Safety Knife With 5 Spare Blades Storage

This Safety Knife is built for maximum user protection and convenience, making it a reliable tool for professional cutting applications. Designed with an integrated storage compartment for five spare blades, it ensures quick and easy blade replacement, reducing downtime and maintaining workflow efficiency. The knife's retractable blade mechanism enhances safety by automatically returning the blade to its housing after use, minimising the risk of accidental cuts.

Features and Benefits

- Integrated blade storage holds five spare blades for quick replacement and reduced downtime
- Fully retractable safety mechanism prevents accidental exposure to the blade
- Durable construction ensures long-lasting performance in demanding environments

Knife Features	Includes Additional Blades
Type	Safety Knife
