

PRODUCT NUMBER: 898

Butoject 898

Butoject® 898 is a highly flexible glove made of butyl rubber manufactured with the environmentally-friendly injection moulding process. This glove is very popular in the field of NBC protection due to its excellent protection against a wide range of chemicals and gases. This glove meet new EN 16-350 antistatic standard.

Overview

Reference Number
898

Product Type
Gloves

Range
Chemical Protection

Line
Heavy chemical

Brand
KCL by Honeywell

Brand formerly known as
KCL

Industry

- Army - Defence
- Aviation
- Chemical Industries

Product Use

- printing industry
- laboratories
- manufacturing of paints and varnishes
- chemical industry
- metal and plastics processing
- recycling and waste disposal
- cleaning and maintenance
- fire brigades and forces

Features & Benefits

Feature
AQL < 0.65 excellent low degradation manufactured by Vulkoject process gastight (meets NATO requirements) loose fit allows gloves to be worn underneath can be re-used after contamination with certain chemicals, after special cleaning process (please consult KCL Laboratories) can be combined with chemical protective clothing

Benefit
very good protection against extremely aggressive and toxic chemicals extremely comfortable very good temperature resistance good mechanical resistance highly airtight

Technical Description

Description
Injected glove in butyl. Rolled edge. Smooth finish. Powdered inside. EN ISO 374-5:2016

Product Technology
Injection molding

Glove/liner color
Black

Coating Type
Butyl

Length
340-360

Thickness
0,7

Harmlessness
In conformity with European standards

Sizes
8,9,10,11

EN 388 - Mechanical Hazards Abrasion Resistance

Abrasion resistance	2
Cutting resistance (Coupe test)	1
Tear resistance	1
Puncture resistance	1
Cutting resistance (TDM test)	X

EN ISO 374-1 Resistance to

Resistance to permeation by chemicals	Type A - BCIKLM

Certifications

EU Category PPE
3

EU Certification
0075/1445/162/11/18/2557
