

Photographs Really Matter

When you ask people what possessions they would rescue from their burning house, one of the most frequent answers is the photograph album or the computer or storage device with their digital images saved on them. When in panic mode it's interesting that we would probably grab photos rather than valuable jewellery.

Photographs preserve the important moments, events and people in our lives. The ceremonies of birth and birthdays, marriages and anniversaries, holidays and new houses are all recorded because they matter. Photographs are our personal story, a timeline of our lives filled with faces and places that we love.

How you capture, save and take care of these photos is therefore pretty important. Shouldn't you be using technology you can trust?
