Specifications

Eaton 197399

Catalog Number: 197399

Eaton Moeller® series T0 Main switch, 20 A, Single-pole, switch positions: 4, Type: Level switch, Design: 8231

General specifications

Product Name	**Catalog Number**
Eaton Moeller® series T0 Main switch	197399
EAN	**Product Length/Depth**
4015080896500	200 mm
Product Height	**Product Width**
127 mm	150 mm
Product Weight	**Certifications**
1.545 kg	IEC/EN 60947-3 IEC/EN 60947 VDE 0660 IEC/EN 60204

Features & Functions

Number of poles

Single-pole

General

Degree of protection (front side)

IP65

NEMA 12

Electrical rating

Rated uninterrupted current (Iu)

20 A

Actuator

Actuator type

Toggle

Design verification

10.2.2 Corrosion resistance

Meets the product standard's requirements.

10.2.3.1 Verification of thermal stability of enclosures

Meets the product standard's requirements.

10.2.3.2 Verification of resistance of insulating materials to normal heat

Meets the product standard's requirements.

10.2.3.3 Resist. of insul. mat. to abnormal heat/fire by internal elect. effects

Meets the product standard's requirements.

10.2.5 Lifting

Does not apply, since the entire switchgear needs to be evaluated.

10.2.6 Mechanical impact

Does not apply, since the entire switchgear needs to be evaluated.

10.2.7 Inscriptions

Meets the product standard's requirements.

10.3 Degree of protection of assemblies

Does not apply, since the entire switchgear needs to be evaluated.

10.4 Clearances and creepage distances

Meets the product standard's requirements.

10.5 Protection against electric shock

Does not apply, since the entire switchgear needs to be evaluated.

10.6 Incorporation of switching devices and components

Wiring diagrams

eaton-rotary-switches-switch-t0-step-switch-wiring-diagram-008.eps

Does not apply, since the entire switchgear needs to be evaluated.

10.7 Internal electrical circuits and connections

Is the panel builder's responsibility.

10.8 Connections for external conductors

Is the panel builder's responsibility.

10.9.2 Power-frequency electric strength

Is the panel builder's responsibility.

10.9.3 Impulse withstand voltage

Is the panel builder's responsibility.

10.9.4 Testing of enclosures made of insulating material

Is the panel builder's responsibility.

10.10 Temperature rise

The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices.

10.11 Short-circuit rating

Is the panel builder's responsibility. The specifications for the switchgear must be observed.

10.12 Electromagnetic compatibility

Is the panel builder's responsibility. The specifications for the switchgear must be observed.

10.13 Mechanical function

The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.
