22 x 20mm AL/OX SANDING BANDS GRIT 150

Kennedy PRO Aluminium Oxide Sanding Bands deliver dependable performance for a wide range of finishing tasks on contoured or flat surfaces. Manufactured using high-grade aluminium oxide grain, these bands are designed for use with rotary hand tools and are ideal for deburring, grinding, blending, and polishing. Built to withstand edge work and tough material removal, they offer long-lasting durability while producing a clean, consistent finish. Suitable for professional and industrial use, these sanding bands ensure reliable results every time.

Features and Benefits

- High grade aluminium oxide grain for reliable cutting performance
- Removes surface defects, machining marks, oxidisation, and weld spatter
- Delivers consistent results on flat or contoured surfaces
- Durable construction ideal for edge work and extended use
- Suitable for deburring, grinding, blending, and polishing applications
- Designed for use with rotary hand tools in precision finishing
