PMFA

Fan Filter Assemblies

ebmpapst

engineering a better life

A family of filters for use with ebm-papst compact axial fans. All filter assemblies mount directly on to existing mounting holes. The assembly consists of three parts, an outer grill cover, an internal fixing plate and replaceable filter pad.

	Fan size	A	B	C	D	Weight	Replacement filter
Part Number	mm	mm	mm	mm	mm	g	
PMFA60L	60	65	65	13.5	N/A	30	FP60L
PMFA80	80	125	105	17.5	71.5	100	FP80
PMFA90	92	125	105	17.5	82.5	100	FP80
PMFA120	119	162	135	18.5	104.8	150	FP120
PMFA160	150/172 Ø	225	190	19.5	162	300	FP160

Key Features
- Tough, durable construction.
- Utilises hole fixing positions on most ebm-papst compact fans.
- Filter pad can be changed without switching off fan.

Materials
- Outer cover: ABS plastic FR in black.
- Mounting plate: Galvanised steel, plastic coated.
- Filter pad: 100% polyester.

Notes
- A reduction of airflow of around 20 – 30% can be expected with a clean filter fitted.
- Not suitable for use with S-Force models.
- Filter class G3 according to EN 779 and EN 1822 and fire behaviour class F1.
- Replacement filters are supplied in packs of 5.

RoHS Statement
All PMFA filter assemblies comply with current RoHS requirements as specified in the relevant UK Statutory Instrument and EU RoHS Directives. For further details please contact ebm-papst UK Ltd.
