A breath of lightness flows through filing with the Exacompta's Aquarel Pastel range. Part of this range is this expandng spine multipart file, made in France, best sellers in office and school.
The Harmonika multipart file is much stronger and more convenient to use than a polypropylene file. It opens completely flat, which makes it easy to see documents. In addition, its reinforced tabs are resistant to wear and tear.
With its expanding spine, its filing capacity is much greater: 350 sheets for the 7 part file.
The elasticated closure makes it possible to compress the sheets well and to easily carry large volumes of documents.
The headings of the different sections can be noted on the cover. Without plastic, this multipart fle does not lack ingenuity to help you in your daily life.
