Technical sheet

PPC3001B

One-piece plastic sign post with empty base - white

This is a premium monobloc marking post, designed for easy and flexible area demarcation, whether it's for a temporary or permanent purpose. Crafted from robust ABS and polypropylene materials, this post's base can be weighted with water or sand. It features two rings, one with holes and the other with hooks, allowing you to attach chains in four different directions. Additionally, it has a threaded top for mounting information signs. You can select from a range of colours. Please be aware that chains and information signs are sold separately.
