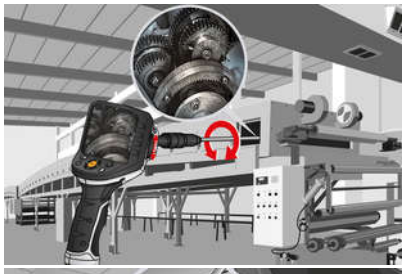
VideoFlex G4 Fix

Professional video inspection system with rotating microcamera

This professional video inspection system has a rotating microcamera for inspecting extremely small openings such as in pipes, motor vehicles and masonry. The efficient LED object lighting ensures reliable image capture, even in poor conditions. The true colour reproduction provides an extremely realistic image and details can be clearly captured using the zoom function. The ergonomically designed device fits well in the hand and is also comfortable to use, even after extended periods of work. With eight languages and an exchangeable camera unit, this device can be used in many different application areas. Images and videos can be saved on an SD memory card and analysed via the USB-C interface.



- **Effective problem localisation behind or in objects, walls, pipes, cavities**
- **40 cm long stainless steel guide**
- **4 high-performance LEDs for powerful object lighting at the camera**
- **Range of installation options due to exchangeable camera unit**
- **True colours for highly realistic image**
- **Device fits well in the hand due to ergonomic design**
- **The images can be stored for analysis and documentation**

TECHNICAL SPECIFICATIONS
