KENNEDY
QUALITY INDUSTRIAL TOOLING

DATA SHEET

10L Paint Kettle

Made from high quality polypropylene and suitable for use with all types of paint, this robust plastic paint kettle is suitable for use in many applications holding liquids, compounds, fasteners and fixings. The tapered design allows for stacking and easy storage. Supplied as standard with plastic handle and without lid (sold separately, see KEN-533-1579K).

Features and Benefits

- Manufactured from durable polypropylene which is resistant to corrosion as well as general wear and tear
- Tapered design makes the products stackable for ease of storage
- With a plastic handle to aid you in transporting paint

Technical Specification

- Material: Plastic
- Capacity: 10L

Typical Applications

- Ideal for use when mixing, storing and decanting paint for industrial use
