DATA SHEET

Product Code: KEN5051620K
Brand : Kennedy

6x150mm FLAT COLD CHISEL

Product Information :

Used for cutting and chipping cold metals and brickwork, these flat cold chisels are designed to exert force with precision. Manufactured from high quality octagonal chrome vanadium steel and finished with a ground cutting edge, the product is available in a range of sizes to suit your application.

Features and Benefits
- Manufactured from high quality chrome vanadium steel for maximum durability
- Available in a range of sizes to best suit your requirements
- Octagonal design allows you to have better grip to deliver more force when using
- Ground cutting edge is designed to hold its point even with extensive use

Typical Applications
- Engineering
- Automotive
- Construction

Standards
- ASME B107.47M-1998

EAN Code - 5036140109681

PRODUCT ATTRIBUTES

Blade Material	- Steel
Blade Width	- 6mm
End Type	- Flat
Handle Material	- Steel
Overall Length	- 150mm
Product Type	- Cold Chisel
Shank Shape	- Octagonal
