haaga 255

Order No.: 102887

Equipment & Application

- Very compact and maneuverable sweeper, ideal for narrow areas and for private use.
- **Unique disc brush system -** special counter-rotating disc brushes cut below the waste und push it directly into the collecting tank.
- The **lateral guide rollers** makes sweeping close to the edge possible and allows sweeping along kerbstones or walls und protect this areas and the machine.
- The disc brushes, which protrude on both sides, ensure even greater sweeping performance.
- **Brush height adjustment**: infinitely variable for optimal sweeping on various grounds such as asphalt, concrete, slaps or for damp leaves, sand, uneven surfaces.
- Push handle with soft grip for comfortable handling.
- High-quality and long-lasting disc brushes:
  4 years warranty on brush wear.

Technical data

Operating principle	Disc brush direct drive 2 x disc brushes
Brush drive	manual
Sweeping width	55 cm
Dirt container capacity (max.)	20 liters
Sweeping performance	1.600 m²/h
Weight	5,3 kg
