Touchstone™

Choose the level of protection to match your needs

Touchstone™ from Polyco is a knitted glove made with 100% Kevlar® aramid fibre.

Kevlar® has an inherent strength protecting against cuts, slashes and abrasion, and is heat retardant making it very practical in industries where burn protection is required. Offering a high cut resistance to weight ratio, the Touchstone™ is available in three different weights allowing the user to select the level of protection required. Delivering exceptional performance, it is seamless, soft and extremely comfortable, which allows for prolonged use without causing irritation. The close fitting design also makes it extremely dextrous. It is machine washable, can be dry cleaned and is ambidextrous, which all contribute to increased longevity.
