STAINLESS STEEL MIDI HANDLE DANDELION WEEDER 500x45x40mm

DATA SHEET
KEN-522-9561J

The Stainless Steel Midi Handle Dandelion Weeder is a specialised gardening tool designed for efficiently removing dandelions and other deep-rooted weeds from lawns and garden beds. The durable stainless steel fork ensures strength and resistance to rust, providing long-lasting performance. Its slim, pointed prongs allow for easy penetration into the soil, enabling the precise extraction of weeds without disturbing surrounding plants. The ergonomic midi handle offers a comfortable, secure grip, reducing hand strain during extended use. Ideal for gardeners looking for a reliable, easy-to-use tool for tackling stubborn weeds, this weeder combines precision, durability, and comfort for optimal results.

Features and Benefits

- Durable stainless steel fork for strength and rust resistance
- Slim, pointed prongs for easy penetration and precise weed extraction
- Ergonomic midi handle provides a comfortable, secure grip
- Ideal for removing dandelions and deep-rooted weeds from garden beds and lawns
- Long-lasting performance even with frequent use
- Allows for targeted weed removal without disturbing surrounding plants
- Designed to reduce hand strain during extended gardening tasks
