NON-WOVEN RAPID PREP FLAP DISC 115mm COARSE

These Ceramic Flap Discs are premium-grade abrasive tools designed for efficient, high-performance grinding on steel and stainless steel surfaces. Featuring a high-density ceramic grain on a durable polycotton cloth backing, these flap discs offer rapid material removal, exceptional durability, and a long service life. Their sharp, self-sharpening ceramic structure ensures consistent cutting performance over time, even under moderate to high pressure. Ideal for flat or contoured surfaces, these discs maintain a cool grinding temperature, making them especially suitable for stainless steel.

Features and Benefits

- High-density ceramic grain provides aggressive cutting action for faster material removal
- Polycotton cloth backing combines flexibility with strength for a smooth, stable grind
- Self-sharpening ceramic minerals maintain cutting efficiency over extended use
- Cool grinding design reduces heat build-up, ideal for stainless and sensitive alloys
- Durable polyester construction is designed for tough edge work and high-pressure tasks
- Extended disc life reduces the requirement for disc changes, lowering downtime and cost
