HORIZONTAL AND VERTICAL ROTARY TABLE DIA 200mm

These Horizontal and Vertical Rotary Tables are designed for precision machining, offering reliable performance in milling, boring, circle cutting and spot facing. Built for versatility, they ensure accurate positioning and smooth operation when handling complex work. With excellent flatness, parallelism and runout control, they provide durability and safety in demanding workshop environments.

Features and Benefits

- Suitable for index boring, milling, circle cutting, spot facing and hole boring
- Straightness of table surface 0.02 per 300 mm for high accuracy
- Axial runout of table surface 0.02 mm ensures precise machining
- Parallelism between table surface and base 0.02 per 300 mm for stability
- Available in diameters 200 mm, 250 mm or 300 mm to suit application needs
