KENNEDY®

# PROFESSIONAL WHEELED TOOL CASE 46x35x25.5(H)cm (INTERNAL)

DATA SHEET
KEN-593-9974T

Designed for professionals, this high-performance tool case offers superior protection and convenience. Made from injection-moulded, high-thickness polypropylene, it resists chemical corrosion, shocks and extreme temperatures. With a reinforced structure, secure metal locks and smooth-rolling wheels, it ensures safe and easy transport of valuable tools. Perfect for technicians, installers and service engineers.

**Features and Benefits**

- Technologically advanced, heavy-duty polypropylene construction
- Highly resistant to chemicals, impact and temperature extremes
- Secure metal locks with keys and reinforced metal hinges
- Two metal lid safety support stays for added stability
- Spacious bottom area with adjustable and removable dividers
- Ergonomic handle with a comfortable rubber-coated grip
- Organised storage with a document lid area and tool panels with loops
- Optional third panel for additional tool storage
- Customisable with an address label for easy identification
- Ideal for professionals needing reliable tool transport
