TECHNICAL SHEET

HALF-ROUND FILE BI-MATERIAL HANDLE Réf.: 0910158101

Caracteristics

MANUFACTURING QUALITY 30 years ago, the MOB Group acquired TALABOT, Europe's leading manufacturer of files and rasps. TALABOT's files are characterized by a long cutting life thanks to the high carbon content of the steel (1.3 to 1.4%). It is alloyed with chromium to obtain a powerful bite. MOB checks the chemical composition of its steels every time they are cast. Perfect mastery of hardening, a crucial operation for cutting quality, guarantees file hardnesses of 65±2 HRC. MOB files comply with the NF E 75 001-75 002 standard. Dimensions : Files are defined by their length (excluding the tang) in mm, and their size: bastard for roughing, semi-soft for filing, and soft for finishing. Bi-material handle: Polypropylene, for strength and relief for precision work, and elastomer, for flexibility and comfort - limits perspiration and overheating of the hand.
