INSULATED VDE TOOL SET 25 PCS FOAM 5 (OUR OWN CABINET - KEN-594-5580K)

This Insulated VDE Tool Set Foam 5 module is designed as part of a modular 114-piece VDE tool system, engineered for professional electricians and maintenance engineers working on live electrical installations. Manufactured in accordance with IEC 60900, each tool is individually insulated and tested for safe use up to 1000V AC. Supplied in a precision-cut foam insert to suit the KEN594558 0K cabinet, this module focuses on insulated 3/8" drive tools, cutting tools and adjustable gripping solutions, providing safe, organised access to essential equipment for electrical panel work, industrial maintenance and field servicing.

Features and Benefits

- IEC 60900 VDE-certified insulation ensures protection when working on live circuits up to 1000V AC
- Dedicated 3/8" insulated drive tools support controlled torque application in confined electrical enclosures
- Combination of hex and TORX® bit sockets allows safe access to common fasteners used in electrical systems
- Insulated cutting and gripping tools improve safety when handling cables, conduit and components
- Foam insert designed for cabinet integration maintains tool security, visibility and rapid inventory control
- Modular system compatibility enables this foam to be used alone or combined with other foam modules to complete the 114-piece set
