INSULATED ADJUSTABLE WRENCH - 200mm

This Insulated Adjustable Wrench is designed for safe and versatile use when working on live or energised electrical systems. Certified to VDE IEC 60900:2018, it provides insulation protection up to 1000V AC / 1500V DC, ensuring user safety while maintaining mechanical strength and precision. Its adjustable jaw allows easy adaptation to multiple fastener sizes, reducing the need to switch tools during electrical or mechanical maintenance. The precision-machined jaws offer a secure grip on nuts, bolts, and fittings, preventing slippage or rounding. Featuring double-layer insulated handles for maximum shock protection and ergonomic comfort, this wrench is ideal for use in electrical environments.

Features and Benefits
- Adjustable jaw design accommodates multiple fastener sizes, improving versatility and efficiency
- Precision-machined jaws provide a firm, non-slip grip on hexagonal or flat fasteners
- Double-layer insulated handle prevents electric shock while offering a comfortable, secure hold
- Corrosion-resistant finish enhances tool durability in demanding electrical and industrial environments
- Compact 200mm length allows for easy access in confined or high-density electrical panels
