ISO6/DIN4980 CRANKED KNIFE TOOL 10 x 10 RH K20

These cranked knife brazed turning tools are carbide tipped and designed for external turning, profiling and general machining on conventional lathes. Manufactured to ISO6/DIN4980 standards, these tools deliver consistent geometry, reliable chip control and dependable cutting performance in workshop and production environments. With right-hand and left-hand variants in multiple shank sizes, these brazed tools support stable cutting and a quality surface finish.

Features and Benefits

- ISO6/DIN4980 standard design ensures consistent tool geometry and dependable machining accuracy
- Cranked knife profile supports effective external turning and profiling operations
- Brazed carbide tip construction enhances durability and long
- service life
- Right-hand and left-hand options increase versatility across different lathe setups
