30 x 20mm ZIRC SANDING BANDS GRIT 50

Kennedy PRO Zirconium Sanding Bands are high-performance abrasive sleeves designed for use with rotary hand tools in demanding finishing applications. Manufactured with premium-grade zirconium grain and an aluminium oxide coating, they deliver consistent, precise results across a range of tasks including deburring, grinding, blending, and polishing. Ideal for contoured and irregular surfaces, these sanding bands offer excellent durability, making them a reliable choice for both flat and shaped workpieces. Suitable for professional use, they are built to handle tough edge work and remove surface defects with ease.

Features and Benefits

- High grade zirconium grain for aggressive cutting action
- Aluminium oxide coating for enhanced wear resistance
- Ideal for removing surface defects, oxidisation, weld spatter, and machining marks
- Effective on flat or contoured surfaces
- Durable construction for extended use
- Reliable performance in deburring, grinding, blending, and polishing tasks
- Suitable for use with rotary hand tools for precision finishing
