S16S SIZE 16S INSERT SCREW

Insert screws for Kennedy threading toolholders ensure that cutting inserts stay securely in place during demanding operations. Designed to replace worn or damaged screws, they help prevent downtime and maintain threading accuracy. They are suitable for CNC machining, maintenance, and general engineering and they are built to original specifications for a precise fit and reliable performance.

Features and Benefits
- Secures inserts under heavy cutting forces
- Maintains consistent thread quality
- Durable and easy to replace on-site
- Keeps production moving with minimal disruption
