WES51D

WESD51D

WES51D
The WES51D is an economical soldering station designed to meet the demands of continuous production soldering, rework and repair of through hole and SMT boards, ground planes and multi-layer boards.

Features:

- Wireless temperature lockout.
- Slim, comfortable hand piece to reduce operator fatigue.
- New heater and sensor design that allows for quick heat up and recovery.
- Tip temperature offset capability and temperature lockout come as standard.
- Auto shut off feature to extend tip, iron and station life.
- ESD safe to protect sensitive components.

WESD51D
Has all of the features as the WES51D. Microprocessor controlled with digital LED display allows you to read temperature setting and actual tip temperature.
