Supermop Ag

Mop head contains silver to inhibit bacteria growth

Fast & effective cleaning
Ideal for spot mopping, spill pick up or intensive cleaning of small to medium floor areas, including bars, washrooms etc.

Improved Hygiene
The hygienic alternative to conventional cotton mops, with a unique non woven closed structure, now contains silver (Ag ions) anti-bacterial technology.

Independent tests* show it inhibits 99.99% of bacteria growth within the mop.

** Leitat Technological Center, Spain*

New & improved
- New modern print design with Ag symbols
- Contains silver (Ag) anti-bacterial technology
- Zig Zag edges provide excellent absorbency and 30% better dirt pick up.
- Excellent dirt release unlike cotton mops which trap dirt.
- Colour- coded to prevent cross contamination
- Very high resistance to detergents and bleaches

Durable and ergonomic
- Low friction, lightweight non-woven material
- Long lasting, will not shed fibres or unravel
- Easy to wring, releasing water efficiently. Leaves floors drier and back in use faster.
- Machine washable at 60°C but can be washed up to 95°C
- New strong, lightweight 10L oval bucket & colour coded wringer is highly portable and easy to store
- The aluminium handle with improved attachment is lightweight yet robust, making it comfortable to use and easy to clean. Complete with colour coding clips.

TSU	Description	Colour	Size (cm)	Pieces/Case

SuperMop Ag
bucket & wringer

The SuperMop bucket just got even better

New oval design in a pale blue finish, which now compliments the Vileda Professional family of products.

- New bionic wringer
- Colour coded funnels to help prevent cross contamination
- Easy pour spout to dispose of waste water
- Hand grip in the base for easy lifting and pouring
- 10 litre capacity with fill level
- Robust metal handle with ergonomic grip

Time saving

The innovative design of the new bionic wringer applies 360° pressure from all sides providing efficient release of soiled water from the SuperMop Ag mop head. After refilling the bucket, the wringer also ensures that just the correct amount of clean water is retained in the non-woven strands of the mop head for effective mopping.

The mop head releases water more evenly onto the floor during mopping, allowing floors to dry quickly and streak free. Therefore floors are back in use faster.

Durable and ergonomic

- Easy to wring - less force required than conventional socket mops
- Hand grip in the base for easy lifting and pouring
- Strong, lightweight bucket is highly portable and easy to store
- Robust metal handle with ergonomic grip
