INSULATED TORQUE WRENCH - ¼"-5-25NM

These Insulated Torque Wrenches provide safe and precise torque control for professionals working on live electrical systems. Certified to VDE IEC 60900:2018, they are rated for up to 1000V AC / 1500V DC, protecting users against electrical shock and short circuits. Their adjustable torque mechanism delivers ±3% accuracy, ensuring fasteners are tightened to specification without damaging components. The audible and tactile click-stop indicator confirms correct torque application, while the dual-layer insulated handle enhances safety in high-risk environments.

Features and Benefits

- Adjustable torque range ensures precise fastening and prevents over-tightening or component damage
- Audible and tactile click-stop mechanism confirms correct torque application for consistent, repeatable results
- Calibration memory marker allows users to track last torque setting for efficiency and accuracy
- Ergonomic insulated handle offers secure grip and comfort during prolonged electrical maintenance tasks
- Durable steel construction guarantees long-term accuracy and resistance to wear
- Colour-coded torque scale provides fast, easy identification of torque ranges
