Description: Lightning fast data transfer speeds of up to 600x make Verbatim's Secure Digital Pro UHS-I flash memory cards perfect for use in memory-hungry, high performance digital still and video cameras, as well as other multi-media devices. UHS-I cards can achieve the highest speeds only when paired with a UHS-I device. For devices without the UHS-I interface, the guaranteed maximum data transfer rate for Class 10 will be 10MB/Sec.	**Description:** Class 10 SDHC memory cards have fast data transfer speeds making them ideal for both professional and serious amateur photographers. Compatible with all devices that display the SDHC logo. The class 10 SDXC card with UHS-I bus interface provides read speeds of up to 90MB per second and the exFAT file system enables the card to efficiently organise large data files.	**Description:** Class 4 SDHC memory cards designed for use in devices such as digital cameras and camcorders. The cards are compatible with all devices that display the SD logo or have an SD slot.	**Description:** MicroSDHC memory cards have a higher capacity and faster data transfer speed than microSD memory cards. Designed especially for mobile phones, this memory card consumes very little power, which helps to preserve the battery life of your mobile phone. MicroSDHC memory cards are compatible with devices which display the microSDHC logo.	**Description:** Class 4 microSD/SDHC memory cards enable you to store more of your photos, videos, ring tones and music from your mobile phone. Designed especially for mobile phones, this tiny memory card consumes very little power, therefore preserving the battery life of your mobile phone. MicroSD memory cards are compatible with devices which display the MicroSD logo.	**Description:** CompactFlash memory cards are ideal for use in digital cameras, MP3 players and PDA's. They are fully erasable so can be used many times over for accurate picture and music storage. CompactFlash memory cards are compatible with devices which display the CompactFlash logo.	**Description:** Memory Card Compatibility: CompactFlash (Type I and II) IBM Microdrive SecureDigital SDHC / SDXC miniSD microSD microSDHC Multimedia card RS-MMC MMCmicro* Memory Stick Memory Stick PRO Memory Stick Duo Memory Stick PRO Duo Memory Stick Micro SmartMedia Card xD Picture Card	**Description:** Transform your laptop or PC's internal hard drive to a state of the art high performance SATA III Solid State Drive. Verbatim's solid state drives offer improved system and application performance, 100% silent operation, longer battery life time for laptops, and are shock resistant SATA 6Gb/s Native Command Queuing (NCQ) SATA III is backward compatible with SATA II and SATA I	**Description:** Compact, lightweight and housed in a sleek black, credit card size enclosure, Verbatim's USB3.0 External SSD is ideal for users that demand maximum performance in data storage devices. With USB 3.0 connectivity it handles large data transfers quickly - perfect for video editing, interchanging large amounts of data or maximizing gaming performance. Operates silently and features low power consumption for extending laptop battery life.
Target Customer: Semi-professional video makers / photographers.	**Target Customer:** High volume digital camera users.	**Target Customer:** Regular digital camera/ camcorder users.	**Target Customer:** All mobile phone users seeking higher performance storage.	**Target Customer:** All mobile phone users.	**Target Customer:** Users of traditional SLR cameras with a compatibility slot.	**Target Customer:** Memory Card Reader is compatible with memory cards used in digital cameras, mobile phones, camcorders and PDA's	**Target Customer:** Desktop/Laptop users.	**Target Customer:** Netbook/laptop users.
Special Features: Very fast.	**Special Features:** High capacities available.	**Special Features:** Standard SD cards.	**Special Features:** Fast data transfer speeds. High capacities available. Available in Class 4 &10.	**Special Features:** Standard MicroSD card.	**Special Features:** Compact Flash format to support SLR cameras.	**Special Features:** 5 Slot Reader for 19 different Memory Cards.	**Special Features:** High Speed: Reading up to 550MB/sec and writing up to 510MB/sec	**Special Features:** Highspeed: reading up to 265MB/sec and writing up to 225MB/sec.
