STAINLESS STEEL EDGING IRON WITHWOODEN HANDLE 1100x215x30mm

DATA SHEET
KEN-522-9561F

The Stainless Steel Edging Iron with Wooden Handle is a versatile gardening tool designed for creating clean, defined edges along garden beds, lawns, and pathways. The durable stainless steel blade ensures excellent strength and resistance to rust, providing long-lasting performance even with frequent use. The wooden handle offers a comfortable grip, allowing for better control and reducing hand strain. Its sharp, straight edge makes it easy to cut through soil and turf, ensuring precise and tidy garden edges. With its robust construction, this edging iron is ideal for gardeners looking to enhance the appearance of their outdoor spaces with minimal effort and maximum efficiency.

Features and Benefits

- Durable stainless steel blade for strength and rust resistance
- Wooden handle offers a comfortable grip for improved control
- Sharp, straight edge allows for precise cutting through soil and turf
- Ideal for creating clean, defined edges along garden beds and pathways
- Robust construction ensures long-lasting performance
- Perfect for enhancing the appearance of garden spaces
- Helps reduce hand strain during use for greater comfort

Notes

- Dimensions: 1100x215x30mm
