Traffi®

THE HAND PROTECTION **SPECIALISTS**

TGSL1

Ultra lightweight sleeve which provides excellent cut protection to the forearm and past the elbow. Uses the LXT yarn with its triple wrapped steel core to ensure high cut protection whilst maintaining market-leading dexterity and comfort.

Cool and comfortable in hotter working conditions, compared with traditional aramid type sleeves which can be hot, itchy and uncomfortable to wear for extended periods. The green colour works within the Traffi colour system thereby allowing the higher cut protection to be clearly visible from wrist to bicep.

KEY

- Dry
- Wet
- Heat
- Oily
- Cold
- Chemical
