DATA SHEET

Centre Finder Set - 5 Pieces

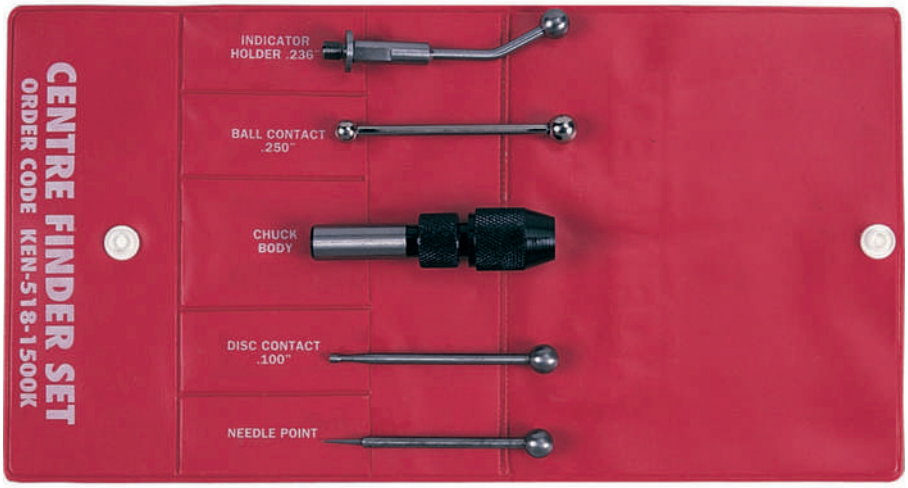

Comprised of a chuck body and four contact arms, this edge and centre finder set is designed to check 'run-out' or concentricity, straightness and alignment. The components will indicate the position of a datum point on a component or fixture from the centre line of a machine spindle. Suitable for use on drill presses, lathes, milling machines, borers and similar applications.

Features and Benefits

- Ground, hardened and polished contact arms ensure highly accurate centre locating
- Quick change "snap fit" body and arms to easily change your component when needed
- Supplied in a plastic wallet to effectively store and organise your tools
- Unique design universal indicator holder

Technical Specifications:

- Tip material: Steel
- Stem type: Ball-ended
- Diameter: 0.1".
- Shank diameter: 0236"
- Length: 75mm

Typical Applications

- Automotive
- Engineering
- Manufacturing

Set contains:

1x Indicator holder 0.236" x 60mm
1x Ball contact 0.250"x 63mm
1x Disk contact 0.100" x 65mm
