TAPER SAW FILE REGULAR SECOND CUT

Taper saw file designed for sharpening and maintaining hand saws with 60° tooth angles. The tapered profile allows easy access between saw teeth, while the single cut pattern delivers smooth, controlled material removal for accurate sharpening. Points left uncut for precise filing control.

Features and Benefits

- Designed for sharpening hand saws with 60° tooth angles
- Tapered shape provides easy access between teeth
- Single cut teeth deliver controlled and consistent filing
- Regular second cut suits general sharpening tasks
- Durable construction offers long service life
