DATASHEET

Chrome/Leather Apron With Ties, 24x36" Grey

Protective arm sleeve designed for welding tasks where sparks and molten spatter are present, helping shield the forearm during fabrication and repair work. 450 mm in length.

Features and Benefits

- Chrome leather construction resists welding spatter and sparks to protect the torso during hot work
- Kevlar stitching increases tear resistance for longer service life under repeated stress
- Buckle fastening system allows quick fitting and secure adjustment for efficient use on the job

Order Code
