

TAT Liquid Stamp HD

Marking stamp for identification

TBS -

LSHDA

For marking dark coloured materials

Single-touch

Low cost

Environmentally friendly ink

Liquid Stamp HD is a self-inking stamp capable of continuously marking on a wide range of materials, including metal, plastic and rubber.

It is capable of clear markings on dark coloured materials and uneven surfaces, and can be used instead of a paint marker as an identification stamp. Simple operation, Liquid Stamp HD increases productivity.

Features

Point 01

Reliable quality even when used continuously

The liquid type mechanism transfers just the right amount of ink to the impression die each time, so that impressions do not become fuzzy even when used continuously.

A single ink tank allows for approximately 1,600 continuous markings.

The airtight structure helps prevent the stamp from drying out when not in use, and helps prevent impression from becoming blurry even during extensive use.

Point 02

Capable of marking uneven surfaces

The impression die is soft, allowing for clear markings even on uneven surfaces of around 1 mm in depth.

It uses special ink, allowing for clear markings even on dark colours including black, and can be used to stamp a wide range of materials including metal, plastic, rubber, glass, wood and leather.

Point 03

Simple operation, increased productivity

Marking is easy. Simply align the end of the stamp with the marking point, and press down.

Quicker and cleaner than drawing circles using a conventional paint marker.

Point 04

Uses highly safe ink

The stamp uses ink compliant with Export Trade Control Order regulations, the Ozone Layer Protection Act, RoHS directives and ELV regulations for safe to use.

Specifications

External dimensions:

W25.7 mm × D26.5 mm × H118.3 mm (when not in use)

W25.7 mm × D26.5 mm × H96.1 mm (when stamping)

Max. impression size:

Φ10.5 mm (impression die size approx. Φ12 mm)

Stamping stroke: Approx. 22.2 mm

Weight: Approx. 26 g (without ink)

Ink tank volume: 4 ml

Compatible ink: *Dedicated ink (sold separately)

* No ink is provided with the product

* Use the special refill ink for Liquid Stamp HD

Continuous impressions:

* Approx. 1,600 times

* Ink volume: 4 ml

* Surface: PET film

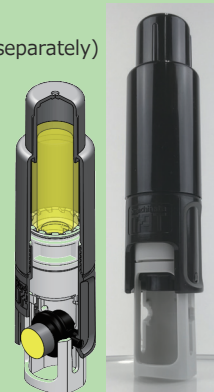

* Under conditions of 20°C, 65% humidity, stamping downward vertically

Impression drying time:

* Approx. 4 to 5 minutes

* Surface: Rubber sheet

* Under conditions of 20°C, 65% humidity

Stamp samples

Impression size:

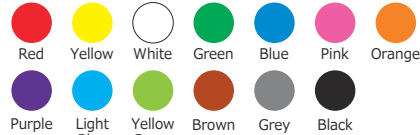

Φ10.5 mm

(Actual size)

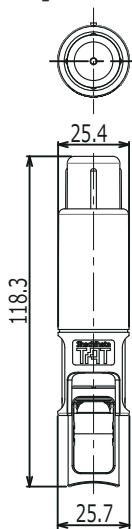

13 Colours
