4-port USB 3.2 Gen 2 Type-C® hub

Enough ports for your devices

The hub expands one USB Type-C® port to 4 USB Type-C® 3.2 Gen 2 ports, which offer the user a data transfer rate of up to 10 Gbit/s. In addition, one device can be charged with up to 20 watts via the lowest port of the hub.

Maximum overview, minimal effort

The display always shows you which ports are currently in use and how much current is being transferred via the 20 watt Power Delivery port during charging. Devices such as smartphones, tablets, and storages can easily be connected and exchanged via Plug & Play.

Direct power supply

The enclosed power supply unit with 24 watts is responsible for a reliable power supply. This means that all 4 ports, including the charging function, can be used simultaneously. (Attention: To use the full function of the hub, you need a power connection).
