INSULATED VDE TOOL SET 14 PCS FOAM 1 (OUR OWN CABINET - KEN-594-5580K)

This 14-piece VDE-insulated tool set is engineered for safe maintenance and installation work on live electrical systems up to 1000V AC. Each tool is individually tested to VDE/IEC 60900 standards and built with a multi-layer insulated handle structure to prevent electric shock. Designed for industrial and commercial electrical environments, the set is supplied in a precision-cut foam inlay suitable for this Kennedy Roller Cabinet.

Features and Benefits

- Individually VDE/IEC 60900 tested insulation enables safe working on live circuits up to 1000V AC
- Multi-layer insulated handle construction provides durable dielectric protection and enhances grip security
- Hardened tool steel components deliver strength and durability for cutting, gripping and fastening applications
- Precision-cut foam inlay keeps tools securely organised and protected during storage and transport
- Fits directly into KEN5945580K tool storage systems for efficient workshop integration
