

PRIMEX
ABRASIVES' SIGNATURE

FR928 **ZIRCOFIBRE**

For high alloyed steels

APPLICATIONS

- Used for operations which require an important cutting power (welds snagging and blending, rust scouring...) on ferrous and non ferrous metals, but also on high alloyed steels.
- Important agressiveness in time with a constant power.

INOX

AVAILABLE SHAPES

Disc
Must be used with backing pads.

TECHNICAL DATA

- Backing: **reinforced fiber backing**
- Bonding: **resin**
- Grain: **zirconium carbide**
- Grit: **P36 to P80**

FIBER DISCS have a backing which is composed of several impregnated papers, which makes it very tear resistant. **They are used with grinders for deburring, polishing or finishing any metal or other material.** Fibre discs are neither flexible or water resistant.
