4-28mm Cable Stripper With Hook

Kennedy Stripping Tools enable the precise, fast and safe stripping of all common round cables. The product family of cable strippers includes different types featuring different additional functions and thus meeting the individual application requirements of their users.

The Cable Stripper S 4 -28 enables precise, fast and safe stripping of all common round cables with a diameter between 4 and 28 millimetres. Thanks to the adjustment screw in the housing, the cutting depth of the knife can be set with an infinitely variable range. This prevents damaging the inner conductor. The cutting blade is integrated in the housing and self-rotating, thus enabling the automatic adjustment from circular to longitudinal cutting. In addition, a hook blade has been integrated into the S 4 -28, which can be retracted into the housing. The blade is lockable in both positions. This leads to a significant reduction in the risk of injury that fixed blades bring with them.

Cable type	PVC insulation
Application area	outer diameter 4 - 28 mm
Additional use	Retractable hook blade
Material	fibreglass-reinforced polyamide
Inner blade	adjustable + replaceable
Additional value	Retractable hook blade
Approval / certificate	Safety tested by TÜV NORD
Weight	70 g
Length	145 mm
Approvals / Guidelines	
IMPA Code	815257

Note: Tool not to be used on live cables or conductors

4-28mm Cable Stripper With Hook

Cable Stripper With Hook

1. Open cable-holder and insert cable. Press sheath against swivel-blade and close cable-holder.
2. Make 1 or 2 full turns.
3. Then pull for longitudinal cut and peel away sheath.
4. Adjust stripping depth by turning screw at the bottom of the handle.
