

Circular saw blade for aluminium and other non-ferrous metals

This premium circular saw blade for professional users is ideal for straight cuts in non-ferrous metals such as aluminium, copper or brass.

The special tooth geometry ensures minimal cutting forces and prevents high temperatures from developing, making excellent results possible when dry cutting non-ferrous metals. |The grade of carbide specially selected for machining aluminium ensures consistently outstanding cutting quality over a long service life. |The saw blade geometry is designed for sawing solid profiles. |Since less power is needed, a longer battery life is possible thanks to a very narrow cutting line in combination with the F-IRON Cut 57 AS.

Product number: 6 35 02 306 00 0

Technical data

TECHNICAL DATA

Material	HM (carbide)
Saw blade Ø	150 mm
Teeth	32
Cutting width	1.6 mm

Suitable for the following tools

- F-IRON Cut 57 AS
- F-IRON Cut 57 AS Set 2 x 8 Ah
