INSULATED SCISSORS - 160mm

The 160mm VDE Insulated Scissors are engineered for safe, precise cutting in live electrical environments up to 1000V AC/1500V DC. The precision-ground, serrated blades ensure clean, non-slip cuts on copper, aluminium, and soft cables, while the spring-loaded ergonomic handles reduce hand strain during prolonged use. Ideal for electricians, maintenance technicians, and control panel engineers, they deliver dependable performance in HV/LV installations, renewable systems, telecoms, and automation environments. Whether trimming, stripping, or shaping cables, these insulated scissors combine safety certification, cutting efficiency, and ergonomic comfort to meet the demanding requirements of modern electrical maintenance.

Features and Benefits

- VDE-certified 1000V insulation prevents electrical shocks, ensuring user safety when working on live circuits
- Precision-ground, serrated blades deliver clean, controlled cuts on copper or aluminium cables without slipping
- Hardened steel construction extends tool life and maintains blade sharpness through repeated use
- Spring-loaded ergonomic handle reduces hand fatigue, improving control and comfort during continuous operation
- Non-conductive double insulation provides added protection and peace of mind in high-risk environments
