ATOMIK WH PTS

New, technologically advanced, injection moulded, high thickness Polypropylene tool case on wheels, fitted so that the travelling position is with horizontal case. This type of material makes the case extremely resistant against chemical corrosion, shock, high and low temperature. The injection technique ensures constant material thickness, even in the corners. Large and thick aluminium trim, makes the case ideal for daily, heavy-duty use. The new design of the shell and the interiors characterizes by a modern and functional look, representing the constant innovation research.
