Safety Knife Zinc-Alloy Body

The Safety Knife features a robust zinc-alloy body, combining durability with superior safety performance. Designed for professional use, this squeeze-activated safety knife ensures that the blade is only exposed during cutting, minimising the risk of accidental injury and making it suitable for a wide range of industrial and commercial applications.

Features and Benefits

- Strong zinc-alloy body provides durability and a long service life
- Squeeze safety mechanism automatically retracts the blade when released for maximum user protection
- High-quality construction guarantees consistent, reliable performance

Blade Operation	Squeeze
Type	Safety Knife
Handle Material	Zinc-Alloy
