Digital Protractor

Digital Protractor delivers accurate and reliable angle measurement across a full 360° range. Designed for precision and ease of use, it features an intelligent display, instant level sensing and a durable build.

Features and Benefits

- 360° measurement range divided into four 90° quadrants for versatility
- Absolute level sensor instantly available with no manual calibration required
- Intelligent display automatically adjusts orientation at 90° and 270° for clear readability
- V groove on top and bottom for secure placement on acute angled or cylindrical objects
- Simple calibration and user-friendly controls for efficient operation
- Display always reads upright regardless of orientation for ease of use
- Powered by two 1.5V alkaline batteries with more than 100 hours continuous runtime

Type	Digital Protractor
Size	162(L) x 60(H) x 33(W) mm
Material	Plastic/Aluminium
Accuracy	0.1 °
Additional Features	IP65
Resolution	0.05 °
Weight	260g
