Technical sheet

BSF100AISI

Stainless steel chain post to embed

A bollard for marking boundaries easily, either temporarily or permanently. The bollard can be securely embedded directly into the ground or used with bases to make it removable. Made of stainless steel, it features two levels for hanging chains in four possible directions and a threaded top for attaching information signs. It comes with 2 hooks for chains and is available in various colors. Chains and barriers are sold separately.
