KVM SWITCHES

4 Port KVM Switch - SVGA & PS/2 or USB

The Hybrid KVM CPU Switch Box allows you to access PS/2 equipped computers (up to a maximum of 3) and USB equipped computers (up to a maximum of 4) from one PS/2 Keyboard, PS/2 Mouse and VGA Monitor.

There is no interface card or software to configure. Installation is as easy as connecting cables between the CPU Switch and your computers. Operation is as simple as pressing buttons, entering hot-key command and navigating through the user-friendly on-screen menu (available on models with OSD support).

The Hybrid KVM CPU Switch is independent of computer operating systems, allowing the attached computers to run different Operating Systems or Applications.

Specification
