KENNEDY®

Order Code:
KEN-107-1546M

AI22 INTERNAL ANVIL SIZE 22

These Internal Anvils are designed for Kennedy threading toolholders using size 16 and 22 inserts. These replacement components maintain accurate insert alignment and stable cutting conditions, ensuring consistent internal thread quality. They are commonly used in CNC machining, lathe work, and metalworking and they offer a cost-effective way to restore toolholder performance without full replacement.

Features and Benefits
- Fits Kennedy internal threading toolholders (size 16 and 22)
- Reduces vibration and improves cutting consistency
- Extends toolholder lifespan without full replacement
- Quick, direct-fit replacement for worn anvils
