INSULATED VDE TOOL SET 17 PCS FOAM 2 (OUR OWN CABINET - KEN-594-5580K)

This insulated VDE tool foam insert forms part of a modular 114-piece VDE tool system, designed for safe professional work on live electrical installations. Supplied as one of several individual foam layouts to suit the KEN5945580K cabinet, this set focuses on insulated nut drivers and hex keys commonly used in electrical panel building, maintenance and industrial servicing. All tools are VDE tested and certified to IEC 60900, providing reliable protection up to 1000V AC. The foam insert ensures clear organisation, fast tool identification and secure storage, supporting safe and efficient workflows in electrical, industrial and infrastructure environments.

Features and Benefits

- VDE-certified ensuring safe use on live electrical systems up to 1000V AC
- Foam insert provides secure storage, clear visibility and fast tool checks
- Comprehensive nut driver range supports common terminal, busbar and enclosure fastening tasks
- Insulated hex keys enable safe adjustment of internal-drive fasteners in control panels and machinery
- Modular system compatibility allows integration with other foam inserts to build the full 114-piece cabinet set
