FENCING MAUL WITH FIBREGLASSHANDLE 12lb

DATA SHEET
KEN-522-9519D

This 12lb fencing maul was built for strength, control, and comfort, ideal for driving wooden or metal fence posts into the ground but requiring minimal effort. Designed for use in agricultural, landscaping, and fencing work, the maul features a forged head for impact strength and a fibreglass handle with a soft grip for shock resistance and added user comfort during prolonged use.

Features and Benefits

- 12lb forged head provides high-impact force to drive fence posts securely into the ground with fewer strikes
- Fibreglass handle construction offers excellent strength-to-weight ratio, absorbing shock and reducing vibration
- Soft grip handle improves handling comfort and reduces fatigue, particularly during extended use in demanding environments
- Shock-resistant design minimises jarring on impact to protect the user's hands and wrists when striking hardened or resistant ground
