raaco has specialised in developing the best, simplest storage systems for industry and professional use all over the world since 1956. Our approach is highly focused and simple. It's all about order. Not just for the multitude of components, tools and small items vital to production, but also in the mind. Order gives overview, control and reassurance, enhancing job satisfaction for everyone.

Room for good ideas that last

When the workplace is tidy, with all the important small items and accessories sorted into the right boxes and compartments, thinking clearly is easier. There's room to see things from a new angle and to achieve even better results. That's how we work ourselves at raaco. And that's why we can continue to develop new, innovative and detailed solutions that last.

Design awards have to be lived up to

raaco has been awarded a host of international and Danish awards for excellent industrial design over the years. Naturally, that's something we are proud of. They also have to be lived up to. That's why we are so particular, setting high standards for the durability, function and details of our systems. We always seek to maintain such standards with regard to ideas, the design itself and choice of materials.

Made in Denmark

raaco is designed and produced in Nykøbing Falster, Denmark, and we are immensely proud that our products generate great interest both in Denmark and abroad. raaco is currently used in over 40 countries, creating order in everything from small enterprises to the Airbus Group, which is among Europe´s biggest companies.

A design for the future, caring for the environment

At raaco, we do a lot to ensure environmentally sustainable product development and operations. In practice, this means that we continuously focus on reducing the company's environmental impact by using robust and recyclable materials, and ensure a robust design and construction of the products.

In these years, we invest heavily in replacing older machines and equipment with less consumption and better working environment as a result.

Certificates
Since 1992, raaco has been ISO 9001 certified and ISO 14001 since 1999 and in 2019 raaco also got the 45001 certification.

You can read our statements and certificates on our website:

THE GLOBAL GOALS
For Sustainable Development

At raaco, we support the UN Global Impact Initiative's 10 principles on human rights, labor rights, the environment and anti-corruption in our efforts for sustainable development.

As a medium-sized production company located on an idyllic island in Denmark, where the main occupation is agriculture, our biggest concern is environmental protection.

We work continuously on various environmental projects using the UN global goals as an inspiration, when focusing on:

Good health and well-being of our workers and surrounding community thru reducing or removing dangerous chemicals in processes, where possible.

Continuously looking for new, "greener" processes and materials we can implement in our manufacturing to reduce energy and water consumption.

Minimizing production waste and discharge of chemicals to groundwater and air.

The energy reducing efforts include implementing new plastic molding machines with more economic energy and water use, installing of LED lightning with sensor switches in warehouses and production units and establishment of powder coating facility in our steel department.

Overall, we reduced our energy consumption with 25% in the last 3 years.

The most noteworthy was the 43% energy reduction in warehouses, due to exchanging old luminaires with fluorescent lamps for new ones with LED lights with motion sensors.

Installing a new powder coating facility gave us a possibility for about 50% reduction of energy, 40% reduction of LPG gas and 25% reduction of water used in the process.

There is no discharge of chemicals to sewage or air and all chemicals are used in closed circulation.

Working environment conditions are much better – the air is free for chemical particles and the noise from the installation is reduced – as attested by measurements conducted by independent specialists.

As ISO 9001/14001/45001 certified company we are continuously working on introducing better, cleaner, more innovative ways to keep our workers in good health, our community clean and our products in excellent quality.

raaco Assortment Boxes

- Create your own system for complete order

raaco compartment boxes consist of Boxxser, CarryLite and Assorters, each of which have their uses according to individual requirements for keeping things in order.

Order creates results
It's reassuring to know that everything is in its place. The compartment box system is designed for use in the workshop, on-site, on the move or for fitting in service vehicles. They bring order in a functional, durable and simple manner. The order you build from the start can be maintained wherever you go which helps create results at work.

raaco inserts - a unique system
Our inserts not only fit our 3 compartment boxes, but are also used in other raaco products. They represent a unique system with infinite variety to meet individual needs for order.

Designed for strength
These compartment boxes are designed for longterm use and strength at work. Strong, impact-resistant clear lids allows you to see where things are. The boxes are made of impact-resistant polycarbonate and polypropylene, materials that are highly durable and strong, with robust hinges that allow the boxes to be used again and again.

Assorter

CarryLite

Assorter

Environmentally-friendly, made from recyclable materials

Assorter is the only one of our 3 assortment boxes, which is available with fixed compartments. Assorter is a system designed and created specifically for practical sorting.

Assorter was developed according to DFD guidelines (Design for Disassembly), which ensures that the box can be disassembled and the parts replaced/reused.

The range is available in many different sizes. Some of the boxes are equipped with U-profiles on the inside of the lid that keep the contents in place during transportation.

"I use my assortment boxes every time I'm working at a customer's premises it gives me good overview, saving me a lot of time and I don't have to go rooting around for things."

Martin Steen,
electrician at Enelco ApS

CarryMore System

- more than just a box!

CarryMore is an intelligent storage and transport system for storing 2 CarryLite 4x8. CarryMore can be stacked and linked together with several CarryMore units.

The capability of front loading makes for easy access regardless of location and without having to move or lift a CarryMore to get to the tools etc. The CarryMore Trolley is designed for easy transport of several CarryMore units stacked together. The trolley enables easy access to the workplace even through narrow passages.

The CarryMore System is made for professional craftsmen and suitable for daily use along the way.

CarryMore

- Connecting lock-mechanism to link together several units
- Top shelf for placement of one CarryMore 4x8 or one ToolBag Pro 16" whilst in use
- Retainers stop the CarryLite boxes from falling out during transportation
- Retaining lock for added security of contents
- Ergonomic handle making it easier and more comfortable to carry

CarryMore Trolley

- Large practical and ergonomic handle which is reinforced with 4 screws
- Large wheels – also suitable for stairs
- The base can be folded and fixed in an upright position using magnets to minimize need for space in the vehicle
- Coupling lock for attaching the CarryMore. This can be set to various heights, depending on how many CarryMore are transported
- An extra workstation on the top of the CarryMore for the placement of 1 CarryLite 4x8 or for storage and transport of 1 ToolBag Pro 16"
- The CarryMore Trolley stores up to 4 CarryMore 55 or 3 CarryMore 80

DEWALT

ToolCase

Designed for unbeatable durability and order

This is a tool case for professionals and discerning users. Overview and functionality are a matter of course. The ToolCase range is a highly robust and strong tool case series made from impact-resistant ABS, with cast aluminium frames. This gives unbeatable strength and durability.

All tool cases are designed for flexible adjustment and replacement of inserts and holders as required. Flexibility and overview are vital to maintaining order during a busy working day.

The series consists of different models - two of which are trolley versions.

"I can't always park close to the customer's address and having a wheeled case is simply fantastic."

Bjarne Ladevig,
Service Engineer, Zolutions ApS.

The ToolCase received the Red Dot Award 2014, the iF design award in 2013 and was nominated for a German Design Award in 2014.

FlightCase

Practical, water and dust proof case

raaco FlightCase is a series of water and dust proof cases, which meet the requirements of ISO IP67.

The cases are made of high grade plastics (PP) which is resistant to chemicals and suitable for use in the majority of environments and in cold weather (-20 C). The piston valve levels out pressure when the cases are transported in air cargo.

The practical and robust design ensures a light-weight case that is easy to clean, protects the surface agains scratches and is stable when standing upwards. You can both sit and stand on your raaco FlightCase. The locks are easy to open and close - even with one hand. The holes attached to top and bottom makes it possible to lock and seal the case.

FlightCase 3

raaco FlightCase 3 is a water and dust proof case. The piston valve levels out pressure when the cases are transported in air cargo. The holes on both top and bottom makes it possible to lock and seal it. The inner space can be adjusted to accommodate the required items with layers of soft foam.

raaco Storage Cabinets

- Order, overview and easy access

Despite the simple design, the cabinets are extremely functional and can hold large quantities of small parts. This makes them a good choice when you want to make the most of your space.

All cabinets have the same width, so that you can easily combine them into larger systems, to get the required overview, saved space, mobility and access.

The shelves are made from galvanized, coated steel, which does not rust, with drawers of durable, transparent plastic, making it easy to identify the contents.

Due to investment in a new, environmental friendly paint plant, the quality of the paintwork of the cabinets itself has been further improved.

You can combine the cabinets with raaco's tool panels and storage boxes, to create a comprehensive system that you can expand as required. Choose between stationary and mobile solutions.

Shelving System

An extremely stable system

Shelving system 450 basically consists of two parts: shelves and posts.

The very sturdy structure means that the individual sections can be assembled without any need for cross bracing. The shelves are mounted with just one screw and one bracket per corner – it couldn't be simpler!

Start with a single section and then add two extra posts and a number of shelves – to get 2 sections. In principle, you can expand your system indefinitely. The more you build, the more stable your shelving will be.

To make the most of your space, combine the shelving with the accessory shelving bins and drawers.

Both drawers and bins have handles for easy carrying. They also have a restraining edge to allow them to be pulled fully out without falling from the shelving. By adding partitions to your drawers, you can sort and mark the contents clearly for each compartment.

raaco has developed several different fixed shelving systems. Before you choose which version you require, you should consider how much your shelving bins need to hold. Then you can find an appropriate solution within the range.

Make the most of your space by using shelving bins and drawers

raaco Bins

Easy access to more content

If you need storage space, but space-saving storage for small parts, raaco's storage bins are the perfect solution.

The open bins give a quick overview and direct access to the contents, so you can work efficiently throughout the day. The storage bins are available in several different sizes and are designed to give easy access to the contents, even with the smallest bins.

You can use raaco's storage bins systems to create customised storage solutions for your workplace.

Before you decide on a solution, you should consider how much space you have available. The turntable and the floor stand only take up little space and can be placed in the middle of the room, while the wall panels require a relatively large amount of wall space.

Choose between stationary and mobile solutions.

raaco SuperClip

Tool Wall Panel/Clips

raaco's SuperClip System is a simple, but truly practical storage system consisting of a perforated panel and various clip varieties. With SuperClip, you can create manageable storage solutions for tools, accessories and much more, so you always have easy access to everything.

The smart clips are made from durable polyacetal and galvanised steel, with high bearing capacity. The clips can be placed anywhere in the perforated panel, attached without using tools with just one touch – and moved again just as easily. Choose between many different types of hooks and holders.

You can use SuperClip on different raaco perforated panel systems. Choose between wall-mounted and free-standing SuperClip systems. The wall-mounted systems can be expanded in horizontal and vertical series, while the free-standing systems can be mobilised with wheels and handles.

raaco Inserts

- create the order and overview you need

With raaco inserts, you can group and sort items to match your own requirements – easy, fast and efficiently.

A world of possibilities
There are 20 insert versions that fit the 3 systems in height, width and depth: Boxxser, CarryLite and Assorter. By using the wide range of inserts, you can organise your raaco product to suit your own requirements – and change it whenever you like. The inserts and contents stay in place, thanks to the special fitting system. The loose inserts also make it easy to get hold of even the smallest items.

Move any insert to where you need to use it. The transparent, high-quality plastic makes it easy to identify the contents and get an overview when time is tight. The inserts are extremely sturdy and tolerant of many different chemicals.

Our inserts can be used across the entire raaco product range. Read more on pages 113 - 127 about which inserts can be used in the various raaco products.

Inserts - system, compatibility and choice

The flexibility and choices don´t just exist within the individual systems, but also between them. The inserts ensure many combinations between the Assorter Boxes in A4, A5 and A6 size, Pocketboxes, CarryLites, Boxxser, Compact, ToolCase and the 250-3 drawers for cabinets.

The wide range of inserts ensures that you can customise your raaco product to suit particular requirements - and just as easily move it again. The inserts and the contents stay in place thanks to a special installation system. Furthermore - it also makes even the smallest items easy to get hold of.

On the following pages there are guides which illustrate, how assortment boxes, drawers, toolboxes and toolcases can be arranged. The type and size of the inserts depends on the product to be arranged.

In the illustrations of the individual insert, a field is marked in grey which indicates how much the insert takes up and how it should be placed.

raaco ESD Products

- Full protection of electronics

Raacostat provides effective anti-static protection of sensitive equipment.

Today, a rapidly increasing number of products, spare parts, tools, etc. are based on electronic components. They are often extremely sensitive to damage caused by static electricity. This damage not only occurs during the actual production process, but also during storage, transportation, etc.

Raacostat is a full range of boxes, toolboxes, cabinets and drawers that provide 100% protection from static electricity. Like all other raaco products, the Raacostat series is also distinguished by many different combination options, to meet almost any individual requirements.

All solutions are made from a special plastic with carbon fibres, which makes them permanently antistatic. This means that there is no reduction of protection over time, or due to intensive use.

Raacostat naturally complies with the EN 61340-5-1 standard and all other international requirements.

Surface resistance 1x10^4 - 1x10^11 Ω.

CREDENTIALS

raaco and order are interrelated
Since 1956, raaco has developed and manufactured innovative, streamlined and space-saving storage systems for both industry and professional craftsmen all over the world.

Philosophy - You create the order and overview you need
raaco's products and storage systems give you possibilities – while you define the solution that suits you best.
The product range is characterised by innovative quality solutions that are easy to use.

Great flexibility with the possibility of:
• individual adjustment of products to match personal needs
• combined use of different products
• construction or expansion of systems over time
