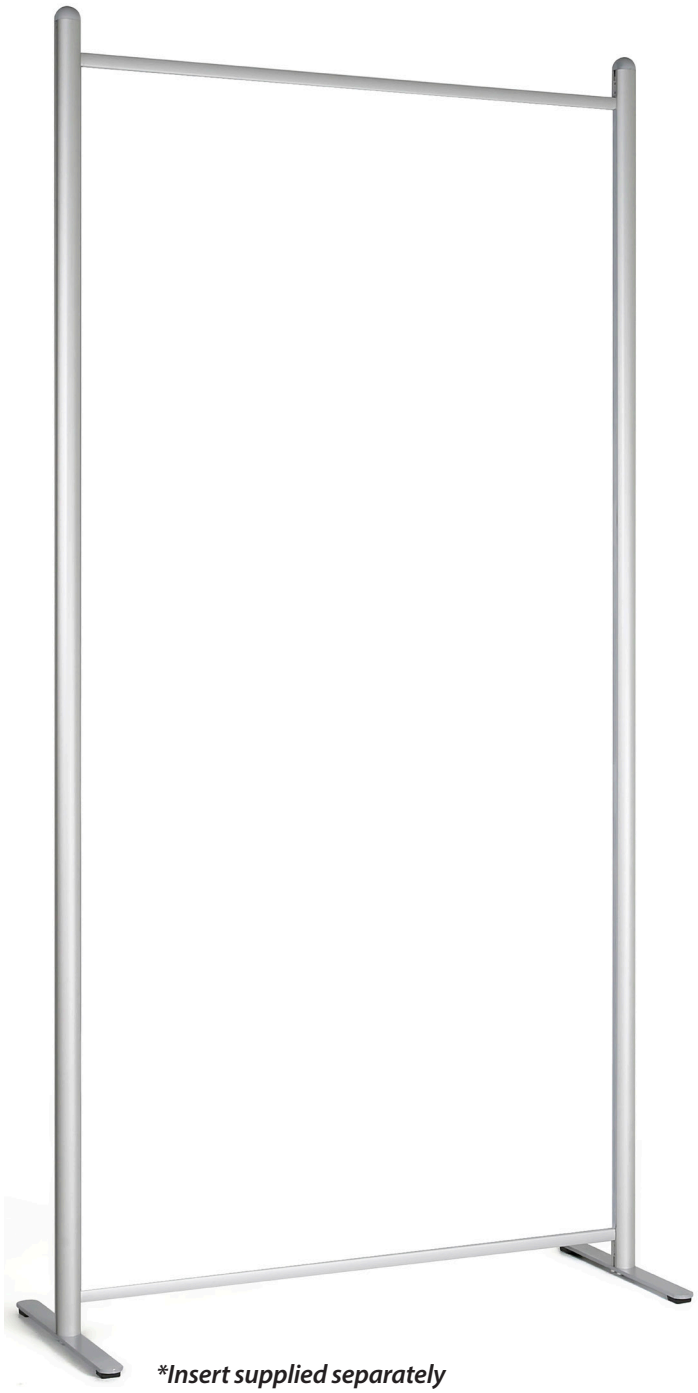
Multi-purpose frames



*Insert supplied separately

These multi-purpose frames can be used for a variety of purposes, simply combine the frame with the board insert of your choice and select your optional accessories to provide you with a high quality portable unit. Manufactured from extruded and anodised aluminium, each panel is 2m high and 1m wide, with 400mm wide feet with integral ground fixing holes. Different heights, widths or panel section sizes are available to order.

When used in combination with our optional accessories, these sections can be converted into temporary wall sections, mobile units on castors or even anchor them to permanent walls. In addition the pivot foot assembly enables sections to bend up to 90° from its partner, and a range of useful accessories allows you to provide hand sanitising or delivery points for pertinent information.

As with all our products, you have the ability to customise these inserts to suit your purpose – be that company branding, bespoke board designs or additional board attachments, please ask for details.

Frame Size: 1000 x 2000mm (WxH)
Window Size: 928 x 1915mm (WxH)

Panel inserts

Alongside the standard 3mm clear acrylic panel insert, you can also choose from foamed PVC or aluminium composite panel, printed and laminated to your specification. Hooks, fixing holes or other modifications can be requested to enable you to mount any equipment you may need.

Custom Display Boards

The flexibility of our Multi-Purpose Frames makes them ideal for personalising to your exact requirements. When used with a composite or foamed PVC panel, they make ideal shadowboards or site safety boards. Alternatively when used with a clear insert they make a great personal or hygiene barrier.

Available with company branding, safety messages or even frosted vinyl decorations, they can even be physically modified for use in constrained spaced or around obstacles.

Speak to one of our team today and see how we can help.

Site Safety Notice Board

Our site safety notice boards are ideal for displaying site notices and emergency information. Our custom sign services also enables us to tailor make your site safety notice board to your requirements to ensure you are setting the right standard for safety on your site.

SEE PAGE 267 FOR DRYWIPE MARKERS

Manufactured on 3mm ACP, pre-drilled and complete with steel stand-off fixings.

Fire Action Station

This station provides pertinent information for fire safety, and a central point of call when dealing with the safety checks and procedures needed for the modern workplace.

Designed for indoor use, the board is laminated to allow details of the fire marshals to be written and updated directly onto the board.

Board dimensions (WxH): 800 x 600mm

Description	Code
First Action Station	SB-BD31

Contents	Code
Wall Fix Literature Holder (A4)	14091
Fire Safety Log Book	14901

First Aid Station A

Designed for indoor use, the board is laminated to allow the first aider details to be written and updated directly onto the board.

Board dimensions (WxH): 800 x 600mm

Description	Code
First Aid Station A	SB-BD42

Contents	Code
First Aid Kit (1-10 Person)	P0250
Wall Fix Literature Holder (A4)	14091
Accident Report Book	14900

First Aid Station B

Designed for indoor use, the board is laminated to allow the first aider details to be written and updated directly onto the board with a drywipe marker.

Board dimensions (WxH): 800 x 1000mm

Description	Code
First Aid Station B	SB-BD43

Contents	Code
First Aid Kit (1-10 Person)	P0250
Wall Fix Literature Holder (A4)	14091
Accident Report Book	14900
Eyewash Station (with 25 pods)	14343

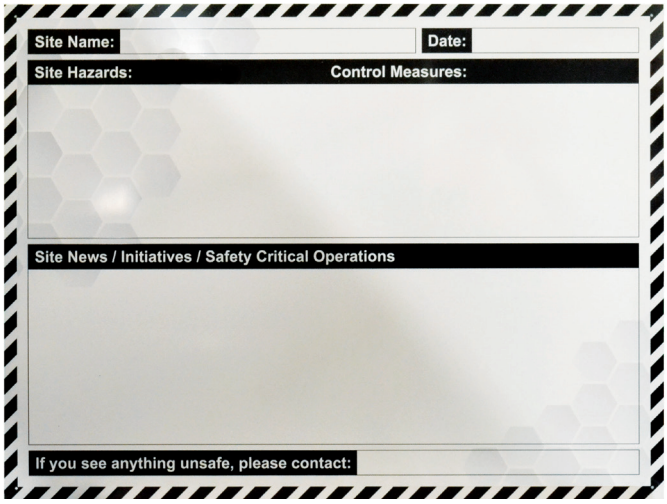
TO ORDER REPLACEMENT EYEWASH PODS USE CODE 14344, SEE PAGE 265

Site Hazard Station

Designed for internal or external use in a sheltered position, this laminated hazard board provides a central point allowing details of unexpected hazards to be identified in a clear and conspicuous place.

By noting issues in this way appropriate measures can be put in place for rectification.

Board dimensions (WxH): 1200 x 900mm



Description	Code
Site Hazard Station	SB-BD50

Site Safety Notice Board A

Designed for internal or external use in a sheltered position, this Site Notice Board presents a central point of storage for the important documentation which is needed on a new site. This board comes complete with 6 pockets mounted to the front, allowing for documentation to be held securely in one place.

Board dimensions (WxH): 2000 x 1200mm

Description	Code
Site Safety Notice Board A	SB-BD60

Contents	Code
Health and Safety Law Poster (A2)	HSE01
Clear Wallet (A4)	14629
Accident Report Book	14900

Site Safety Notice Board B

Designed for internal or external use in a sheltered position, this Site Notice Board point presents a central point to detail safety information for a site. The board includes the Health and Safety Poster, which must be displayed by employers by law, along with details of the first aiders and an accident report book in a fixed wallet. It also has a drywipe finish for adding further information in the 'Notices' section.

Board dimensions (WxH): 1600 x 700mm

Description	Code
Site Safety Notice Board B	SB-BD61

Contents	Code
Health and Safety Law Poster (A2)	HSE01
Clear Wallet (A4)	14629
Accident Report Book	14900

Accident Free Day Signs

Our Accident Free Day Signs are an excellent way to show Health and Safety Incident data.

By displaying an accident free day sign a company is promoting its commitment to safety in the workplace. Studies show that employees who are motivated and happy on the job are less likely to suffer a serious injury and are altogether more productive. Attaining these safety goals ultimately means saving money, increased production and a happy healthy workforce.

All units are suitable for display indoors or outdoors, and is an eye-catching way to highlight data to staff and visitors.

Features & Benefits

- Manufactured in UK
- Fully assembled
- Weather and waterproof
- LED Digital counter
- Remote control operation
- High quality construction
- Ease of installation and servicing
- May be located outdoors
- Highly visible and eye-catching
- Ease of resetting the digital display

Style E - 900 x 1200mm	ADFSign-E

Custom Design

We can help you create custom artwork and implement a consistent message throughout your facility. It could be the idea of making it home safely to see your family, a group weight loss target or the pride of a job well done. Including aspects like built up lettering, LED backlit company logos and bespoke programming to create a unified visual campaign.

- Accident free days / hours
- Production Statistics
- Scrolling Messages
- Time & Temperature
- And more!

Contact us for more information on how we can help bring accident free day boards to your workplace.

LABELS

Labels are an essential ingredient in nearly all modern-day work, providing important safety or procedural information at point of contact. We use quality printing methods and strong label materials to produce a wide range of safety labels including,

- ***Electrical Labels***
- ***PAT Testing Labels***
- ***Quality Control Labels***
- ***Hazardous Substances***
- ***and much more***

In many instances products and methods to be labelled are law. Electrical labelling is most importantly about safety, with correct identification potentially saving injury or, in serious cases life. The main reason for labelling objects is to indicate a danger or an instruction.

Labelling provides a clear picture across many applications which in turn improves safety.

Electrical Labels help to warn of potential hazards and identify if equipment has been tested or requires testing.
This simple measure can decrease the chance of injuries to employees or the public.
Our labels are available in 3 materials, 4 sizes and 5 pack quantities.

We also manufacture electrical safety signs to use along with these labels to show hazard warnings, quality control and prohibited actions, see these from page 54

LOCKOUT TAGOUT

Lockout is a physical method of isolating equipment to prevent it being re-energised or stop the release of any stored energy.

Tagout is a highly visible written warning attached to the locked out device highlighting that the equipment should not be used until the Lockout is removed.

Why Lockout Tagout?

Planned Lockout Tagout Procedures are an effective way of reducing the risks involved when maintaining, cleaning or repairing equipment. Now considered a best practice procedure worldwide, correct implementation can reduce downtime and increase productivity. It helps to ensure worker safety and reduces the risk of employers exposure to liability and prosecution, as well as indirect costs such as repairs to equipment.

How to implement a planned LOTO Programme?

A clearly designed LOTO programme will detail all the necessary steps to ensure equipment energy is safely isolated.

1: Evaluate and Plan
Prepare a written LOTO policy and implementation plan, describing all processes required for a successful hazardous energy control programme.

The policy will describe responsibilities, training, isolation procedures and restoring equipment to normal operation, contractor control, LOTO products, permits to work, etc.

Tip!
We can put you in touch with competent safety professionals to help evaluate and deliver your LOTO Programme.

2: Equipment Appraisal
Identify all equipment requiring energy isolation during maintenance, cleaning or repair activities.

For each item of equipment, gather details of associated energies, isolation points (valves, switches, breakers etc) and the sequence of isolation. Consider environmental factors such as confined spaces, adjacent activities and any essential equipment adaptations. Consideration must also be made for mechanical valves and/or LSS (Life Safety Systems) that are required to remain ON for safety purposes during these activities. Specific "On State" isolation must be included as required and possible downstream effects of same must be risk assessed and documented.

3: Equipment Specific Procedures
Use equipment appraisal information to develop equipment specific procedures. This activity also helps define lockout product requirements for each item of equipment or work area. Once proven through testing, equipment specific procedures should be posted alongside the equipment.

4: Training, Procedure Awareness and Lockout / Tagout products
Equip authorised employees with the relevant lockout products and tags as detailed in the audit. For safety reasons, only products specifically designed for implementing Lockout Tagout procedures should be used.

5: Implementation
A new Lockout programme involves a workforce having to think and work in a new way, posing a challenge in terms of changing safety culture and mindset. Leadership participation and backing is therefore crucial during planning and implementation stages. Monitor behaviours, listen to the workforce and adapt the programme to ensure it is embraced successfully and exceed corporate and legal requirements.

Types of Energy

Dangerous energy sources can take many forms, including:

Electrical Energy
Commonly found powering nearly all workplace equipment.

Hydraulic Energy
Found powering forklifts, cutting equipment and pumps.

Mechanical Energy
Can be found in all machinery with moving parts.

Thermal Energy
In ovens or freezers (hot or cold).

Pneumatic Energy
Most commonly found powering machinery via compressed air or gas.

Potential Energy
Found in compressed springs or suspended weights.

Safety Lockout Padlocks

With a ribbed Nylon body for easy gripping and handling. Compact high security padlocks with a 6-pin lock mechanism which will not release the key until the shackle is closed.

- ***6-pin precision-machined cylinder for extra security.***
- ***Non-conductive, non-sparking reinforced Nylon body.***
- ***Resistant to chemicals and corrosion.***
- ***Colour coded for easy identification with a photoluminescent label.***
- ***Key retaining feature.***
- ***Etched numbers/serials/initials***
- ***Each padlock is supplied boxed with 1 key and keyring.***

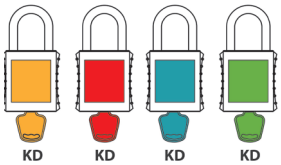
IN THE KNOW

WHAT PADLOCK AND KEY DO I NEED?

Padlocks are an essential part of a lockout tagout programme, there are also various types of keying systems that can be used as part of an effective loto programme. Choose the type which is suitable for the intended process, bearing in mind its place within the overall lockout procedure.

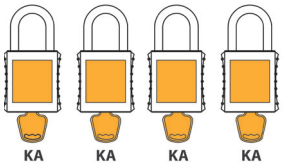
PADLOCKS AND KEYING SYSTEMS

The correct keying system for your site will be dictated by LOTO procedures, identified through a LOTO audit. There are varying options listed below:



KEYED DIFFERENT (KD)

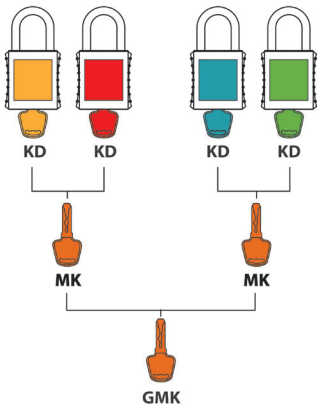
Each padlock can only be opened using a single unique key.



KEYED ALIKE (KA)

All padlocks in a Keyed Alike team have their own key.

That same key can open any padlock within the same team.



MASTER KEYED (MK) & GRAND MASTER KEYED (GMK)

The padlocks in this system each have their own unique key, which can only open the corresponding padlock.

The Master Key for this team can open any of the padlocks within its own team. This can be further extended over multiple teams, with a Grand Master Key able to open any padlock within any team.

Eagle-ID
by **Spectrum** Services

OUR UNIQUE KEY RECORDING SYSTEM DESIGNED TO GUARANTEE THE ONSITE SAFETY ISSUES SURROUNDING DUPLICATE KEYS.

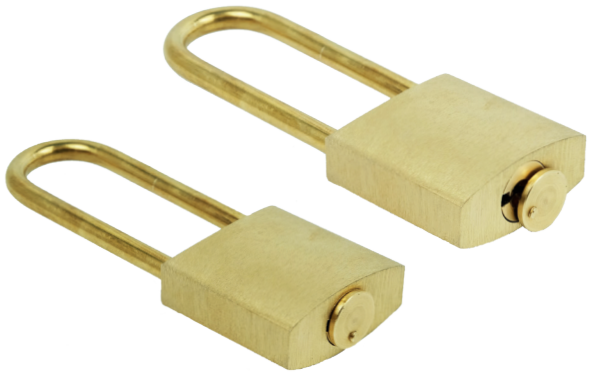
The Eagle-ID scheme can be implemented on any of the Lockout Tagout padlocks we supply and will provide an ironclad guarantee that your site is free from key duplications and the safety implications this can present.

Every padlock supplied has its unique key reference recorded on our internal system, and subsequent orders are cross-referenced against this database to ensure no duplications can ever be issued to the user, regardless of site location or company organisational structure. For further details and help on implementing the Eagle-ID please contact our sales office.

Brass Lockout Padlocks

Brass lockout padlocks are one of the most commonly used padlocks in high risk environments. Many industries use them exclusively due to their spark proof, rust proof and high durable qualities.

Available with or without a dust cap which can protect the internal mechanism keeping it free of blockages and extending the locks usability. Other options include colour coding, engraving and steel shackles.



Description	Code
32mm	LOK294
32mm with dust cover	LOK295
38mm	LOK296
38mm with dust cover	LOK297

Size	Code
70mm	SP165P

Lockboxes

Provision of a safe location to store keys and other activation devices during maintenance or repair.

Once equipment has been isolated and made safe, any keys or other activating equipment can be stored safely in a lockbox to prevent accidental re-energisation. Multiple padlocks can be affixed to the Lockbox which all must be removed before gaining access to the contents.

Lockbox

Red powder coated steel lockbox for storage of keys or other machine activation devices.

Once a machine has been isolated and made safe, its keys are placed in the Lockbox; each authorised person working on the machine then applies their own padlock to the lockbox, ensuring the keys cannot be accessed until every authorised user is satisfied the machine is safe.

- ***13 padlock fixing holes***
- ***Carry handle on top***

*Padlocks not included

Size (HxWxD)	Code
155 x 255 x 100mm	LOK015

Compact Lockbox

A compact version of the Lockbox.

Suitable for up to 7 padlocks

Size (HxWxD)	Code
155 x 115 x 110mm	LOK150

Wall Mount Lockbox

A compact Lockbox suitable for wall fixing or use as a mobile unit.

Suitable for up to 15 padlock

Size (HxWxD)	Code
258 x 160 x 85mm	LOK169

Hasps

When more than one padlock needs to be fitted to an isolation point a hasp can be fitted to expand the number of lockout points available. The design of a hasp ensures that all the padlocks need to be removed before the hasp can be detached.

Standard Hasps

Manufactured from hardened powder coated Steel, this hasp utilises a simple scissor action to lockout an isolation point.

The 25mm version has a double locking arrangement whilst the 38mm is a single locking system.

Description	Code
25mm	LOK048
38mm	LOK069

Manufactured from high tensile Steel sheet which has in turn been electro-plated to prevent corrosion.

The padlock fixing section is Vinyl coated to improve grip and provide greater visibility.

Description	Code
25mm	LOK044
38mm	LOK045

Gate Valve Lockout

A simple solution for isolating gate valves. Once the valve is in the appropriate position, simply slip the lockout over the top of the handle, rotating freely around the valve stem and thus preventing access and movement of the valve.

The different sizes cover the most commonly used valve diameters. Where a gate valve lockout cannot be used due to fitting or other restraints, consider using a cable lockout system to isolate the valve

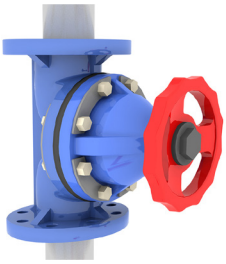
- *Resistant to cracking and abrasion*
- *Dielectric properties*
- *Rotates freely around valve handles*
- *Resistant to extreme temperatures*
- *Suitable for hasps and padlocks*
- *Available in various sizes*

IN THE KNOW

USING A GATE VALVE LOCKOUT

Slip the Lockout over the top of the valve handle.
Once in position the cover will rotate freely thereby preventing the valve from turning.

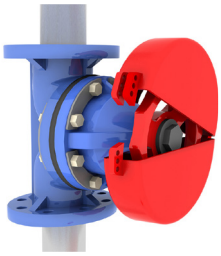
DIRECTIONS FOR USE:



STEP 1

Ensure the valve is in the required locked off position (on/off).

Select the appropriate sized lockout for the gate valve.



STEP 1b *(Optional)*

Optional clip out centre. Please specify if you would like the lockout with pop out centre when placing your order.

(For use on valves with a rising stem).

STEP 2

Place the lockout device over the valve wheel and close, ensuring it can rotate freely around the wheel.

STEP 3

Secure Lockout with a safety padlock and attach a tag to communicate your chosen safety message.

Use a hasp if more padlocks are required.

Keep your lockout tagout equipment easily accessible

Keeping your workplace tidy.

FIND THE FULL RANGE OF LOCKOUT STATIONS ON PAGE 214

Gate Valve Lockout

Comprising of two flattened half moons with a hollow centre. Hinged at one side, they are placed over the valve and then closed, ensuring that the valve wheel is tamper-proof.

Use a hasp if more than one padlock is required to Lockout the device.

Please ask if you require the gate valve lockout with a clip out centre.

Adjustable Gate Valve Lockout

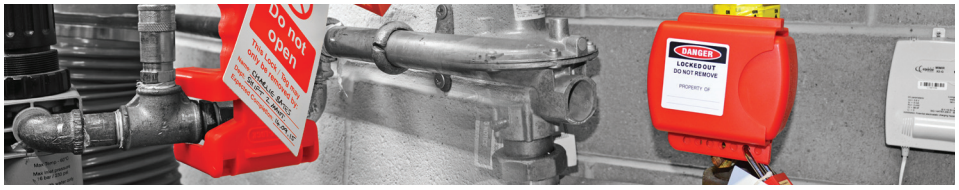
Two separate pieces which slide over the valve and lock together.

Fits valve hand wheels between 25.5mm and 165mm in diameter.

Millimetres	Inches	Code
25.5 - 165mm	1" - 6 1/2"	LOK006

Ball Valve Lockout

This lockout device is placed over the top of the ball valve to prevent the valve handle from being turned. Once in the correct isolated position, the handle of the valve is trapped within the body of the lockout, preventing the handle from being operated.



IN THE KNOW

USING A BALL VALVE LOCKOUT

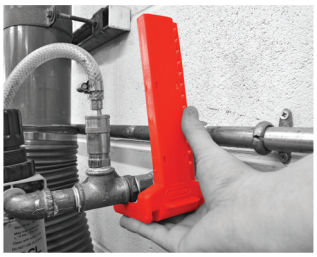
Once in position, the handle of the valve is trapped within the body of the lockout, preventing the handle from being operated.

DIRECTIONS FOR USE:

STEP 1

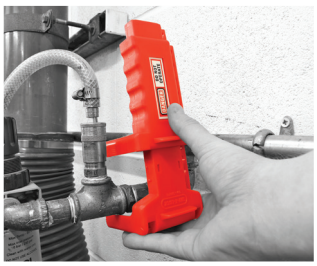
Turn the valve handle to the correct position,

Either on or off.



STEP 2

Lockout the device by placing the main body over the top of the valve handle. Ensure the valve handle sits inside channel.



STEP 3

Move slider section down the shaft of the lockout until tight against the valve body.

STEP 4

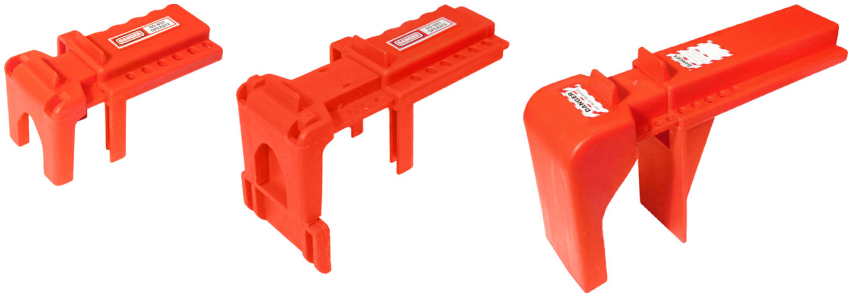
Insert a padlock or hasp through the most appropriate hole which keeps the slider secure.

PLEASE NOTE:

Holes on the slider section have a staggered repeat which ensures that at least one hole will be tight when placed against the valve. If more than one padlock is required then a hasp should be used.

Ball Valve Lockout

This lockout device is placed over the top of the ball valve to prevent the valve handle from being turned.



3 sizes available.

Size	Code
9.5 - 31mm	LOK023
32 - 63mm	LOK024
50 - 203mm	LOK025

Butterfly Valve Lockout

When slid into position the wedge on the slider section prevents the compression handle being squeezed, preventing operation of the valve.

Working in a similar way to the standard ball valve lockouts, the wedge on the slider section sits between the compression handle and lever, preventing operation.

Size	Code
8 - 45mm	LOK018

Flange Ball Valve Lockout

Once the flange ball valve is in the desired position and the handle removed, this lockout device fits over the top of the stem ring.

The two sections of the device slide together over the top of the stem, ensuring it is suitable for various sizes of valves.

Hole size: 46 x 38mm

Size	Code
150 x 220 x 70mm	LOK186

IN THE KNOW

STEP 2

STEP 3

Cable Lockout

Cable lockouts are ideal when there is a need to lockout multiple energy sources with one device or when the design or placement of the energy source prevents other types of lockout being used. Use the flexible cable to tie off the energy source and then secure using the grip handle. The handle traps the cable and prevents it from becoming loose.

Multi-Purpose Cable Lockout

This cable lockout has been ergonomically designed to fit the hand, making placement and use fast and simple.

Route the cable where necessary to Lockout the device then feed the cable down the centre of the open lockout. When the cable is tight and the source is locked out, squeeze the handle closed and apply padlock.

Available in vinyl coated steel and nylon cable versions.

Cable Type	Code
2.5m Steel Core (Blue)	LOK013
2.5m Nylon Core (Yellow)	LOK014

Retractable Cable Lockout

This unique cable lockout has an integral rewinding mechanism, pulling the cable taut once it has been routed to lockout the equipment. It can house up to two padlocks of a maximum diameter of 7mm.

Dimensions	Cable Length	Cable diameter	Code
110 x 110 x 40mm	1.8m	2mm	LOK217

IN THE KNOW

DIRECTIONS FOR USE:

STEP 1

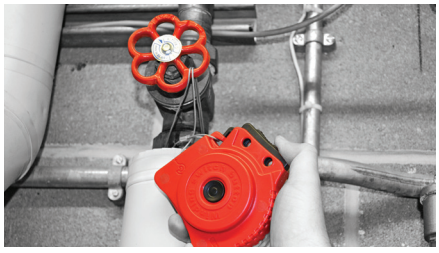
Pull out the cable and route it through the equipment to lockout the device. Feed the cable back to the cable lockout and place the loop around the hook.

STEP 2

Push the winding button and the cable will automatically retract, pulling it tight.

STEP 3

Push in the black grip handle to lock the cable in place. Affix up to two padlocks on the unit (more can be fitted using a hasp) and tagout as appropriate.



PLEASE NOTE: To remove, push in the black grip handle to release the cable.

Heavy Duty Cable Lockout

A heavy duty cable lockout that can be applied to large valves. Suitable for the most extreme weather conditions including offshore installations.

Due to its metal construction and stainless steel nut this lockout provides reliable and corrosion resistant use.

(Please note that the Stainless Steel cable is supplied separately)

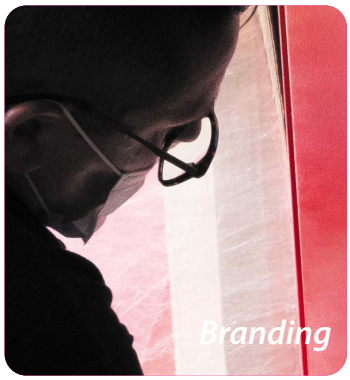
Description	Code
Lockout Only	LOK135
2m Stainless Steel Cable	LOK136
5m Stainless Steel Cable	LOK137

Mobile LOTO Display unit

We can supply custom made LOTO distribution equipment to suit your needs. These units are ideal for the immediate deployment of LOTO equipment to the areas where you need it, either via forklift or the integral lockable wheels. The LOTO boards can be designed to display the stock you require and can be mounted on one of both sides of the unit. The optional lockable cupboard can house the equipment which will not fit on the boards.

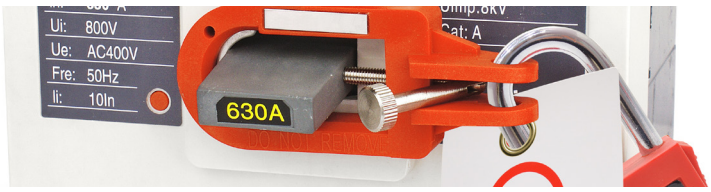
- Integral and customisable LOTO Boards
- Single or double sided board display
- Customisable vinyl graphics and company logos
- Mobile or static options
- Lockable cupboard section

Speak to one of our team today and see how we can help.



Electrical Lockout

We have a range of lockout devices designed to be used to lockout modern workplace equipment. These are usually fixed to the power control switch of the electrical equipment, and when used with the appropriate tag and padlock are an effective way to ensure the equipment cannot be activated until safe to do so.

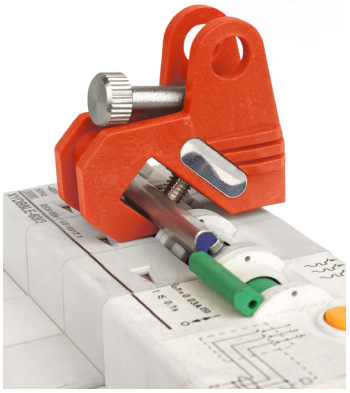


Universal Mini Circuit Breaker Lockout

This universal MCB lockout has been designed to fit almost any size of MCB, regardless of size or the position of the holes on the breaker.

Simply turn off the breaker and place the lockout over the switch. Use the thumbscrew to tighten the internal grub screw onto the switch, locking the unit into place.

The thumbscrew will then fold down on its integral hinge, allowing a padlock to be fitted preventing access to the thumbscrew.



Clamp Size	Code
10 x 20mm	LOK043

Universal Mini MCB Lockout

Our smallest MCB toggle is easy to use - simply place over the breaker and tighten the internal grub screw.

Once secure fit a padlock or appropriate hasp through the hole to prevent unauthorised removal.

Maximum clamping size ≤ 6mm.

Clamp Size	Code
≤ 6mm	LOK161

Universal 'Tool Free' MCB

This MCB lockout device utilises a thumb-screw for easy 'no tools' installation and is suitable for use on virtually all ISO/DIN circuit breakers. It can be fitted vertically or horizontally, and is small enough to be used side by side on adjacent breakers.

Simply lift up the cover and fit the unit onto the MCB toggle when in the OFF position, screw down the thumbscrew tight and close the cover, locking out the unit with a padlock. The device also has two locking options providing flexibility when applying a padlock either vertically or horizontally.

Clamp Size	Code
8 x 15mm	LOK277

Mini Circuit Breakers

Our range of miniature circuit breaker (MCB) lockouts have been designed to fit most modern single and multiple pole miniature circuit breakers. The lockout prevents the circuit breaker toggle from being turned on, use appropriate padlock to prevent unauthorised removal.

Due to the size of these MCB lockouts, should you need to use a hasp to increase the number of padlocks we recommend the di-electric hasp ***(LOK053)*** or wire padlock ***(LOK185)***. All of the following MCB lockouts can be locked out using a single safety padlock with a maximum shackle diameter of 7mm.

LOK206

PIN OUT WIDE

This MCB has an extra wide body to fit breakers greater than 60 Amp.

LOK208

TIE BAR

Adjustable thumb wheel operation fits larger or multi-pole circuit breakers connected with a cross bar. Requires no holes in the breaker to fit.

LOK207

Universal MCB Lockout

A universal Lockout which is fitted using an internal grub screw or thumb turn screw.

Suitable for single or multi-pole breaker.

Width	Code
10mm	LOK121
10mm	LOK122
22mm	LOK141

LOK121

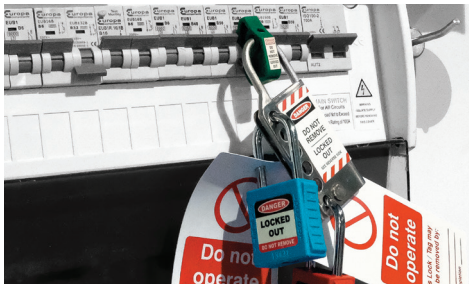
LOK122

LOK141

Universal MCB Lockout

Fitted using an internal grub screw.
This version is suitable for most Siemens style branded circuit breakers.
Maximum clamping size ≤ 5mm.

Clamp Size	Code
6 x 4mm	LOK138

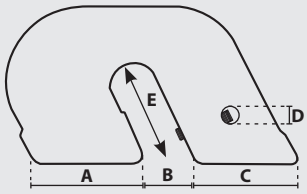


Large MCB Lockout

Fitted using an internal grub screw, this universal lockout is suitable for larger circuit breakers and can be fitted to toggles ≤ 35mm in depth and 40mm wide.

Clamp Size	Code
≤ 35mm x 40mm	LOK142

Dimensions	
(A)	40mm
(B)	22mm
(C)	40mm
(D)	8mm
(E)	47mm

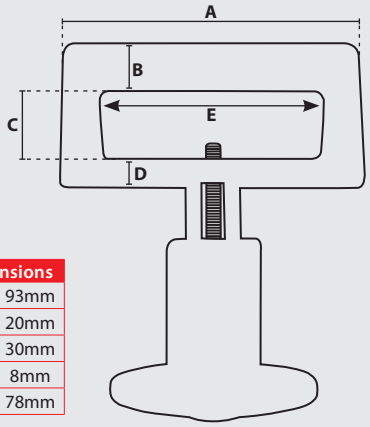


3 Phase Circuit Breakers Lockout

Designed for 3 phase breakers, this large lockout fits over the switch and then the screw is tightened using the clock style section. When tight the clock section is locked to the main body through a sliding section fitted to the main body.

Will accept 3 separate padlocks with a shackle diameter up to 8mm.

Clamp Size	Code
77 x 25mm	LOK055

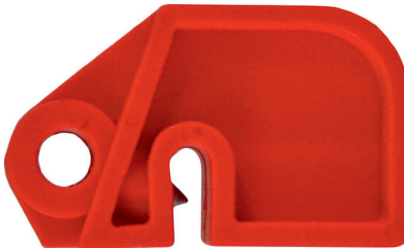


Dimensions	
(A)	93mm
(B)	20mm
(C)	30mm
(D)	8mm
(E)	78mm

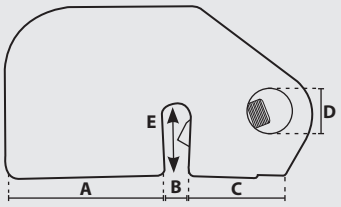
Fuse Lockout

Fitted using an internal grub screw, the universal fuse lockout is suitable for use on fuse holders from 20 Amp to 400 Amp, manufactured from nylon.
Maximum clamping size ≤ 5mm.

Clamp Size	Code
5 x 9mm	LOK140



Dimensions					
(A)	29mm	(B)	6mm	(C)	19mm
(D)	9mm	(E)	10mm		



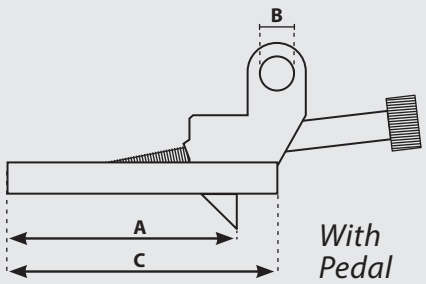
Medium Circuit Breaker Lockout

For use on medium sized circuit breakers, turn the circuit breaker into the off position and place the lockout over the toggle switch. Tighten the screw thread until tight to the toggle with the integral pedal sitting into the housing of the breaker to prevent removal.

Maximum toggle width: 20mm

Description	Code
With Pedal	LOK209

Dimensions		
(A)	(B)	(C)
45mm	39mm	8mm



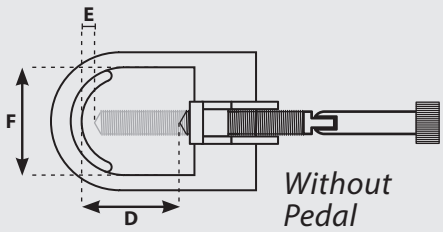
Multi-Function Circuit Breaker Lockout

Fits on top of a variety of push button breakers. This unit traps the button to help prevent it being pushed. Designed primarily as a visual deterrent to prevent accidental reactivation of the circuit.

Maximum toggle width / height: 20mm

Description	Code
Without Pedal	LOK210

Dimensions		
(D)	(E)	(F)
19mm	7mm	29mm



Large Circuit Breaker Lockout

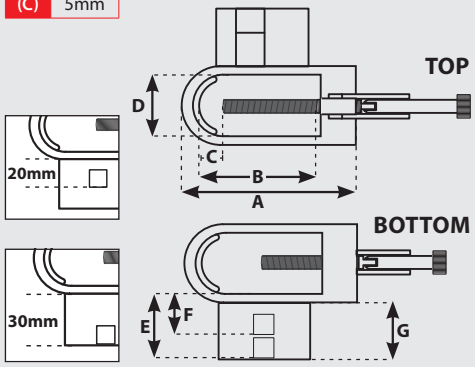
Designed to fit on the largest circuit breakers. Turn the circuit breaker into the off position and place the lockout over the toggle switch. Tighten the screw thread until tight to the toggle with the integral pedal sitting into the housing of the breaker to prevent removal.

This unit is available in 2 sizes to allow for fitting to various sizes of breaker.

Maximum toggle height: 20mm - 30mm

Description	Code
Small (20mm)	LOK211
Large (30mm)	LOK212

Dimensions					
(A)	70mm	(D)	24mm	(F)	8mm
(B)	42mm	(E)	30mm	(G)	25mm
(C)	5mm				



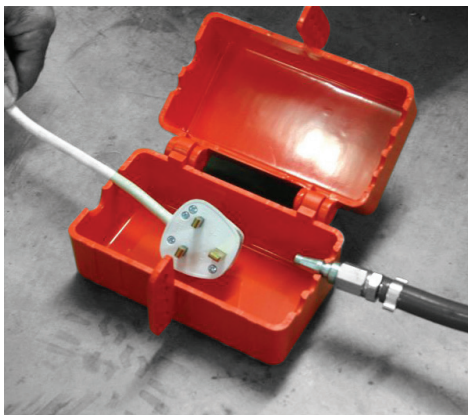
Plug / Pneumatic Lockout

Manufactured from industrial reinforced polystyrene, the unit has been developed to completely enclose electrical plugs to prevent a machine being energized. The plug sits inside the unit with the cable being fed through an access hole.

Small Unit: Suitable for a variety of electrical connections up to 40mm diameter. Accepts up to 4 safety padlocks.

Large Unit: Suitable for standard and larger electrical plugs, including 3 phase connectors. It also has 4 holes of 3 different sizes suitable for pneumatic male air hose connectors. Accepts for up to 4 safety padlocks.

Description	Code
Small (4 Holes)	LOK029
Large (4 Holes)	LOK030



Dimensions	Small	Large
Inside height (A)	43mm	85mm
Inside width (B)	81mm	155mm
Inside depth (C)	43mm	85mm

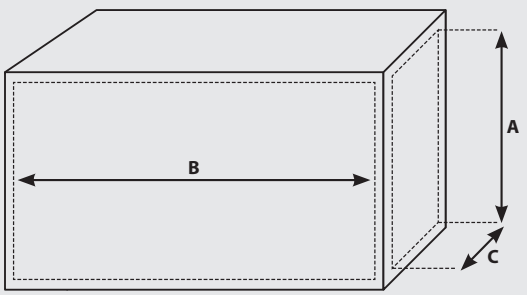
Electrical access Holes (dia.)	1 @ 13mm	1 @ 11mm 1 @ 19mm
Pneumatic access Holes (dia.)	-	1 @ 7.5mm 2 @ 9.5mm 1 @ 12mm



Electrical Plug Lockout

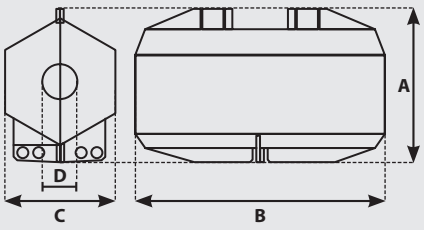
Manufactured from polypropylene, the hexagon design opens up in two halves and is suitable for a variety of industrial plugs.

Small Unit: Can accommodate 2 padlocks.

Large Unit: Can accommodate 4 padlocks.

Accepts padlocks with a shackle diameter of 7mm or less.

Description	Code
Small (4 Holes)	LOK188
Large (4 Holes)	LOK190



Dimensions	Small	Large
(A) height	51mm	83mm

# of holes	2	4
Inner height	42mm	74mm
Inner length	80mm	165mm

Electrical Cylinder Lockout

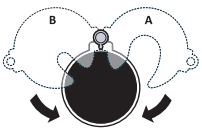
This large electrical plug Lockout has two interlocking cover plates allowing plugs with various sizes of cable to be inserted.

Interior size of 84mm dia. x 150mm and will accept cable widths up to 34mm dia.

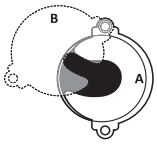
Description	Code
97mm dia x 160mm	LOK058

IN THE KNOW

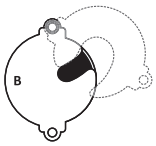
1. *Shown with both plates open allowing insertion of the plug.*



2. *Shown with cover plate A in place giving a cable access hole of 34mm.*



3. *Shown with cover plate B in place giving a cable access hole of 16mm.*



4. *Shown with both plates in place giving a cable access hole of 10 x 15mm.*

Switch and Socket Cover

Ensure vital equipment cannot be accessed by locking off the socket at the wall outlet. This lockout is suitable for standard UK single sockets, and can be used for switches, power sockets, network points etc.

To fit, isolate the power to the outlet, loosen the screws and place the cover behind the faceplate. Re-tighten the screws pulling the cover into place. To use cover with plug sockets, turn the cover 90°. Up to two padlocks can be fitted, if more are needed consider using a suitable hasp.

Note: Cable gaps are located at the side and may not be suitable for thicker/rigid cables

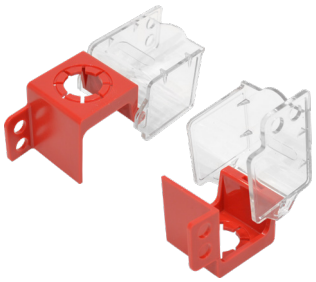
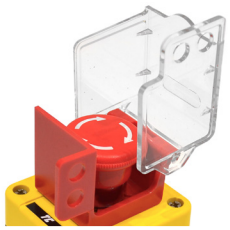
IN THE KNOW



STEP 1



STEP 2

STEP 3

STEP 4

3 Pin Plug Lockout

Ideal for use with power supplies of computers and similar devices. This lockout inserts into the back of the power supply and the circular paddle is then rotated to lock the device in position.

A padlock can then be used to prevent the device being removed.

Size	Code
33 x 130 x 29mm	LOK123

Electrical Panel Lockout

Use these lockout electrical panel buttons and switches when these is no in built lockdown provision.

4 different designs.

- ***2-stage operation***
- ***Push / mushroom panel buttons***
- ***Square units - switch levers***
- ***Adhesive backing***

Attach the base plate directly onto the electrical panel. Isolate the unit by placing the housing unit over the top preventing access to the switch.

Each unit is supplied complete with ones small Brass padlock and 3 keys.

Gas Cylinder Lockout

Used to prevent access to the main cylinder valve, the unit encloses the valve head and is locked in place with two interlocking plates.

Installs in seconds and provides quick and easy identification of a full cylinder with the security of a padlock to lock the device in place to prevent unauthorised use.

Each Lockout is supplied with two extra labels which can be fixed onto the Lockout to depict if the cylinder currently being locked out is full or empty.

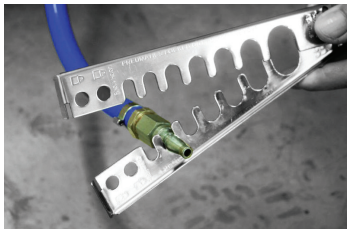
Interior size of 84mm dia. x 150mm, accepts neck rings up to 34mm dia

Size	Code
97mm dia x 160mm	LOK056

Pneumatic Lockout

Manufactured from solid stainless steel this pneumatic lockout is strong, durable, resistant to corrosion and fits virtually all pneumatic fittings used in manufacturing facilities.

To use, place the pneumatic male fitting between the appropriate sized hole and close with a scissor action, this then prevents the hose from being used. Once the lockout is in its closed position it can be locked using up to two safety padlocks.



Description	Code
Pneumatic Lockout	LOK063

Lockout Stations

Lockout stations provide storage and display solutions for your lockout equipment when not in use.

A lockout station should be located wherever it is deemed most appropriate for its desired purpose. This could be next to the equipment to be locked out, in a maintenance department or a central location.

Custom Lockout Board

Design & Logo

Designed to your specification with your company colours and full colour logos.

Engraving

Our padlocks can be laser engraved with specific details to aid in identifying ownership and replacing in case of loss or damage

Fixings

Custom boards are available with various fixing options, from simple screw holes for fitting to flat surfaces through to metallic standoffs should the wall be uneven or to allow for bolts on the back of the board.

Shadows

Matching shadows can be printed on the board to show what item is located in that position, and any engraving identifying information on the product (such as equipment numbers) can be replicated on the shadow.

Custom Tags

Tags are an integral part of the LOTO system and these can be displayed on a board, printed to your specification complete with company logos if required.

Size

We can make small boards to fit a single product through to large boards metres wide to fit hundreds of padlocks and other LOTO equipment.

Advanced Lockout Stations

A lockout station provides a storage solution for your lockout equipment when not in use. They should be located wherever is deemed appropriate, this could be next to equipment which is regularly locked out or a maintenance department. The absence of any equipment is immediately apparent and the missing items can be traced or replenished.

7 Station Lockout Board

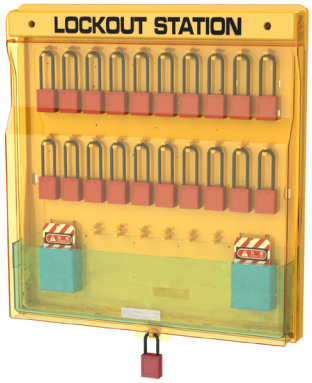
Lockout Stations: Build Your Own

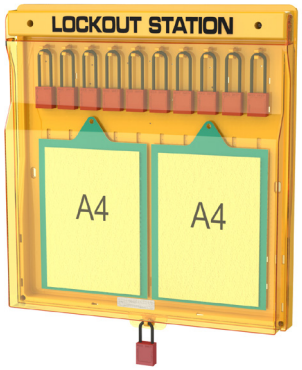
Personalised lockout stations can be easily created with our new combination boards.

Each board has integral locator holes which allow the fitting of a variety of board components, giving the freedom to design the station the way you want it. Simply tell us what components are required and we will build the board to your specifications.

(Stations can be supplied with or without contents)

Examples of available combinations:





Backing Board

- Lockout Station Backing Board

Size: *(HxWxD)*
601 x 590 x 96mm

Code LOK223

Station Cover

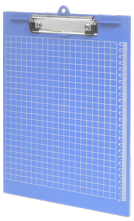
- Covers the whole board
- Lockable at the bottom

Size: *(HxWxD)*
600 x 570 x 70mm

Code LOK224

A4 Plastic Clipboard

- Hard Plastic clipboard
- Ideal for displaying work permits



Size: *(HxW)*
330 x 227mm

TAGGING SYSTEMS

The working at height regulations requires the inspection of scaffolding and ladders from which a person might fall 2 metres or more and the issue of a report by a competent person. Ladder and Scaffolding tags are types of safety inspection tags that are attached to the equipment to indicate whether it is safe to use and therefore prevent accidents.

Tagging systems are a useful way of ensuring those who need to access scaffolding or ladders know that it has been inspected and is safe to use and they can act as records to help ensure that the equipment inspection procedures and maintenance are kept up to date.

IDENTIFICATION

Following a risk assessment, equipment or devices will need to be identified. In some cases, the equipment must have a unique id number.

SCHEDULING

Often, regular inspections need to be carried out, daily, weekly or annually.

INSPECTION

After inspection, equipment needs to be marked as having been inspected, along with any relevant information.

RECORDING

Sometimes the law, the regulation or codes of proactive require employers to keep records of the inspections, including what was inspected, by whom and when. These records might need to be kept for months or years.

INFORMING

Employers have responsibility to provide information to their employees about safety and also including whether equipment has been inspected and is safe to use.

VISIBILITY

Along with signs, tags are necessary to make sure that the right information is easily visible to employees.

Scaffold Tagging System

Scaffold must be inspected in the following conditions:

- Following initial erection
- Exposure to adverse weather
- Conditions that could affect its strength or stability
- Following substantial alteration (addition or subtraction)
- At regular intervals not exceeding 7 days from previous inspection
- Available in retail ready packaging

ClawTag	5	TGCT5

IN THE KNOW

Use Scaffolding Safety inserts with our ClawTag holder at all legal entry points to the scaffold providing relevant safety information alongside an inspection record. Should the scaffolding fail inspection the insert can be removed to display the message 'Do Not Use This Equipment' or replace with a prohibition insert (shown on **page 235**).

Ladder Tagging System

The AssetTag holder should be permanently fixed to the ladder in a suitable safe place.

Perform an inspection of the ladder ***(a checklist is printed on the reverse)*** and record the result on the tag.

If the ladder fails the inspection remove insert and inform a supervisor.

IN THE KNOW

The Work at Height Regulations came into force in 2005. These regulations apply to work at height where there is a risk of fall liable to cause personal injury. This applies to both internal and external work at height, and includes below ground level and low height.

All ladders should be checked daily and prior to use for any damage, faults or wear and tear. In addition they should be inspected at defined intervals as part of a risk assessment programme. Use these inserts to manage the, safety and maintenance of ladders and help conform to the Work at Height Regulations 2005.

Tower Scaffold Tagging System

The Tower Scaffold Safety Tag provides an essential platform for entering and storing essential safety information, including movements and safe weight tolerances. Designed for use with the ClawTag holder, these tags can be fixed to the scaffold after erection without needing to dismantle part of the structure.

Essential safety and audit information can be referenced with the storage of these inserts after job completion.

IN THE KNOW

The Work at Height Regulations 2005 require an assessment to be undertaken before starting any work. Erection should be made to Prefabricated Access Suppliers and Manufacturers Association (PASMA) approved methods.

Scaffold Prohibition

Side 1:
To be displayed if scaffold has failed inspection, warning not to use until it has been made safe and passed re-inspection.

Side 2:
Used to temporarily prohibit access to certain sections of a scaffold.

LOLER Safety

The Lifting Operations and Lifting Equipment Regulations 1998 (LOLER) covers any equipment used at work for lifting or lowering loads, including anchoring or supporting attachment Regulations stipulate that equipment is marked with the appropriate information for its safe use, such as safe working loads.

Daily and weekly checks should be made, in addition to a thorough recorded examination every 6 to 12 months. If the equipment is installed, the location must also be examined at the following points:

After installation but before first use.
After assembly but before first use on a site or in a new location.

Should the equipment be hired it should be accompanied by a physical copy of the last examination report. The AssetTag holder should be permanently fixed to the equipment in a suitable safe place.

Perform a thorough inspection of the equipment and complete the insert. In the result of an failure remove insert and inform a supervisor.

Racking Safety

Due to the weight, size and loads involved with modern racking it must be checked regularly to ensure the safety of staff and visitors. Our racking tag holders are a modified version of the AssetTag Max system and are designed to be fixed to the crossbeams of the racking displaying racking specific safety messages.

A checklist on the insert describes the checks which must be made and includes space for inspection details to be recorded. An area is available for completion should intermediate work be required, whereas the insert should be removed totally if the racking is deemed unsafe. This will then display the 'Do Not Use Unsafe Racking' message pre-printed on the holder.

Description	Qty	Code

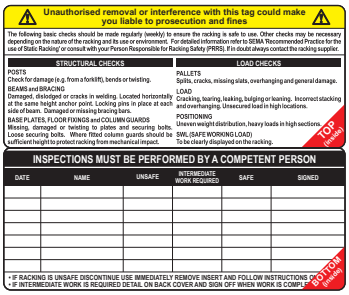
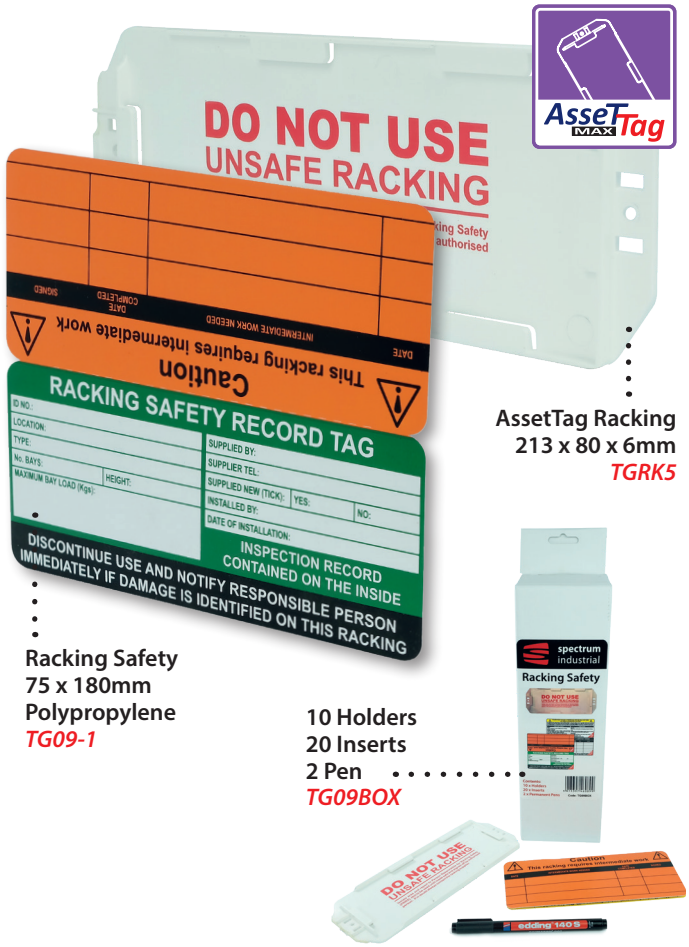
AssetTag Racking	5	TGRK5





MEWP Safety

The Work at Height Regulations came into force in 2005. These regulations apply to work at height where there is a risk of fall liable to cause personal injury. It states that 'equipment for work at height is properly inspected and maintained'. MEWPs (Mobile Elevating Work Platforms), scissor lifts, booms and cherry pickers are included under this instruction.

A daily pre-work inspection should be carried out and recorded on these tags. Inserts are designed for use with the AssetTag MAX holder. The holder should be permanently fixed to the equipment in a suitable safe place. Perform an inspection (a checklist is printed on the reverse) and record the result on the tag. In the event of the equipment failing, remove insert and inform a supervisor. The holder clearly states 'Do Not Use This Equipment' when the tag is removed.

Description	Qty	Code
Single Insert	1	TG11-1
Pack of 10 Inserts	10	TG1110
Pack of 50 Inserts	50	TG1150
Box	10 Holder, 20 Inserts, 2 Pens	TG11BOX
AssetTag Racking	5	TGMX5

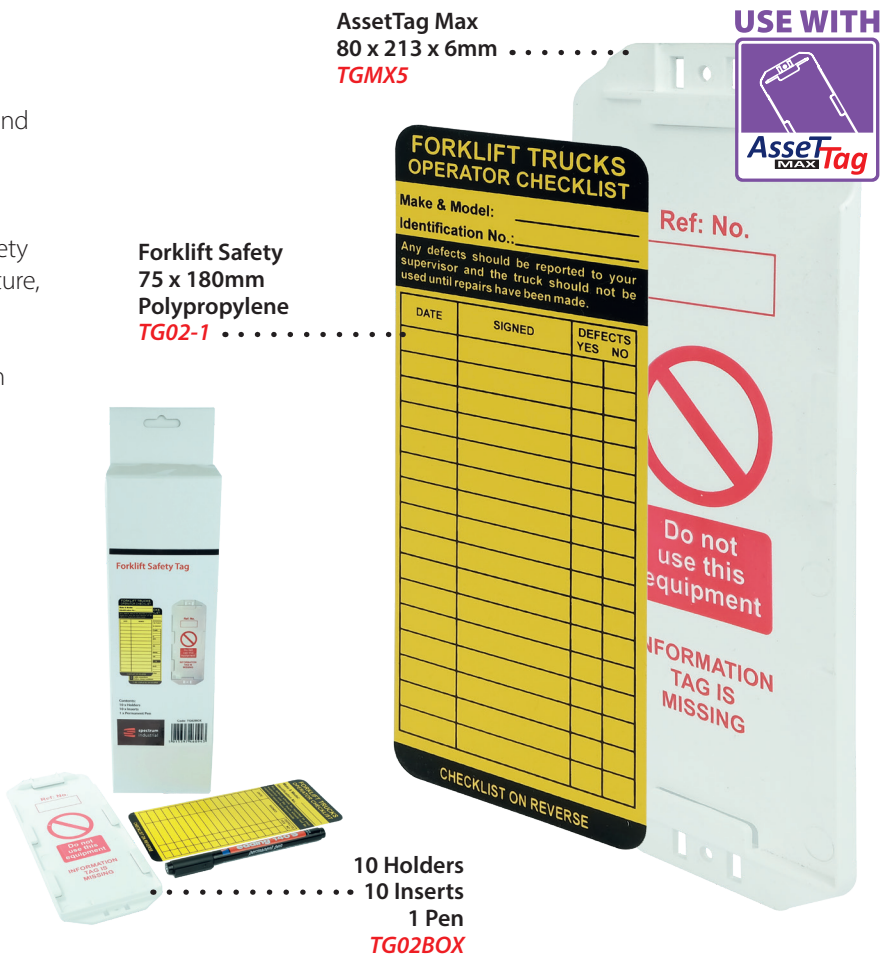
Forklift Safety

An employer must ensure that a forklift is safe to use and all forklifts should be checked by a competent person prior to use for any damage, faults or wear.

On the reverse the Forklift Safety Tag lists the basic safety checks needed with an inspection record (date, signature, defects reported) on the front.

Designed for use with the AssetTag MAX holder which should be fixed permanently at the point of access to the forklift. If the forklift is safe to use the insert can be slid into the holder with the signature side showing.

The holder clearly states 'Do Not Use This Equipment' when the tag is removed, should an inspection find any failures.



Description	Qty	Code

Chemical Safety

Our Chemical insert has been specifically designed to display important and relevant information in one place.

Details include:

- Chemical name(s)
- Emergency telephone numbers
- Supplier details and references
- Immediate action and first aid alongside notes for medical personnel
- Spillage treatment and disposal
- Appropriate fire extinguishing and PPE information

Removal of the insert displays the 'Do Not Use' message on the AssetTag MAX holder. In an accident, the insert can be given to emergency personnel, providing vital information for diagnosis and treatment.

Description	Qty	Code
Single Insert	1	TG03-1
Pack of 10 Inserts	10	TG0310
Pack of 50 Inserts	50	TG0350

AssetTag Racking	5	TGMX5

THESE INSERTS SHOULD NOT BE CONSIDERED A REPLACEMENT FOR MATERIAL SAFETY SHEETS OR ANY OTHER SAFETY DOCUMENTS AND PROCEDURES WHICH MAY BE REQUIRED BY LAW

Universal Equipment Inspection

Our Universal Equipment Inspection record helps an employer comply with legislative requirements when inspecting and helps maintain equipment at suitable periods as deemed appropriate by a risk assessment.

The insert has clearly defined areas to record equipment identification or reference numbers, alongside an inspection record. This allows a user instant access to important safety information. Should equipment fail, the tag can be removed to clearly display the message 'Do Not Use This Equipment' which is printed on the holder.

Isolation Tags

Prevent inadvertent energising of a system with this 2-part perforated tag. Each part is completed by the person in charge with the top half attached to the isolation point and the bottom attached to the permit to work. When both are re-attached to each other the isolation can be classed as removed.

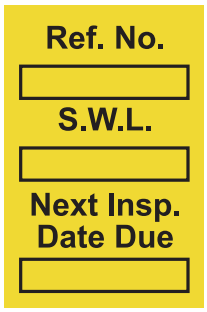
Mini Inserts

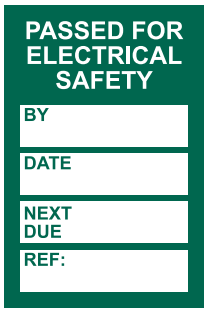
Our smallest inserts are designed for use with our AssetTag MINI tag holders to display relevant identification and safety information.

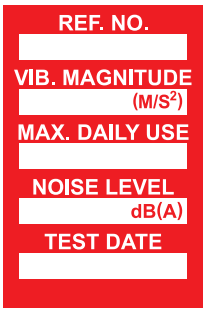
When the insert is removed (due to equipment fault, maintenance or testing) the message on the holder clearly states 'Do Not Use This Equipment'.

Insert size: 31 x 47mm
Material: Polypropylene

USE WITH AssetTag MINI







Next Test

A general purpose insert ideal for use on a variety of equipment and machinery which requires regular safety checks. Suitable for electrical equipment, steps and stools.

Safe Working Load

Helps comply with legislative requirements by informing employees of an items safe working load (S.W.L.).

PAT Testing

Designed for Portable Appliance Testing (PAT) this clearly displays the date of test, when next due, item reference along with the testers name.

Harness Inspection

To be displayed on a harness strap giving identification and inspection details. These are often colour coded giving 'at a glance' safety information from a distance.

Vibration Control

Designed to help manage Hand Arm Vibration Syndrome (H.A.V.S.) and dangerous noise levels, these display relevant safety information.

Asset Tag Holder

Holders can be fixed using the following: cable ties, rivets, adhesive strips or glue, inbuilt claw (Claw Tag only), keyring or split-ring (AssetTag MINI only).

Each holder also has a 'break' in the edge wall to allow for easy removal of the insert. Use a screwdriver to prise behind the tag and flip the insert out. All holders are manufactured from a Nylon composite providing excellent strength and flexibility even in temperature extremes.

AssetTags

Our tags are manufactured from TPU (Polyurethane) and are perfect for use on a multitude of applications including the identification of assets, inspection and safety tagging. They are highly flexible, incredibly durable, suitable for all weather conditions and resistant to both high and low temperatures as well as most acids, alkalis and solvents.

Key Points:

- Flexible and durable
- Weatherproof
- 8 Colours available
- Single or double sided print options
- Custom design available

Asset Tag Flex: Works as a complete unit without the need for any further equipment. Using two integral slots the tag can be fastened through itself at two positions depending on the application.

Asset Tag Medium: Attached to any piece of equipment using a cable tie, rivet or similar.

The Asset Tag series is available in 8 different colours with a wide variety of print options – plain, single sided, pre-printed or fully customised with your wording or logo.

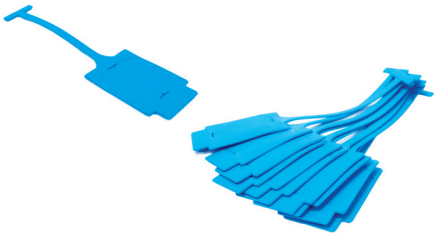
IN THE KNOW

STEP 1

Pick from one of eight colours available

STEP 2

Order in singles or a pack of 50.



STEP 3

Choose between a pre-printed safety message or a plain tag.

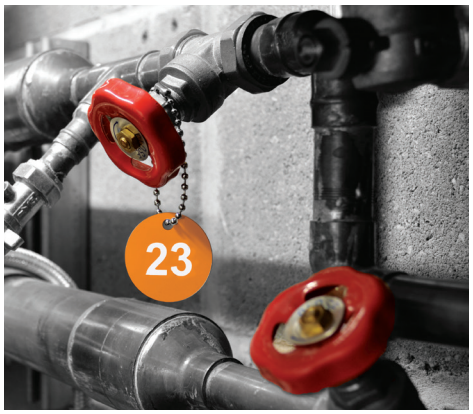
Valve Tags

Long lasting engraved valve tags are an important way of improving the safety and efficiency in many facilities. A tag is permanently attached to the valve and engraved with a number as a means to quickly identify the valve and its contents. A separate list would detail all the valves and their contents within a facility, allowing maintenance teams to identify the correct system and valve quickly to resolve the issue.



Tags can also be used as part of a lockout tagout system. When locking out equipment all power sources need to be isolated, and this often includes valves which regulate compressed air, liquids or other contents. The equipment isolation procedure would state which valves would need to be isolated and the associated valve number, with the valve tags ensuring this process can be performed quickly and accurately.

Tags have a depth of 1.6mm

ENGRAVED LAMINATED TAG COLOUR:

Colour coding your valve tags can make the identification process even simpler when you are trying to identify a certain valve within a mass of pipework having your choices narrowed to a specific colour will speed up this process. A company can incorporate any colour scheme they choose within their own premises, but often universal standards colours are used such as red for hot and blue for cold liquids or gasses.

CUSTOM TAGS

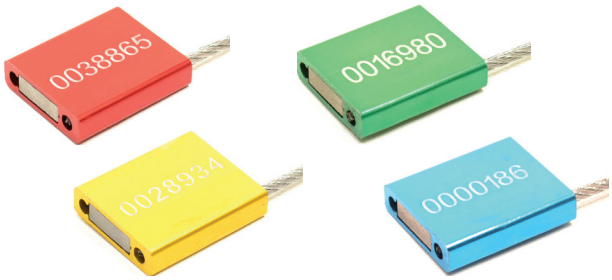
Engraved laminated custom tags can be made into different shapes with bespoke messages in a variety of colours.

Contact the sales office for further details.

Car Seals

A simple solution used to lock (or seal) a device in an open or closed position as required, preventing unauthorised operation for long-term isolation. The sealed apparatus can only be operated by cutting the galvanised steel cable, which in turn would provide evidence that it has been tampered with. Due to this these seals are a single-use item. Each seal is laser etched with a sequential number for identification, reference and security.

Our car seals have a coloured anodised aluminium body with a strong galvanised steel cable and are available in a choice of colours.



Other colours, lengths of cable and designs or seals are available on request.

Features & Benefits

- Cable length is 100cm
- Cable manufactured from galvanised steel strand
- Cable diameter is 2.5mm
- Body manufactured from aluminium
- Each seal marked with a unique serial number
- Supplied packs of 100, sequentially numbered

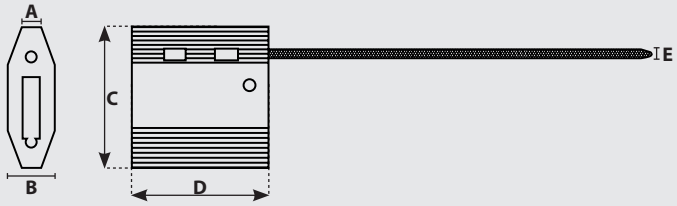
Description	Code
Red	CAR-SEAL02-100
Yellow	CAR-SEAL03-100
Blue	CAR-SEAL04-100
Green	CAR-SEAL05-100

Used in conjunction with Single Sided tags in red and green to indicate the status of the valve.

Supplied in packs of 10 (single sided)

Description	Size	Code
Closed Tags	75 x 135mm	CAR-TAG001
Open Tags	75 x 135mm	CAR-TAG002

Dimensions				
(A)	(B)	(C)	(D)	(E)
5.2mm	8.8mm	26.5mm	26.3mm	2.5mm

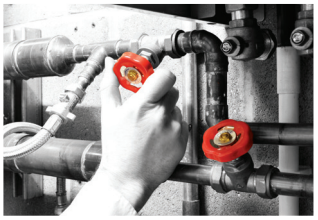


IN THE KNOW

Directions for use:

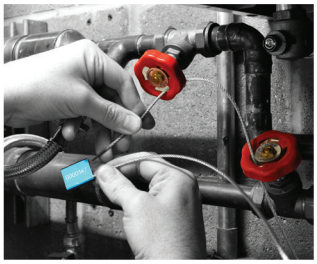
STEP 1

Identify a safe lock mounting point which a car seal can be wrapped around, ensure it is stable and secure.



STEP 2

Turn valve on/off as required.



STEP 3

Feed cable though the valve wheel and wrap around the pre-identified secure point and pull tight. This can be a second valve if this also needs to be locked on/off and is near enough.

STEP 4

Cut off any excess cable.

Merchandising Support

Let us help maximise your sales with our point of sale and merchandising support. We understand how pushed the end users are for time and the Spectrum merchandising systems have been developed with convenience and visual appeal in mind, making it easy for the merchant / retailer to set up in store and easy for the end user to shop. The display units maximise use of floor, wall or countertop retail space making it easy not only for customers to find what they are looking for, but for branch staff to easily replenish stock and showcase the products at their best.

With inhouse facilities to design and manufacture bespoke point of sale, we can provide striking and functional units at cost effective prices. Let us help maximise your sales.

IN STORE MERCHANDISING

Effective elements of Visual Merchandising

COLOUR IS KING
Use colour to catch the eyes of your customers and draw them to your displays

CREATE A FOCAL POINT
Always check your displays to ensure customers can easily view the hotspots and merchandise

TELL A STORY
Use powerful, sales-enabling signage to display the advantages of buying the product

EMPTY SPACE
Use empty space for signage providing customer testimonials with the customers details

EXPOSE CUSTOMERS
A well-designed, impactful display exposes the customer to as much merchandise as possible while avoiding a sloppy mess!

WORKPLACE SUPPLIES

We stock a wide range of everyday tools, safety supplies and fixtures for fittings for your workplace needs. Including Magnetic Sweepers, Organisational Products, Hardware and Tools.

WORKPLACE SUPPLIES

When it comes to running a business the correct workplace supplies are crucial. There are many products important to a business from report books through to hand sanitisers, and we can offer a wide selection to keep you safe and working efficiently.

Safety Essentials

Employers must record various incidents in the workplace, from accidents and near misses through to fire safety and work permits. Safety lanyards and armbands highlight key safety workers and hand sanitisers provide hygiene points for staff and visitors.

Workplace Efficiency

In a modern workplace efficiency is essential, and organising products and procedures goes a long way towards this. Line marking and racking identification help organise the workplace, and our tapes can help identify and plan the path of products and people throughout the business.

Information Systems

Keeping staff and visitors informed of relevant information can be achieved by using pin boards and poster frames, with hanging frames providing wayfinding or general information.

Commercial Advertising

If there is a requirement for advertising your business or products in the local area, pavement or frame stands are ideal for this purpose.

Report Books

Description	Code
3 Pack - Accident Report Book, Near Miss Book and Fire Log Book	14902

IN THE KNOW

RIDDOR is the law that requires employers and those in control of work premises to report and keep records of:

- ***Work-related accidents which cause death.***
- ***Work-related accidents which cause certain serious injuries (reportable injuries).***
- ***Diagnosed cases of certain industrial diseases.***
- ***Certain 'dangerous occurrences' (incidents with the potential to cause harm).***

Accident / Injury Report Book and Folder

Every business must record employee and visitor accidents by law. This book is a quick, easy and accurate method for recording these incidents.

- Enables compliance with all requirements of the Social Security Administration Act 1992 and Data Protection Act 1996.
- Holds up to 100 incidents.
- Folder provides secure storage and indexing.
- Folder includes useful guidance notes for completing and storing accident records.

Description	Code
Accident Report Book	14900
Accident Report Book Folder	14886

Near Miss Report Book

A quick, easy and accurate method for recording near misses within the workplace.

- Enables you to be compliant with all requirements of the Social Security Administration Act 1992 and Data Protection Act 1996.
- Holds up to 100 incidents.

Description	Code
Near Miss Report Book	14884

Fire Safety Log Book

The Regulatory Reform (Fire Safety) Order 2005 (FSO) requires that the 'responsible person' for premises should ensure that all fire safety facilities, equipment and devices are maintained in efficient working order and in good repair.

- Keeps critical fire safety information in one place.
- Includes tips on fire extinguishers, emergency lighting, fire doors, fire drills, staff training, and fire alarms.

Description	Code
Fire Safety Log Book	14901

AS WITH ALL INSTANCES WHERE SENSITIVE PERSONAL DATA MAY BE RECORDED, APPROPRIATE PROCESSING AND SAFEGUARDING PROCEDURES MUST BE FOLLOWED TO ENSURE GDPR COMPLIANCE.

Permit to Work Forms

An integral part of a comprehensive Health and Safety Management system, each permit records hazards and precautions relevant to the specific job.

- Each permit contains three parts the original plus two carbon copies.
- Card backing insert for separating the carbon copies.
- Supplied in packs of 10 of the same design.

Description	Code
General	14887
Electrical	14888
Confined Spaces	14892
Breaking Lines	14893
Asbestos Alert	14898

Magnetic Sweepers

Ideal for collecting ferrous metal from the floors of workshops, factories, shop aisles, garages and construction sites. Magnetic sweepers are available in 4 different sizes, from small lightweight sweepers to industrial forklift sweepers meaning we have a solution for spaces of all sizes.

A magnetic sweeper pays for itself in the saving of the time and cost associated with replacing punctured or damaged equipment. They can also prevent unnecessary personal injury by clearing the area of unwanted metal objects.

Small Magnetic Sweep

This sweeper is perfect for smaller spaces and is an efficient cleaning tool. With a telescopic handle you can clear hard to reach areas with ease. Debris is released by a simple pull mechanism.

- Quickly Discard by Pulling Handle
- Lightweight Aluminium Exterior
- Clean Hard to Reach Areas
- Telescopic Handle
- Easily Cleaned

Handle Height	Sweep Width	Pull Strength* *approx	Code
820 - 1130mm	400mm	15kg	MAGSW01

Large Magnetic Sweep

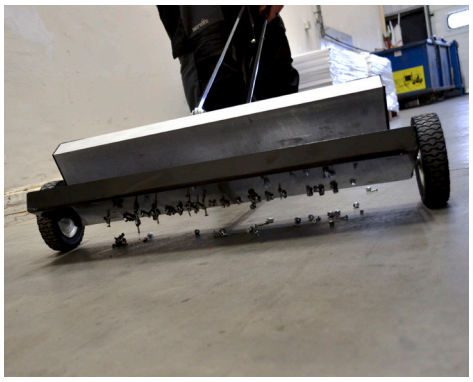
An easy and effective way of collecting large quantities of nails, screws, bolts and any other ferrous metal items in order to keep work areas clean. Quick load-release handle clears the collected metal. This sweeper is perfect for busy workshops, garages and construction sites.

- Sturdy Aluminium Construction
- Telescopic Handle
- Corrosion Resistant
- Large Sweep Coverage
- Pull-bar Release

Handle Height	Sweep Width	Pull Strength* *approx	Code
950 - 1290mm	1010mm	90kg	MAGSW02

Heavy-Duty Magnetic Sweep

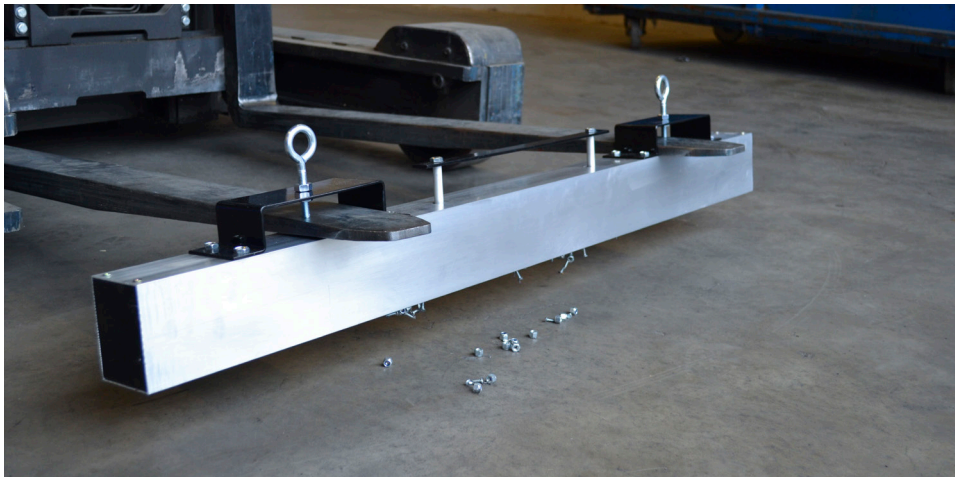
This heavy-duty sweeper is ideal for factories, workshops and construction sites. Unwanted ferrous metal is easily collected to clear work areas of any hazardous debris. Quickly discard of the collected scrap metal by pulling back the release lever. This sweeper is one of the more heavy-duty options on offer and is ideal for industrial use.



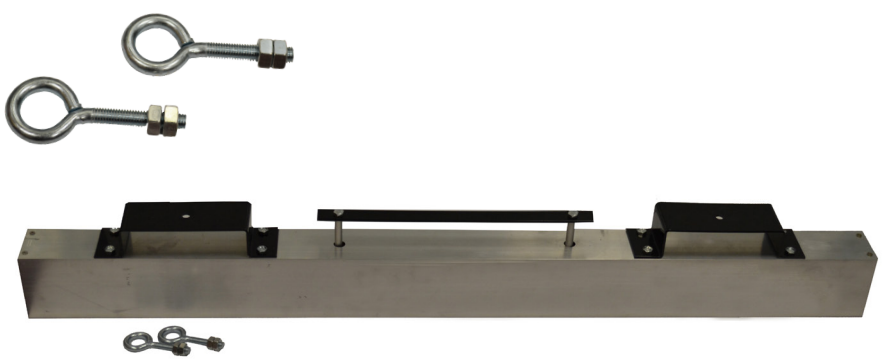
- Heavy-Duty Aluminium
- Construction
- Puncture Proof Wheels
- Easy to Assemble
- Quick Release Lever

Handle Height	Sweep Width	Pull Strength* *approx	Code
1100mm	762mm	180kg	MAGSW03

Forklift Sweep



These are industrial strength, permanent magnets for the removal of dangerous ferrous objects from roads, parking areas, loading docks, warehouses and other busy areas. Our hang-type magnetic sweepers greatly reduce the possibility of costly and dangerous punctures. Also helps prevent injuries caused by scrap iron particles, screws and nails.. Simply hang this magnetic sweeper from your forklift and "sweep" all contaminated areas. Pull the bar between the forks upwards to release the collected debris.



- Easily Mounted onto Forklifts
- Fixings Included
- Simple Design
- Industrial Strength Magnets
- Corrosion Resistant

Handle Height	Sweep Width	Code
1220mm	190kg	MAGSW04

PPE Safety Mirrors

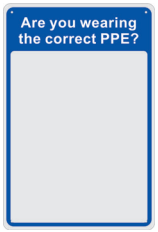
PPE Mirrors are designed to encourage staff to check they have the appropriate PPE and that it is fitted correctly before entering the workplace.

Laser cut from Optix Acrylic mirrored sheet, each comes complete with pre-drilled holes, mirror screws and adhesive tape. PPE Mirrors are simple to use as well as being easy to keep clean and maintain.

OUR SMALLER 200 x 300MM MIRRORS ARE IDEAL FOR INSTALLATION ON ANY ENTRANCE DOOR TO THE WORKPLACE AND ARE AVAILABLE IN 3 DIFFERENT DESIGNS.

200 x 300 18300

200 x 300 18301



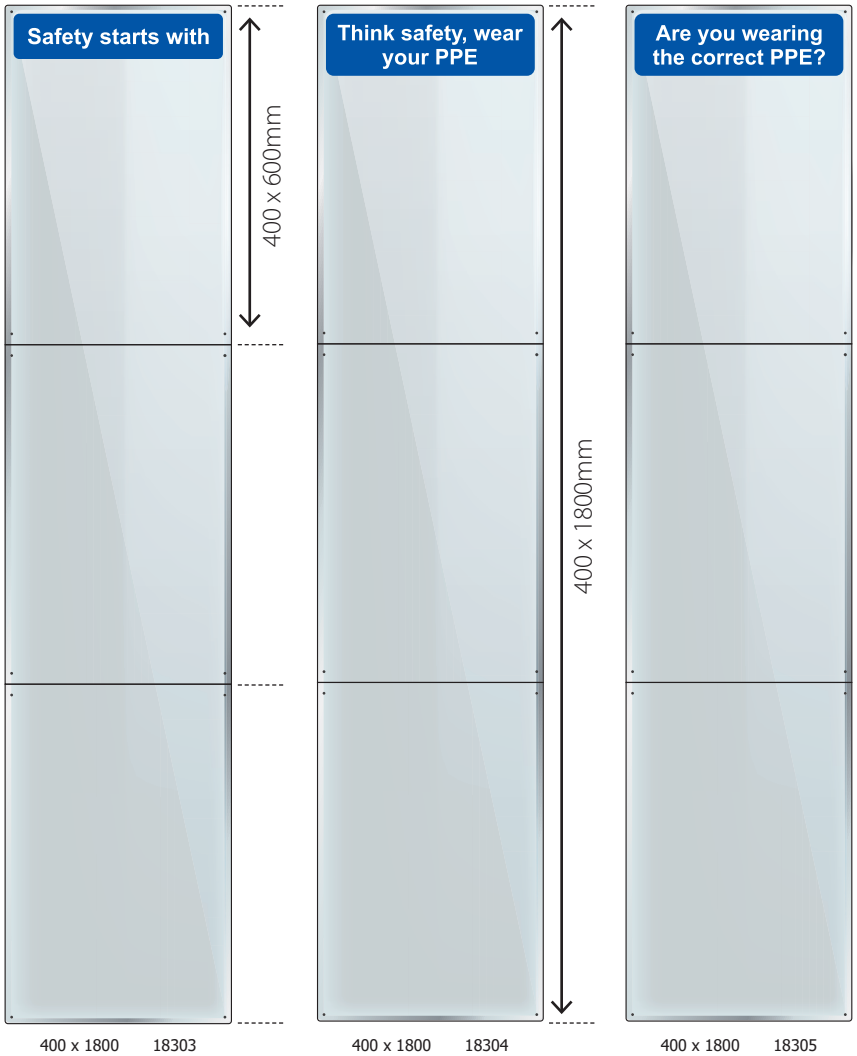
200 x 300 18302

OUR LARGER 400 x 1800MM MIRROR SETS ARE SUPPLIED IN 3 PIECES AND PROVIDE A FULL BODY VIEW. THESE MIRROR SETS COME COMPLETE WITH A MIRROR LABEL PACK, SELECTION AND PLACEMENT OF WHICH CAN REMIND USERS OF THE APPROPRIATE PPE TO WEAR.

Mirror Labels

This pack of 100mm dia. Vinyl labels comes with all 3 part mirror sets below.

Replacement label packs can also be ordered using code 18306.



400 x 1800 18303

400 x 1800 18304

400 x 1800 18305

MIRROR SETS ARE **SUPPLIED WITH 11 SINGLE SAV SAFETY SYMBOLS** TO ENSURE YOUR MESSAGE IS SPECIFIC TO YOUR WORKPLACE.

Safety Mirrors

Safety mirrors are easy to install, unbreakable, lightweight and are able to withstand extremes of weather.

The mirrors, frames and packaging are all manufactured in recyclable materials.

Magnetic Document Pockets

Tough blue PVC wallet with magnetic strip and clear front pocket providing protection for documents and papers.

The magnetic strip at the top adheres to all steel materials.

Supplied in singles

Size	Code
A4 (210 x 297mm)	13657
A5 (210 x 148mm)	13658

Magnetic Wrap-Around Pockets

With looped magnetic tags ideal for fixing to mesh or cages.

Supplied in singles.

Size	Code
A4 (210 x 297mm)	13660
A5 (210 x 148mm)	13661

Magnetic Window Frame

Perfect for use in industrial or commercial environments, these magnetic frames allow documents to be displayed in an easy and eye-catching way.

The edges have a highly effective magnetic pull force and can be applied to any flat steel surface. The design allows for easy insertion and removal of documents without the necessity of moving the frame. However if required simply lift and relocate without the use of nails, screws or adhesive.

Supplied in packs of 10

9kg ABC Powder (55A 233B)	14369

IN THE KNOW

UK fire extinguisher regulations state that you should have a minimum of two 'Class A' extinguishers on every storey of the building.

The 'standard pair' water-based and CO2 fire extinguishers are usually located by exits and fire alarm call-points.
To comply with fire extinguisher regulations, extinguishers should be either fixed to the wall, or attached to a stand.
Fire extinguishers must be commissioned on-site by a competent person. This generally means someone who has passed the BAFE fire extinguisher exam or has an equivalent qualification.

Fire extinguishers are not compliant with UK fire extinguisher legislation until they have been commissioned.
Fire extinguisher regulations state that extinguishers must be serviced annually.

Fire Extinguishers Stands

Robust fully moulded design, these stands are manufactured from impact and chemical resistant plastic. Supplied in sections for easy transportation and assembly.

Free-standing design.

Dimensions (HxWxD):
Single: 645 x 290 x 300mm
Double: 645 x 500 x 300mm
Extinguisher not included.

Description	Code
Single	14370
Double	14371
Retaining Strap	14372

Fire Blankets

A durable single-piece moulded design with large labelled area for maximum impact. Kitemark certified to BSEN 1869:1997.

Description	Code
1 x 1m	14373

spectrum industrial

CONCEPT TO COMPLETION

WE'RE NOT JUST EXPERTS IN SAFETY SOLUTIONS

Whether it's hoarding for the development, way finding signage, site safety signage or signage for the completed building.

WE CAN PROVIDE COMPLETE SIGNAGE SOLUTIONS FOR THE LIFECYCLE OF A BUILDING.
