INSULATED CABLE KNIFE 200mm STRAIGHT BLADE

The Insulated Straight Blade Cable Knife is purpose-built for professional electricians working on live or energised systems. Certified to VDE IEC 60900:2018, it provides 1000V AC / 1500V DC insulation, protecting users from electric shock while ensuring precision and control during cable cutting or stripping tasks. The straight, precision-ground blade allows clean, accurate cuts through copper and aluminium conductors, while the durable insulation prevents current transfer even in confined electrical spaces. Designed with ergonomic, slip-resistant handles, it reduces hand fatigue and enhances control during repetitive use.

Features and Benefits
- 1000V VDE insulation protects against electric shock when cutting or stripping live conductors
- Precision-ground straight blade delivers clean, accurate cuts without damaging cable cores
- Durable, double-layer insulation prevents current transfer while maintaining tool strength
- Ergonomic, slip-resistant grip improves comfort and reduces fatigue during prolonged use
- Optimised 200mm length provides balance and leverage for controlled cutting performance
- Corrosion-resistant steel blade ensures lasting sharpness and reliability
